P R E F A C E

The Statistical Abstract of Cyprus, issued annually since 1955, aims at presenting in a summarized form statistics on almost all aspects of the economic and social life in Cyprus. The data published herein originate mostly from censuses and surveys conducted by the Statistical Service of Cyprus as well as records of other government departments and semi-government organisations.

This edition includes time series statistical information, where possible since 1960 and extending to 2014.

The Statistical Service acknowledges with thanks the valuable contribution of all government departments, semi-government and private organizations and enterprises for providing information necessary for this Abstract.

This report was the joint effort of all Divisions and Sections of the Statistical Service, co-ordinated and edited by Mrs E. Sophocleous, Statistics Assistant under the supervision of Mr C. Diamantides, Senior Statistics Officer.

G. Chr. Georgiou
Director
Statistical Service

A. UNITS OF MEASUREMENT

Length

1 metre (m)	=1.000 millimetres	= 1,09361 yards
1 kilometre (km)	=1.000 metres	= 0,621371 miles

Area

1 square metre (m ²)	=million square millimetres	= 1,195 square yards
1 square kilometre (km ²)	=million square metres	= 247,1 acres
1 hectare (ha)	=10.000 square metres	= 2,471 acres

Volume

1 cubic metre (m ³)	=million cubic centimetres	= 1,30795 cubic yards
L alc100%	=Litre of alcohol 100%	

Capacity

1 litre (l)	=1 cubic decimetre	= 0,2200 gallon
1 hectolitre (hl)	=100 litres	= 22,00 gallons

Weight

1 kilogram (kg)	=1.000 grams or 10 hectogr.	= 2,20462 pounds
1 metric tonne (t)	=1.000 kilograms	= 1,10231 short tons or 0,9842 long ton

B. CURRENCY

Currency Unit	=1 Euro	= 100 cent

C. SYMBOLS USED

..	= Not applicable
...	= Not available or not separately reported
n.e.	= Not estimated or not applicable
n.o.	= Not occurring
0	= Nil, zero or less than half the final digit shown
-	= To indicate negative numbers
pr.	= Provisional, preliminary or estimated figures
n.e.c.	= Not elsewhere classified
n.e.s.	= Not elsewhere stated or specified
incl.	= Including
cont'd	= Continued
000's	= Thousand
mn	= Million
€000's	= Thousand euro
€mn	= Million euro
C	= Confidential statistical information
S	= Secondary confidential statistical information

LIST OF TABLES

	Page
A. ECONOMY AND FINANCE	
A.1. NATIONAL ACCOUNTS	
1. Gross domestic product, gross national product, private final consumption expenditure and gross domestic fixed capital formation, 1960-2014	13
2. Per capita gross national income, 1960-2014	14
3. Per capita final private consumption expenditure, 1960-2014	15
4. Gross domestic fixed capital formation by type of capital asset, 1960-2014	17
5. Gross domestic fixed capital formation, 1960-2014	18
6. Main economic indicators by sector, 1995-2014	19
7a. Gross domestic product by activity at current market prices, 1995-2014	24
7b. Percentage annual change of gross domestic product by activity at current market prices, 1996/95-2014/13	25
8a. Gross domestic product by activity at constant market prices of 2005, 1995-2014	26
8b. Percentage annual change of gross domestic product by activity at constant market prices of 2005, 1996/95-2014/13	27
9a. Expenditure on gross domestic product by category at current market prices, 1995-2014	28
9b. Percentage annual change in expenditure on the gross domestic product by category, at current market prices, 1996/95-2014/13	29
10a. Expenditure on the gross domestic product by category at constant market prices of 2005, 1995-2014	30
10b. Percentage annual change in expenditure on the gross domestic product by category at constant market prices of 2005, 1996/95-2014/13	31
11a. Gross domestic fixed capital formation by activity and type at current market prices, 1995-2013	32
11b. Gross domestic fixed capital formation by activity and type at constant market prices of 2005, 1995-2013	35
12. Gross domestic product by category of factor income, 1995-2014	38
A.2. PUBLIC FINANCE	
1. Main aggregates of general government, 2000-2014	41
2. Sequence of accounts and balancing item for the general government sector, 2000-2014	42
A.3. BALANCE OF PAYMENTS	
1a. Balance of payments, 1995-2007	47
1b. Balance of payments, 2008-2014	48
A.4. MONEY AND BANKING	
1. Deposits of non-MFIs held with MFIs, 2005-2014	51
2. Loans to non-MFIs by institutional sector, 2005-2014	51
3a. Foreign exchange rates, 1990-2007 (foreign currency per C£)	52
3b. Foreign exchange rates, 1999-2014 (foreign currency per €)	52
4a. Interest rates (Deposits), 2013-2015	53
4b. Interest rates (Loans), 2013-2015	54
5. Co-operatives by type and individual members, 1960-2014	55
A.5. CONSUMER PRICE INDEX	
1. Consumer price index (annual index and percentage change), 1960-2014	59
2. Consumer price index by category (base: 1998=100), 1999-2014	60
3. Cost of living allowance granted to employees, 1960-2015	62

	Page
A.6. HARMONISED CONSUMER PRICE INDEX	
1. Harmonised consumer price index by category (base: 2005=100), 1996-2014	63
2. Percentage annual change of the harmonised index of consumer prices by category, (base: 2005=100), 1997/96-2014/13.....	64
B. POPULATION AND SOCIAL CONDITIONS	
B.1. CENSUS YEARS	
1. Population, census years	69
2. Distribution of population by district, census years	70
3. Percentage distribution of population by marital status and sex, census years (for persons aged 15 and over)	71
4. Population by age-group and sex, census years	72
5. Population of municipalities and communities by size, 1992, 2001 and 2011 censuses	73
6. Households and average number of persons per household by district, census years	74
B.2. POPULATION	
1. De jure population estimates by sex, 1974-2014.....	75
2. Population changes, 1974-2014	76
3. End of the year de jure population estimates by age group and sex, 1994-2014.....	77
4. Population by district (end of the year), 1992-2014	79
5. Households by district (end of the year), 1992-2014.....	80
B.3. DEMOGRAPHY	
1. Live births by sex and birth rates, 1974-2014	81
2. Fertility rates, 1974-2014	82
3. Live births by birth order and mean age of mother at child birth, 1974-2014	83
4. Deaths by sex and death rates, 1974-2014	84
5. Life expectancy at birth for males and females, 2002-2014	85
6a. Life table - Males, 2014	86
6b. Life table - Females, 2014	86
7. Marriages and divorces, 1974-2014	87
8. Mean age at marriage by type of marriage, 1974-2014	88
9. Long-term immigrants by month and sex, 2009-2014	89
10. Emigrants by month and sex, 2009-2014	90
B.4. CRIME	
1. Serious offences reported to the police, 1976-2014	93
2. Adults involved in the commission of serious offences by offence group and sex, 2012-2014	94
3. Juveniles involved in the commission of offences by offence group and sex, 1976-2014	95
4. Persons convicted by the courts, by offence group, 1975-2014	96
5. Sentences imposed by the courts, 1975-2014	96
6. Adults proceeded against and convicted by the courts, 1950-2014	97
7. Adults proceeded against by offence group, 1975-2014	98
8. Adults convicted by the courts, by offence group, 1975-2014	98
9. Admissions of convicted prisoners, 1950-2014	99
10. Admissions of convicted prisoners by sentence imposed, 1975-2014	99
11. Admissions of convicted prisoners by offence group, 1975-2014	100
12. Admissions of convicted prisoners by age group and sex, 1975-2014	100

	Page
B.5. EDUCATION	
1. Schools, pupils and teachers in formal education by level (public and private), 1960/61-2013/14 ...	103
2. Primary school pupils in urban and rural areas (public and private), 1960/61-2013/14.....	104
3. Secondary school leavers by type of school (public and private), 1960/61-2012/13	104
4. Secondary school leavers by specialization, 1965/66-2012/13	105
5. Literacy rates, 1946-2011	105
6a. Highest educational attainment for persons 20 years of age and over, 1946-1991	106
6b. Highest educational attainment for persons 20 years of age and over, 1992-2014	106
7. School enrolment ratios, 1980-2013	107
8. Tertiary students per 100.000 inhabitants, 1970-2013	109
9. Number of students in tertiary educational institutions, 1963/64-2013/14	110
10. Number of tertiary students by level of study and sex, 1963/64-2013/14	112
11. Number of enrolments in tertiary education by field of study, 1963/64-2013/14	113
12a. Tertiary Cypriot students abroad by country of study, 1966/67-2010/11.....	114
12b. Tertiary Cypriot students abroad studying in another European country, 2007/2008-2012/13.....	114
13. Tertiary Cypriot students abroad by field of study, 1966/67-2010/11	115
14. Tertiary Cypriot students abroad by level of education, 1975/76-2010/11	115
15. Public expenditure on education as % of G.D.P. and Budget, 1965-2013	116
16. Public expenditure on education by ministries, 1995-2013	116
17. Public expenditure on education by level and category, 1995-2013	117
18. Per pupil/student public expenditure by category of expenditure and level of education, 2000-2013	118
19. Private expenditure on education by level and type of educational institution, 2005-2013	119
B.6. HEALTH	
1. Health Indicators, 1960-2013	123
2a. Expenditure on health services, 1998-2004	124
2b. Expenditure on health services, 2005-2013	124
3. Health data, 1960-2013	125
4. Hospital beds by type of hospital and department, public sector, 1976-2013	126
5. Bed occupancy rates by type of hospital and department, 1980-2013	127
6. Private clinics by district, number of hospital beds and personnel, 1995-2013	127
7. Patients admitted in government general hospitals by department, 1981-2011	128
8. Patients discharged from government general hospitals by department, 1981-2013	129
9. Patients discharged from government general hospitals by disease category (ICD-10), 1995-2013 .	130
10a. Patients operated and discharged from government general hospitals by operation category, 1980-2010	131
10b. Selected surgical procedures performed in general and rural hospitals by category, 2013	132
11. Out-patient attendances by type of hospital and speciality, 1980-2013	133
12. Out-patient attendances by disease category (all government medical institutions), 1995-2009	134
B.7. WELFARE	
1. Displaced beneficiaries of public assistance by nature of distress, 1980-2014	137
2. Non-displaced beneficiaries of public assistance by nature of distress, 1980-2014	137
3. Beneficiaries of public assistance by nature of distress, 1980-2014	138
4. Percentage distribution of beneficiaries of public assistance by nature of distress, 1980-2014	138
5. Beneficiaries of public assistance, displaced and non-displaced, 1980-2014	139
6. Child and family welfare, children in care and method of treatment, 1973-2014.....	140

C. LABOUR

C.1. LABOUR FORCE SURVEY

C.1.1. L.F.S. - LABOUR FORCE

1. Labour force participation rates by age group and sex, 2000-2014	145
2. Labour force by age group and sex, 2000-2014	146

C.1.2. L.F.S. - EMPLOYMENT

1. Employment rates by age group and sex, 2000-2014	147
2. Employment by age group and sex, 2000-2014	148
3a. Employment by economic activity (Total), 2008-2014	149
3b. Employment by economic activity (Males), 2008-2014	150
3c. Employment by economic activity (Females), 2008-2014	151
4a. Employment by occupational group (Total), 2000-2014	152
4b. Employment by occupational group (Males), 2000-2014	153
4c. Employment by occupational group (Females), 2000-2014	154
5. Employment by status in employment and sex, 2000-2014	155
6. Employment by educational attainment level and sex, 2000-2014	156
7. Employment by nationality and sex, 2000-2014	157

C.1.3. L.F.S. - UNEMPLOYMENT

1. Unemployment rates by age group and sex, 2000-2014.....	158
2. Unemployment by age group and sex, 2000-2014	159
3a. Unemployment by economic activity (Total), 2008-2014	160
3b. Unemployment by economic activity (Males), 2008-2014	161
3c. Unemployment by economic activity (Females), 2008-2014.....	162
4a. Unemployment by occupational group (Total), 2000-2014	163
4b. Unemployment by occupational group (Males), 2000-2014	164
4c. Unemployment by occupational group (Females), 2000-2014	165
5. Unemployment by educational attainment level and sex, 2000-2014	166
6. Unemployment by nationality and sex, 2000-2014	167
7. Unemployment by duration and sex, 2000-2014	168

C.2. EMPLOYMENT

1. Economically active and gainfully employed population, 1960-2014	169
2a. Gainfully employed population for the production of G.D.P. by industry (ISIC 1968), 1960-1994	170
2b. Gainfully employed population for the production of G.D.P. by industry (NACE Rev. 1.1), 1995-2010	170
2c. Gainfully employed population for the production of G.D.P. by industry (NACE Rev. 2), 2000-2014	171
3a. Employment by occupation (ISCO 1968) and sex at registration years, 1976-1989	172
3b. Employment by occupation (ISCO 1988) and sex at registration years, 1989, 1995 and 2000	172
4. Non-agricultural employment by status and sex at registration years, 1967-2005	173
5. Civilian employment in Government by category, 1960-2014	173
6. Establishments and employment by industry and size of establishment, at registration years, 1967-2005	174
7a. Persons involved in industrial accidents by branch of economic activity (ISIC 1968), 1960-2001 ..	177
7b. Persons involved in occupational accidents by economic activity (NACE Rev. 1.1), 2002-2007	177
7c. Persons involved in occupational accidents by economic activity (NACE Rev. 2), 2008-2014	178
8. Persons involved in industrial accidents by cause, 1969-2014	179

C.3. REGISTERED UNEMPLOYED

1. Registered unemployed by sex, 1960-2014	180
2a. Registered unemployed by occupational group (ISCO 1968), 1960-1991	181

	Page
2b. Registered unemployed by occupational group (ISCO 1988), 1992-2014	181
3a. Registered unemployed by industry (ISIC Rev. 2), 1976-2005	182
3b. Registered unemployed by industry (NACE Rev. 1), 2005-2010	182
3c. Registered unemployed by industry (NACE Rev. 2), 2010-2014	183
4. Registered unemployed by duration of registration and sex, 1973-2014	184
5. Registered unemployed by educational level and sex, 1974-2014	185
6. Vacancies filled by the labour exchanges, 1964-2014	186
7. Labour disputes, work stoppages and workdays lost, 1960-2014	187
8a. Work stoppages and workdays lost by branch of economic activity (ISIC 1968), 1960-2001	188
8b. Work stoppages and workdays lost by branch of economic activity (NACE Rev. 1.1), 2002-2010 ..	189
8c. Work stoppages and workdays lost by branch of economic activity (NACE Rev. 2), 2014	190
 C.4. EARNINGS AND LABOUR COST	
1. Indices and growth in earnings, 1960-2014	191
2. Labour cost index per hour of work by sector and quarter, 2006-2014	192
3. Quarterly percentage change in total labour cost per hour of work, 2007/06-2014/13	195
4. Index of wages and salaries per hour of work by sector and quarter, 2006-2014	197
5. Quarterly percentage change in wages and salaries per hour of work, 2007/06-2014/13	200
6. Total labour cost per hour of work by sector, 2009-2013	202
 C.5. SOCIAL INSURANCE	
1. Persons insured by sex, 1957-2014	205
2. Social insurance contributions, 1958-2014	205
3. Social insurance claims settled, 1957-2014	206
4. Payments of social insurance benefits, 1957-2014	207
5. Pensioners by kind of pension, 1966-2014	208
 D. EXTERNAL TRADE	
1. Foreign trade summary, 1930-2014	215
2. External trade by H.S. commodity section, 1990-2014	216
3. Imports/arrivals destined for home use by economic destination, 1990-2014	224
4. Total imports/arrivals by main partner country, 1990-2014	225
5. Total exports/dispatches by main partner country, 1990-2014	226
6. Exports/dispatches of domestically produced goods (excl. stores and provisions) by broad economic sector/commodity, 1990-2014	227
 E. AGRICULTURE, FORESTRY AND FISHING	
E.1. AGRICULTURE	
1. Main indicators of the agricultural sector, 1960-2014	233
2. Use of agricultural land, 1960-2014	234
3. Use of irrigable agricultural land, 1960-2014	234
 E.2. CROP PRODUCTION	
1. Production of main crops, 1960-2014	235
 E.3. LIVESTOCK PRODUCTION	
1. Production of main livestock products, 1960-2014	236
2. Animal population by type, 1960-2014	236

	Page
<i>E.4. ECONOMIC ACCOUNTS OF AGRICULTURE</i>	
1. Gross output by sub-sector, at current prices, 1960-2014	237
2. Value added by sub-sector, at current prices, 1960-2014	237
3. Quantity indices of agricultural production, 1996-2014	238
4. Price indices of agricultural production, 1996-2014	239
5. Price indices of agricultural inputs, 1996-2012	240
6. Volume indices of agricultural inputs, 1996-2012	240
7. Quantity of exports of agricultural products, 1960-2014	241
8. Value of exports of agricultural products, 1960-2014	241
<i>E.5. FORESTRY</i>	
1. Production of soft wood, 1960-2013	242
2. Production of hard wood, 1960-2013	242
<i>E.6. FISHING</i>	
1. Main indicators of the fishing sector, 1995-2014	243
2. Fish caught and imports of fish, 1960-2014	243
F. INDUSTRY, CONSTRUCTION	
<i>F.1. INDUSTRY</i>	
1a. Employment, gross output, value added and domestic exports of the manufacturing subsector, 1962-2014	251
1b. Employment, gross output and value added in mining and quarrying, electricity and water supply, 1962-2007	252
2. Cost analysis of the industrial sector, 2010-2013	253
3. Employment in the industrial sector, 2008-2014	256
4. Gross output in the industrial sector, 2008-2014	257
5. Value added in the industrial sector, 2008-2014	258
6. Expenditure on fixed assets in the industrial sector, 2008-2014	259
7. Domestic exports of industrial goods, 2005-2014	260
8. Sales of selected manufacturing commodities, 2009-2013	261
9a. Industrial production index (base: 2010=100), 2010-2014	263
9b. Industrial production index (base: 2005=100), 2006-2013	264
10a. Industrial output prices index (base: 2010=100), 2010-2014	265
10b. Industrial output prices index (base: 2005=100), 2006-2013	267
11. Establishments, employment, gross output and value added of the cottage industry by activity, 1962-1992	269
<i>F.2. CONSTRUCTION</i>	
1. Employment, gross output and value added of the construction sector, 1967-2013	273
2. Cost analysis of the construction sector, 2008-2013	274
3. Gross output of new construction by type of project, 2008-2013	275
4. Building permits authorised by category and dwellings and rooms constructed, 1966-2014	276
5. Number, volume, area and value of building permits authorised by district, 1991-2014	277
6. Dwellings by type, area and district, 2011	278
7. Percentage distribution of dwellings by type, area and district, 2011	278
8. Indices of costs in the construction sector, 1980-2014	279
11. Index of output prices in construction, 2000-2014	279
12. Cost of dwellings completed in the private sector, 1980-2013	280

G. SERVICES

G.1. TRANSPORT AND STORAGE

1.	Main indicators of the transport and storage sector, 2008-2013.....	285
2.	Gross output and value added in the transport and storage sector (Nace Rev. 2), 2008-2013	285
3.	Gross output in the transport and storage sector by activity (Nace Rev. 2), 2008-2013	286
4.	Motor vehicles licensed by category, 1990-2014	287
5.	Total imports of motor vehicles by country of origin, 2001-2014	288
6.	Registration of motor vehicles by category, 1990-2014	289
7.	Registration of motor vehicles by category and engine capacity, 1961-2014	290
8.	International road transport by type of transport and country of origin, 2004-2014	292
9.	International road transport by type of transport and country of destination, 2004-2014	294
10.	Length of public roads and expenditure on roads and bridges, 1960-2014	296
11.	Road accidents and persons killed and injured, 1960-2014	297
12.	Vessels called at Cyprus ports by nationality and net registered tonnage, 1960-2014	298
13.	Vessels called by port, 1960-2014	301
14.	Net registered tonnage of vessels called by port, 1960-2014	302
15.	Number of ships on the Cyprus register, 1965-2014	303
16.	Gross registered tonnage of ships on the Cyprus register, 1965-2014	304
17.	Gross tonnage of goods loaded and unloaded at ports and airports, 1960-2014	305
18.	Aircraft, passenger and freight movements by airport, 1960-2014	306
19.	Postal services, 1965-2014	307
20.	Post office revenue and expenditure, 1960-2014	308

G.2. TOURISM

1.	Statistics on movement of travellers, 1980-2014	311
2.	Travellers by mode of travel, 1976-2014	312
3.	Arrivals of visitors by mode of travel and purpose of visit, 1979-2014	313
4.	Arrivals of tourists by month, 1976-2014	314
5.	Arrivals of tourists by country of usual residence (main countries), 1986-2014	315
6a.	Percentage distribution of tourists by country of usual residence (main countries) and type of accommodation in Cyprus, 2013	317
6b.	Percentage distribution of tourists by country of usual residence (main countries) and type of accommodation in Cyprus, 2014	318
7a.	Percentage distribution (column) of tourists by country of usual residence (main countries) and location of stay in Cyprus, 2013	319
7b.	Percentage distribution (column) of tourists by country of usual residence (main countries) and location of stay in Cyprus, 2014	320
8.	Arrivals of tourists and revenue estimates by month, 2012-2014	321
9.	Per person (PP) and per day (PD) expenditure of tourists by month and type of expenditure, 2012-2014	322
10.	Trips of residents by country visited (main countries), 1998-2014	323
11.	Trips of residents by purpose of visit aboard, 1998-2014	324
12.	Overnight stays of non-residents and residents by district and type of accommodation, 2011-2014	325
13.	Number of tourist establishments by type of accommodation, 1990-2014	326
14.	Bedplaces by type of accommodation, 1990-2014	326

G.3. DISTRIBUTIVE TRADE

1.	Main indicators of the wholesale and retail trade sector, 2005-2014	329
2.	Gross output by major group of trade activity, 2005-2014	330
3.	Value added by major group of trade activity, 2005-2014	331
4.	Employment by major group of trade activity, 2005-2014	332

G.4. OTHER SERVICES:

G.4.1. HOTELS AND RESTAURANTS, BUSINESS SERVICES, EDUCATION, HEALTH, OTHER SOCIAL AND PERSONAL SERVICE ACTIVITIES

1.	Main indicators for the accommodation and food services sector, 2008-2014	335
2.	Main indicators for the business service activities sector, 2008-2014	335
3.	Main indicators for the education, human health and social work, arts, entertainment and other service activities sector, 2008-2014	336
4.	Gross output by economic activity, 2008-2014	336
5.	Value added by economic activity, 2008-2014	337
6.	Employment by economic activity, 2008-2014	337
7.	Gross fixed capital formation, 2008-2013	338

G.4.2. FINANCIAL AND INSURANCE ACTIVITIES

1.	Main indicators, 1995-2014	341
2.	Gross output by economic activity, 1995-2014	342
3.	Value added by economic activity, 1995-2014	342
4.	Employment by economic activity, 1995-2014	343
5.	Gross fixed capital formation by economic activity, 1995-2013	343

G.4.3. INSURANCE AND REGISTRATION OF COMPANIES

1.	Gross premiums written in Cyprus, 2005-2013	347
2.	Non-life premiums written, 2005-2013	347
3.	Gross life premiums written, 2005-2013	348

INTRODUCTION

THE REPUBLIC OF CYPRUS

1. The State

Official name of state: Kypriaki Demokratia (Greek), Kıbrıs Cumhuriyeti (Turkish), Republic of Cyprus (English)

Independence Day: 1 October

Cyprus gained its independence from British colonial rule in 1960. In 1974 Turkey invaded Cyprus and occupied 36,2% of its sovereign territory. A ceasefire line still runs across the island and cuts through the heart of the capital, Lefkosia (Nicosia), dividing the city and the country.

Although its northern part is under Turkish occupation, the Republic of Cyprus is internationally recognised as the sole legitimate state on the island with sovereignty over its entire territory, including the areas occupied by Turkey.

Greek and Turkish are the official languages of Cyprus, while English is widely spoken.

Greek Cypriots are predominantly Christian and adhere to the Autocephalous Greek Orthodox Church of Cyprus. Turkish Cypriots are predominately Sunni Muslims, while Maronites belongs to the Maronite Catholic Church, Armenians predominantly to the Armenian Apostolic Orthodox Church and Latins to the Latin Catholic.

2. The Flag

The flag of the Republic of Cyprus was defined in 1960 when Cyprus became an independent sovereign state. The background is white with a copper-coloured (pantone 1385 C) silhouette of the map of Cyprus in the centre of the flag above two crossed olive-green-coloured (pantone 574 C) olive branches. The copper colour has a dual symbolism: first, the name of the island is said to derive from an ancient word for copper (Eteocypriot or Sumerian); and second, copper is closely associated with Cyprus since antiquity when the island became a major producer and supplier of this mineral resource. The olive branches are symbols of peace.

3. The Emblem

The Emblem of the Republic of Cyprus depicts a white dove carrying an olive branch in its beak and placed inside a shield in the colour of copper (pantone 1385 C), a metal directly related to Cyprus since ancient times; the year of the independence of Cyprus, “1960”, also in white, appears underneath the dove; the shield is braced by two olive-green-coloured (pantone 574 C) olive branches, which along with the white dove constitute symbols of peace.

4. Government

Cyprus is an independent sovereign Republic with a presidential system of government. The constitution provides for separate executive, legislative and judicial branches of government with independent powers. The President is both Head of State and Government.

GEOGRAPHY

1. Location, area and population

Situated at the north-eastern end of the Mediterranean Sea, Cyprus, with an area of 9.251 square km (3.572 square miles), is the third largest island after Sicily and Sardinia, extending 240 km (149 miles) from east to west and 100 km (62 miles) from north to south. It is strategically situated at the crossroads of Europe, Africa and Asia, and in close proximity to the busy trade route linking Europe with the Middle East, Russia, Central Asia and Far East. Cyprus' geographic location has been a major factor influencing the course of the island's history throughout the centuries.

The population of Cyprus in the Government controlled area of the Republic was estimated at 847.000 in December 2014 and is distributed in the districts as follows:

- Lefkosia (Nicosia) [Capital of Cyprus] 329.500
- Lemesos (Limassol) 236.600
- Larnaka (Larnaca) 144.000
- Pafos (Paphos) 90.100
- Ammochostos (Famagusta) 46.800

2. Natural Regions

Cyprus may be divided into the following natural regions:

(a) The Troodos (or southern) Range. This is a dome-shaped highland of infertile igneous rocks forming the backbone of the island and situated in the central-west part of the island. It is a region of high relief rising to 1.951 metres in Mount Olympus. Several rivers spring radially from Troodos ending in the sea. The forests which cover the Troodos massif combined with its steep slopes and precipices and narrow valleys and crevices help create beautiful scenery. The hard igneous rocks are surrounded by a lower belt of dome-shaped pillow lava, a most infertile area, which levels gradually towards the coast.

(b) The Keryneia (or northern) Range. This northern mountain range, mainly of limestone, rises up to 1.024 metres at Kyparissiovouno. Part of this range consists of finger-shaped mountains known as "Pendadaktylos" (five-fingers). It is in this beautiful mountain range that the three famous castles of St. Hilarion, Voufavento and Kantara are found. A number of crevices have helped the development of a network of communication with the northern coastal valleys. Karpasia, the north-eastern part of the range, is a continuation of Pendadaktylos consisting of hills, slopes and valleys free of foldings and other tectonic features.

(c) The Mesaoria or Central Plain. The central plain is situated amidst the Troodos and Keryneia mountain ranges and has a low relief, not exceeding 180 metres near Lefkosia. This plain is composed of flysch-type rocks carried by rivers from the Troodos and Keryneia ranges and was formed during a very recent chronological period.

(d) The Coastlands. Cyprus is almost surrounded by coastal valleys: In the north is the Keryneia valley with its narrow dentilated coasts; in the south are the Larnaka and Lemesos valleys; in the west are the Pafos and Chrysochou valleys; in the east is the Ammochostos valley. The soils are alluvial and fertile suitable for agricultural activities.

3. Natural Vegetation

Notwithstanding its small size, Cyprus has a great variety of natural vegetation. This includes 1760 different kinds of plants, out of which 132 are considered as endemic to Cyprus. According to Eratosthenes (275-195 BC), a Greek botanist, most of Cyprus, even the Mesaoria, was heavily forested in antiquity. Considerable remnants of these forests survive on the Troodos and Keryneia Ranges and locally at lower altitudes. Nowadays about 18% of the whole island is classified as State Forest Land. This includes forests of conifers such as the Calabrian pine (*Pinus brutia*), Black pine (*Pinus nigra*), Cedar (*Cedrus libani* ssp.

brevifolia), Cypress (*Cupressus sempervirens*) and small scale plantations of Eucalypts. Where the forest has been destroyed, tall (4-6 m. high) shrub communities of *Arbutus andrachne*, *Pistacia terebinthus*, *Olea europaea*, *Styrax officinalis*, *Quercus coccifera* and *Juniperus phoenicia* may survive and form a special type of vegetation, the maquis. Such maquis cover to a great extent Akamas and Carpass peninsula. Over most of the island untilld ground bears a grazed covering of garigue, largely composed of low (less than 3 m. high) bushes of *Cistus* ssp. *Genista spaelata*, *Calycotome villosa*, *Lithodora hispidula*, *Phagnalon rupestre* and locally, *Pistacia lentiscus*, associated with a wide variety of annual and perennial herbs. Where grazing is excessive this cover is soon reduced and an impoverished batha remains, consisting principally of *Sarcopoterium spinosum*, *Thymus capitatus*, *Fumana* ssp., *Micromeria* spp. and a few stunted herbs.

4. Birds and animals

Cyprus has been endowed with a rich fauna including a large number of endemic birds, reptiles and other animals. Because of its position, Cyprus is also a vital stop-over place for thousands of migratory birds which find the island an ideal place for both feeding and refuge. Among the animals moufflon occupies an outstanding position and is considered as one of the natural treasures of the island. Moufflon belongs to the sheep family but this species is unique to the world. This interesting and noble beast, which is the symbol of the Cyprus Republic and used on its coins, has long been in danger of extinction, but today is a fully protected animal.

5. Climate

Cyprus has an intense Mediterranean climate with the typical seasonal rhythm strongly marked in respect of temperature, rainfall and weather generally. Hot dry summers from mid-May to mid-September and rainy, rather changeable, winters from November to mid-March are separated by short autumn and spring seasons of rapid change in weather conditions.

Weather conditions in 2014

From January to December 2014, the total rainfall in the area of Cyprus under Government control was 393,6 mm i.e. 78% of the normal (1961-1990). Rainfall above normal was recorded during the period May-October, while in the remaining months the amount of rainfall was well below normal. The rainfall amount of 62,9 mm (i.e. 321% of normal) recorded in May, was the fourth larger for the specific month since 1916.

The monthly area average precipitation over the part of the island under government control was as follows:

Month	Actual Precipitation (2014) (mm)	Normal Precipitation (1961-1990) (mm)	Actual/Normal Precipitation (%)
January	36,9	102,4	36
February	41,5	81,6	51
March	27,2	61,9	44
April	13,1	29,9	44
May	62,9	19,6	321
June	15,5	6,0	258
July	3,7	2,6	142
August	4,5	2,9	155
September	10,8	4,5	240
October	45,0	32,7	138
November	48,3	53,3	91
December	84,2	105,6	80
Total	393,6	503,0	78

The mean air temperature for the year as a whole was around normal. Deviations from normal greater than 2,0 °C were recorded in January, February, March and December. Heat wave conditions (maximum daily temperature above 40,0 °C) prevailed during the period 22-24 of August. The maximum daily temperature of 43,1 °C recorded in Athalassa on the 28th of June was the second larger for the specific station and for the specific month since 1983.

Month	Difference Between Mean Daily Maximum and Normal Temp. 1961-90 (°C)	Difference Between Mean Daily Minimum and Normal Temp. 1961-90 (°C)	Mean Difference (°C)
January	+3,5	+3,1	+3,3
February	+3,5	+2,1	+2,8
March	+3,3	+2,7	+3,0
April	+1,9	+1,6	+1,7
May	-0,3	+1,4	+0,6
June	+0,5	+1,7	+1,1
July	+0,2	+1,3	+0,8
August	+1,1	+2,5	+1,8
September	-0,1	+1,9	+0,9
October	+0,6	+1,3	+1,0
November	+1,0	+1,0	+1,0
December	+3,1	+3,1	+3,1
Mean	+1,5	+2,0	+1,7

The mean daily sunshine duration for the year as a whole was around normal (i.e. 102% of normal). During the year, various extreme or unusual weather events were recorded locally, such as severe rainfalls, floods and extreme thunderstorms (January, March, April, August, October, December), severe hailstorms (January, March, April, December), strong winds (March, December), tornadoes and waterspouts (December), thunderbolts (April, October), suspended dust in the atmosphere (March) and thick fog (February).

Snowfall was recorded in January, February, March and November over the mountainous areas.

HISTORY

1. Historical Background

Cyprus, according to mythology, is the birthplace of Aphrodite, the goddess of love and beauty who was born in Pafos, where she had risen from the sea. The island is both an ancient land, with an eleven thousand-year-old history and civilisation, and a young independent Republic since 1960.

The dawn of civilization in Cyprus, according to archaeological evidence, goes back to the 9th millennium BC when the island was populated by its Neolithic inhabitants. The island acquired its Greek character after it was settled by the Mycenaean – Achaean Greeks between the 13th and 11th century BC. The Achaean Greeks established city kingdoms in the island on the Mycenaean model and introduced the Greek language and the Greek way of life, which exercised a lasting influence throughout the history of Cyprus. In the mid-9th century BC Phoenician settlers began to arrive, concentrating mainly in the coastal city of Kition.

The island was well known for its prosperity - its copper mines and forest. Given its wealth, it became an object of contest among the great powers of the Eastern Mediterranean in antiquity: the Assyrians, the Egyptians and the Persians, who in turn became its masters (8th – 4th century BC). Alexander the Great finally liberated the island from the Persians. On the partition of the Persian Empire, Cyprus retained its

Greek identity as one of the most significant parts of the Hellenistic state of the Ptolemies (310-30 BC); later, between 30 BC and 330 AD, Cyprus became part of the Roman Empire. It was then that Christianity came to Cyprus as a result of the visit, in 45 AD, of the Apostles Paul and Barnabas who converted the Roman Proconsul and thereby made Cyprus the first country in the world to be ruled by a Christian.

On the division of the Roman Empire in 395 AD, Cyprus became a province of the Greek-speaking world of Byzantium and its ethnic heritage was kept alive. The Greek language and culture also prevailed throughout the centuries that followed even though Cyprus came under the rule of successive foreign powers – King Richard I (the Lionheart) of England who occupied the island on his way to the Third Crusade and the Knights of Templar (1191-1192), the Franks (Lusignans) (1192-1489), Venetians (1489-1571), Ottoman Turks (1571-1878) and British (1878-1960), when Great Britain rented Cyprus from Turkey in exchange of a British promise to help Turkey against Russia. In 1914, Great Britain annexed the island and Cyprus became a British Colony.

The Greek Cypriots mounted an anti-colonial liberation struggle against British rule from 1955 to 1959. In 1960 Cyprus gained its independence and became a constitutional Republic on the basis of the Zurich - London agreements. Greece, Turkey and Great Britain were to stand as guarantors of Cyprus' independence under the Zurich-London agreements and Britain would retain two sovereign base areas. The military bases, one at Akrotiri, Episkopi and the other at Dhekelia, cover 2,7% of the island's territory.

Political power was to be shared between the Greek and Turkish Cypriots on a 7:3 ratio. This gave the Turkish Cypriot community (a numerical minority of 18% of the population) 30% representation in the government and state institutions. In addition, the Turkish Cypriot community has veto rights on major issues.

2. Turkey's military invasion and occupation

Relations between the two communities had for centuries been peaceful and amicable. However, certain provisions on the Zurich -London agreements and the 1960 Constitution (which were effectively imposed on the people of Cyprus) were to prove conducive to domestic conflict and foreign interference. The Constitution itself emphasised differences between Greek and Turkish Cypriots thereby encouraging divisive rather than integrative tendencies between the two communities. Greek Cypriots were determined to strengthen the unity of the state but the Turkish Cypriot leadership, at the strong urging of Turkey, sought ethnic segregation and geographic separation. This resulted in the intercommunal clashes of 1963-1964, the drawing up of the dividing "green line" running through Lefkosia and the constant efforts on the part of Turkish Cypriot extremists to promote Turkey's partitionist and expansionist designs.

The coup on 15 July 1974, perpetrated against the legal government of the Republic of Cyprus by the military of junta ruling Greece at the time, gave Turkey a long-awaited pretext to invade the island on 20 July 1974 in violation of the UN Charter, international law and the principles governing the conduct among nations. As a result 36,2% of the Republic of Cyprus was occupied (the northern part, representing 70% of the economic potential) and still remains under Turkey's military control. About 200.000 Greek Cypriots – over a third of the population- were displaced, becoming refugees in their own country, while the Turkish Cypriots were compelled to move to the occupied part of the island in compliance with Turkey's policy of ethnic segregation. About 1.200 Greek Cypriots are still missing as a result of the invasion. It has not been possible to ascertain their fate because Turkey refuses to cooperate fully in resolving this humanitarian issue.

Today, 43.000 Turkish troops still occupy the Republic of Cyprus illegally. More than 160.000 colonists from Turkey were brought to Cyprus and settled in the occupied areas, in violation of international law, with the aim of changing the demography of the island. In view of mass emigration of Turkish Cypriots from the occupied areas (due to the conditions created by Turkey's occupation) the total number of Turkey's troops and settlers is now much greater than that of the remaining Turkish Cypriots.

In order to consolidate the de facto division, the Turkish Cypriot leadership unilaterally declared the occupied areas an "independent state" in 1983. This act of secession against the Republic of Cyprus was

declared “legally invalid” by the UN Security Council, which also called for its withdrawal. No country in the world but Turkey recognises that illegal regime.

The illegal regime and Turkey have also followed a systematic policy of “turkification” in the occupied areas while destroying much of the island’s eleven thousand-year-old cultural heritage.

Another tragic occurrence is the eviction of the enclaved Greek Cypriots from their homes occupied by Turkey. While after the invasion there were 20.000 people enclaved, less than 400, mostly elderly, remain today.

3. Member of the European Union

On 1 May 2004 the Republic of Cyprus became a full member of the European Union (EU). Accession to the EU was a natural choice for Cyprus, dictated by its culture, civilization, history, its European outlook and adherence to the ideals of democracy, freedom and justice.

The application of the EU laws and regulation (the *acquis communautaire*) is suspended in the area under military occupation by Turkey, pending a solution to the occupation and forcible division of the country. Meanwhile, the Government of the Republic of Cyprus, in cooperation with the EU Commission, has been promoting arrangement to facilitate increases economic transactions between the two communities and improve the standard living of Turkish Cypriots, who are also victims of Turkey’s military aggression against Cyprus. While Cyprus has a lot to benefit from EU membership, it also has a lot to offer as a member state. Strategically situated at the crossroads of Europe, the Middle East, North Africa and Asia, Cyprus is becoming an even more important regional business center, as well as an international communications and transport hub. It is also a prospective energy (natural gas) provider for Europe.

Given its modern infrastructure, sound legal system, tax incentives, low crime rate and educated labour force, Cyprus is a favourite regional operations platform for European and other international companies.

Since its accession to the EU, Cyprus has undergone significant structural reforms that have transforms its economic landscape. Trade and interest rates have been liberalized, while price controls and investment restrictions have been lifted. Private financing has been introduced for the construction and operation of major infrastructure projects and monopolies have been abolished.

The new political context created by the accession to the EU is also expected to impact positively on the efforts to reach a comprehensive settlement to the division of Cyprus that will reunite its people and reintegrate its economy.

Cyprus held the Presidency of the Council of the European Union for the first time from July 1st – December 31st, 2012. During this period an agreement on the Unitary Patent Package and on the Single Supervisory Mechanism (SSM) was reached, negotiations for a Free Trade Agreement with Japan were launched, while the same negotiations with Singapore were completed. Significant progress was also achieved on the Multiannual Financial Framework and the Common European Asylum System.

ECONOMY

Developments in the economy of Cyprus during 2014

Prior to the emergence of the global economic crisis, Cyprus had enjoyed a track record of satisfactory economic growth, low unemployment and relatively stable macroeconomic conditions. These good economic conditions was the result of excessive credit and consumption in the economy leading to the creation of severe macroeconomic imbalances. The economic crisis exacerbated these imbalances resulting in an abrupt unwinding of these imbalances with the Cyprus economy facing an unprecedented economic

crisis, which escalated in the spring of 2013. Indicatively, the economy exhibited a contractionary path since 2011, while unemployment followed a rapidly increasing trend since 2008.

The inadequate regulatory and supervisory framework and the excessive credit expansion of the financial sector, the significant exposure of the Cypriot banks to the Greek economy and to Greek government bond holdings, as well as, the unprecedented lax fiscal policy that led to a rapid deterioration in public finances, were the key factors leading to a loss of access to the international capital markets by Cyprus, in spring 2011.

The decision of the Eurogroup for Private Sector Involvement including inter alia a haircut on Greek Government debt holdings in autumn 2011, with a consequential excessive impact on the Cyprus economy, as well as the significant delay in the submission of a request for financial support by the European Stability Mechanism (ESM) and the International Monetary Fund, led to further deterioration of the situation that escalated in March 2013 with the collapse of Laiki Bank and the decision of the Eurogroup on Bank of Cyprus recapitalization through creditors' participation.

These have resulted in a significant and immediate contraction of the banking sector in conjunction with the effects on wealth and disposable income of consumers having a detrimental effect on the real economy.

As a consequence the Cyprus Authorities submitted a request for financial support from the ESM. An agreement was reached with Programme Partners on a macroeconomic adjustment Programme (Memorandum of Understanding–MoU) that would address the challenges in key sectors of the economy. It is envisaged that this was catalytic in regaining consumer's and investor's confidence through inter alia return to macro-economic stability. The Programme is ambitious and aims at achieving 3,5-4% of GDP primary surplus by 2018. The adjustment Programme nears its completion and has been positively assessed in a series of seven reviews by the Programme Partners and the Eurogroup. The Government of the Republic of Cyprus is fully committed and determined to complete successfully the implementation of the Memorandum of Understanding. The Programme addresses challenges in three main areas, namely fiscal issues, financial and structural issues.

Since then, and despite the challenges the Cyprus economy was faced with, the signs of correction are evident and performance has exceeded expectations. The recession in 2013 was contained to -5,9% (significantly lower than the original forecast of -8,7%). Similarly, in 2014 the Cyprus economy recorded a contraction of -2,5% versus a contraction of -3,9% that constituted the original forecast. The better than expected performance of the economy is a result of the resilience of key productive sectors such as business services, tourism and shipping. But it is also a result of the implementation of ambitious policy reforms and consolidation of the economy and the public sector resulting to a gradual restoration of confidence and improved credibility to the Cyprus economy.

The negative growth in 2014 was due to both domestic demand, especially gross fixed capital formation and government consumption, and the external sector. Gross fixed capital formation exhibited negative growth, as a result of the negative growth of investment in construction, machinery and transport equipment as well.

Private consumption increased by 0,6%, in real terms in 2014, following a decrease of 5,9% in 2013. Gross fixed capital formation exhibited a decrease of 18%, in real terms in 2014, following a decrease of 15,2% in 2013. The overall negative performance of investment activity is a result of the continued correction in the construction sector.

The external demand for goods and services exhibited decrease and the rate of decrease of exports of goods and services fluctuated at around 0,5%, in real terms in 2014, as compared to an increase of 1,8% in 2013. Imports of goods and services increased by 2% in real terms in 2014, as compared to a decrease of 3% in 2013.

Tourism exhibited a small increase during 2014. Specifically, tourism arrivals recorded a moderate increase of 1,5% compared to a decrease of 2,4% in 2013. Receipts from tourism decreased by 2,8% during 2014, following an increase of 8% in 2013.

From the supply side, besides water supply only in the tertiary sector some sectors exhibited positive growth. Positive performance was recorded in wholesale and retail trade, accommodation and food service activities, professional scientific and technical activities, human health and social work activities, arts entertainment and recreation and other service activities.

Labour market conditions showed signs of stabilization, with unemployment rate slightly increasing to around 16,1% of the labour force in 2014 after 15,9% in 2013. Employment decreased by 1,9% following a decrease of 5,2% in 2013.

Compensation per employee in 2014 declined by around 4% compared to 2013, contributing to a decline of nominal unit labour costs and improving cost competitiveness further. The observed wage adjustment is expected to help containing the upward pressure on unemployment. Labour productivity in Cyprus decreased marginally in 2014 by 0,6%, compared to a 0,7% decrease in 2013.

Inflation rate, as measured by the Harmonized Index of Consumer Prices (HICP), was negative during 2014, falling to -0,3% compared to a positive inflation rate of 0,4% during 2013. The negative growth rate of the HICP is mainly attributed to decreases in the price of food and non-alcoholic beverages, housing, water, electricity and gas, furnishings, household equipment and supplies, health, recreation and culture and education.

The Current Account deficit stood at 4,6% of GDP in 2014, as compared to 4,5% in 2013.

In terms of public finances, fiscal targets were achieved with considerable margins mainly due to prudent budget execution and better economic environment. As a result of fiscal consolidation measures, the fiscal deficit in 2013 was limited to 4,9%, compared to 8,3% which was the initial target. These positive developments continued in 2014, with significant overlap of objectives both in terms of nominal balance, and in terms of primary balance (achieving objectives including the correction of the excessive deficit two years earlier).

The fiscal balance was in deficit of around 8,9%¹ of GDP in 2014 and the public debt stood at around 108,2% of GDP, as compared to 4,9% and 102,5% of GDP respectively in 2013.

The main characteristic of monetary developments during 2014 was the continued deceleration of the rate of growth of credit to domestic residents until October 2014, registering an average decrease of 4% in 2014, as compared to a decrease of 1,4% in 2013.

Summarizing, the Cyprus economy in 2014 exhibited a moderate recession, due to both domestic and external demand. The rate of economic growth fluctuated at -2,5% in real terms in 2014. The unemployment rate was 16,1% in 2014. The rate of inflation fluctuated at -0,3% in 2014. The fiscal balance recorded a deficit of 8,9% and the Current Account deficit stood at 4,6% in 2014.

A. ECONOMY AND FINANCE

A.1. National Accounts

SCOPE

This section presents data on gross domestic product by activity, gross national product by type of expenditure, national income, per capita gross national product and consumption expenditure, and gross fixed capital formation by activity and type.

COVERAGE

For the period prior to mid-1974 the data presented refer to the whole of Cyprus while after mid-1974 the data relate to the Government controlled area only.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

National accounts estimates are compiled by the Statistical Service since 1955 on the basis of the various sectoral surveys and other secondary sources. Monetary and Financial data are provided by the Central Bank of Cyprus and the Ministry of Finance. Revisions are usually made as new and final data for previous years become available.

CLASSIFICATION SYSTEM USED

For the years prior to 1976 national accounts were based on the 1958 U.N. System of National Accounts (SNA). As from 1983 the new 1968 SNA has been introduced. On the basis of this system the national accounts have been recompiled backwards as far as 1976. In order to ensure continuity of the data compiled in the previous years using the 1958 SNA, certain basic data such as gross domestic product, gross national product, private final consumption expenditure and gross fixed capital formation, have been recompiled on the basis of the new 1968 SNA. From 1995 onwards the data presented is based on the concepts and methodology of the European System of National Accounts (ESA2010) and the European System of Classification of Economic Activities (NACE Rev. 2.).

DEFINITIONS OF TERMS USED

Gross Domestic Product (GDP) is the value of gross output of the country produced during a calendar year, minus intermediate consumption i.e. the value of raw materials, fuels and services rendered by others used in the production process. It represents value added generated by the sectors producing goods and services within the country. Valuation of GDP is at market prices, including import duties and other indirect taxes but excluding subsidies. Import duties are shown as a separate item at the end of the distribution of value added by activity because their allocation by sector is not possible.

Financial Intermediation Services Indirectly Measured (FISIM) is taken to be the surplus of the income generated indirectly for the financial institutions from their financial intermediation activity, which is the granting of loans and the holding of deposits. GDP is presented after the allocation of FISIM to the sectors of the economy, according to the requirements of relevant E.U. regulation. As a result, the use of FISIM is no longer recorded entirely as intermediate consumption, but also as final consumption, exports and imports.

Gross National Income (GNI) at market prices. It is equal to GDP at market prices plus net factor income from abroad. GDP is also equal to the sum of private and government final consumption

expenditure, gross fixed capital formation, exports minus imports of goods and services and increase in stocks.

Government final consumption expenditure. It is taken to be equal to the value of goods and services produced by general government for its own use. It comprises (a) intermediate consumption, (b) compensation of employees, (c) consumption of fixed capital and (d) payments of indirect taxes (if any) less sales of goods and services to other non-government bodies (private enterprises, households).

Private final consumption expenditure. It represents the value of goods and services consumed by resident households and private non-profit institutions serving households, within or outside the country.

(a) Resident households: Final consumption of resident households includes outlays on non-durable and durable goods and services, except for houses, less sales of second-hand goods. In addition to market purchases, household final consumption includes imputed gross rent of owner-occupied dwellings and food and other items produced for own use. Expenditure of foreign tourists, foreign diplomatic and military personnel in the domestic market are excluded from this category; they are included in exports of goods and services.

(b) Private non-profit institutions serving households: Final consumption expenditure of these units, as in the case of government, is equal to the services they produce for their own use. It comprises purchases and value of transfers received, to be used in production, compensation of employees, consumption of fixed capital and indirect taxes paid, less their sales of goods and services.

Gross Domestic Fixed Capital Formation. It consists of the outlays of public and private sectors for investment in fixed assets (excluding stocks), minus the net sales of similar second-hand or scrapped capital goods.

Stocks. They consist of materials and supplies, work-in-progress and finished products and goods held by the enterprises. Changes in stocks is the difference in stocks at average purchaser prices at the beginning and end of the calendar year.

Exports of goods and services. They represent the value of goods and services sold to the rest of the world. It comprises merchandise, valued at f.o.b. prices, transportation services, insurance and other non-factor services. Factor income from abroad is not included.

Imports of goods and services. They represent the value of goods and services purchased from abroad, at f.o.b. prices, excluding factor payments abroad.

National income. It is equal to Gross National Income (GNI) at market prices minus consumption of fixed capital.

Net factor income from the rest of the world. It consists of the earnings of Cypriot residents employed temporarily abroad, including those working in the British Sovereign Base Areas and NAAFI, plus investment income from abroad such as rents, interest, dividends and profits of Cypriot enterprises, government and other organizations, minus similar factor income payments abroad.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

More information on national accounts appears in the annual report “National Accounts” and in pocket books published on ad-hoc basis by the Statistical Service. The “National Accounts” report is issued annually since 1954 (from 1954 to 1962 it was entitled “Economic Review” and from 1963 to 2002 it was entitled “Economic Report”).

Gross Domestic Product at factor cost		100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0

Definitions of terms used:

1. Wages, salaries and other benefits of employees: comprise the gross wages and salaries, 13th and 14th salaries, overtime pay, employers' contributions to social security funds, the value of payment
2. Imputed wages, salaries and other benefits of working proprietors and unpaid family workers: refer to the estimated labour cost of working proprietors and family workers not receiving a fixed pay
3. Depreciation: this is the loss in value of capital assets (machinery, buildings, transport equipment, etc) used up in the production process.
4. Gross operating surplus: this is the remaining value added after deducting all the above categories of income and comprises imputed on own capital, profits and other entrepreneurial income.

A. ECONOMY AND FINANCE

A.2. Public Finance

SCOPE

This section provides summarised information on Government Finance Statistics.

COVERAGE

The data presented cover the period 2000-2014.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The main sources of information for the data on public revenue and expenditure are the Financial Report published by the National Treasury of the Republic of Cyprus, the final audited accounts of local authorities (municipalities, community boards), the final accounts of the Social Security Funds and the final accounts of semi-government organizations classified within the sector of General Government (Cyprus Sports Organisation; Cyprus Theatre Organisation; Cyprus Tourism Organisation; University of Cyprus; Cyprus University of Technology; Open University of Cyprus; school committees; Cyprus News Agency; Investment Promotion Agency; Research Promotion Foundation; Cyprus Cultural Foundation; Bank of Cyprus Oncology Centre; Cyprus Agricultural Payments Organisation; Cyprus Broadcasting Corporation; Youth Foundation; Symphony Orchestra Foundation; Cyprus Anti-Drugs Council; Cyprus Standards Organisation; Central Agency for Equal Distribution of Burdens; Cyprus Organisation for Storage and Management of Oil Stocks; Cyprus Petroleum Storage Company; Agricultural Insurance Organisation).

CLASSIFICATION SYSTEM USED

The classification for the presentation of public finances is based on the European System of Accounts 2010 (ESA 2010).

A. ECONOMY AND FINANCE

A.3. Balance of Payments

SCOPE

This section presents data on the balance of payments, which reflects transactions in goods and services, flows of income, current transfers, and capital and financial transactions between residents of Cyprus and residents of other countries.

COVERAGE

The data refer to balance of payments transactions of residents in the government-controlled area only, given the Turkish invasion and occupation of part of Cyprus in July/August 1974.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented are compiled by the Central Bank of Cyprus since its establishment in 1962. Prior to 1962 similar data were presented in the Economic Review published by the Department of Statistics and Research.

CLASSIFICATION SYSTEM USED

As of 1995, balance of payments statistics are being produced on the basis of the fifth edition of the Balance of Payments Manual of the International Monetary Fund (BPM5). Furthermore, since 2002, the BPM5 definition of residency has been adopted (for data concerning 1995 onwards only). In accordance with the new definition, natural persons are considered to be residents when they reside (or intend to reside) for more than a year in a country, while legal entities are considered to be residents of a country when they have a physical presence in that country (i.e., operating through own premises such as own office).

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For additional information on balance of payments statistics, reference may be made to the webpage of the Central Bank of Cyprus ([www. Centralbank.gov.cy](http://www.Centralbank.gov.cy)) and to its Annual Report.

A. ECONOMY AND FINANCE

A.4. Money and Banking

SCOPE

This section provides data on deposits and loans of non-MFIs held with MFIs of Domestic Residents, Other Euro Area Residents and Residents of rest of the world, foreign exchange rates and interest rates on euro-denominated deposits and euro-denominated loans, by euro area residents.

COVERAGE

The data shown for the years 1960 up to mid-1974 cover the whole Cyprus, while after mid-1974 they refer to the Government controlled areas only.

SOURCE OF DATA AND CHRONOLOGY OF SERIES

The data presented in this section pertaining to the Banking Sector are compiled by the Central Bank of Cyprus. Most of the data on co-operative societies were obtained from the Co-operative Societies Supervision and Development Authority.

CLASSIFICATION SYSTEM USED

The data on Banking are classified according to the International Monetary Fund methodology for Monetary and Financial Statistics.

DEFINITIONS OF TERMS USED

MFIs (Monetary Financial Institutions) are central banks, resident credit institutions and other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entries other than MFIs and, for their own account (at least in economic terms), to grant credits and/or make investment in securities.

OTHER RELEVANT PUBLICATIONS OR SOURCES OF INFORMATION

Further information relating to money and banking may be obtained from the monthly Monetary and Financial Statistics of the Central Bank of Cyprus and its annual report. The annual report of the Co-operative Societies Supervision and Development Authority provides detailed data for co-operative societies.

TABLE A.4.1. DEPOSITS OF NON-MFIs HELD WITH MFIs, 2005-2014

(€mn)

Category of Deposits	2005	2009	2010	2011	2012	2013	2014

	July	0,22	1,66	2,12	0,89	1,54	0,23	1,72
	August	0,21	1,59	2,12	0,84	1,48	0,21	1,56

Notes: - The data refer to interest rates applied by MFIs to deposits denominated in euro vis-à-vis households and non-financial corporations resident in the euro area member states.

1. MFI sector excluding the CBC.

2. Including non-profit institutions serving households.

3. For this instrument category, new business and outstanding amounts coincide i.e. they refer to end-of-period.

4. For this instrument category, households and non-financial corporations are merged and allocated to the household sector, since the outstanding amounts of non-financial corporations are negligible compared with those of the household sector.

TABLE A.4.4b. INTEREST RATES¹ (Loans), 2013-2015

Year / Month	Loans to households ²						Loans to non-financial corporations		
	Consumer credit			Lending for house purchase		Other lending	Bank over-drafts ³	Other loans up to EUR 1 million	Other loans over EUR 1 million

Notes: - Data for 1974 onwards refer to the Government controlled areas only, including Societies which were displaced by the Turkish invading forces. Some of them are inactive.

1. In order to avoid double counting this number includes members who are registered with more than one co-operative societies only once.
2. Number decreased due to mergers.

A. ECONOMY AND FINANCE
A.5. Consumer Price Index
A.6. Harmonised Consumer Price Index

SCOPE

This section provides basic data on prices, covering consumer price index, cost of living allowance and harmonised consumer price index.

COVERAGE

As from mid-1974 onwards all data refer to the Government controlled area of the country. For previous years data extend to the whole country.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The first retail price index was initiated in August 1939 and was known as the Cost of Living Index. In 1950, this index was replaced by the present Consumer Price Index. It has been reweighted and rebased several times, namely in 1957, 1967, 1973, 1976/77, 1981, 1986, 1992, 1998, 2005 and 2010. The Cost of Living Allowance was first introduced in July 1941. This was known as war bonus and initially was granted to civil servants only. As from 1950, the war bonus was replaced by the present cost of living allowance which gradually was expanded to cover nearly all employees and workers. The weights and selected items in the retail price index are derived from household expenditure surveys which are conducted about every five years, the first systematic one was in 1966. Details on the breakdown of the retail price index are available as from 1950.

The Harmonised Consumer Price Index is compiled by all Member States of the EU under common methodology and regulations for achieving a comparable index of consumer prices. The methodology of the computation of the index is similar to that of the national Consumer Price Index. In addition, for the computation of the weights the Harmonised Consumer Price Index takes into account the expenditure of tourists in Cyprus while the national Consumer Price Index is based only on the expenditure of households residing in Cyprus.

CLASSIFICATION SYSTEMS USED

The present Consumer Price Index is classified in the following main groups: Food, and non-alcoholic beverages, Alcoholic beverages and tobacco, Clothing and footwear, Housing, water, electricity and gas, Furnishings, household equipment and supplies, Health, Transport, Communication, Recreation and culture, Education, Restaurants and hotels and Miscellaneous goods and services. The scheme adopted for classifying the consumption expenditure for the derivation of the weights according to major groups and sub-groups of the index is basically the COICOP classification of household final consumption expenditure.

DEFINITIONS USED

Retail Prices refer to the actual prices paid by consumers.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

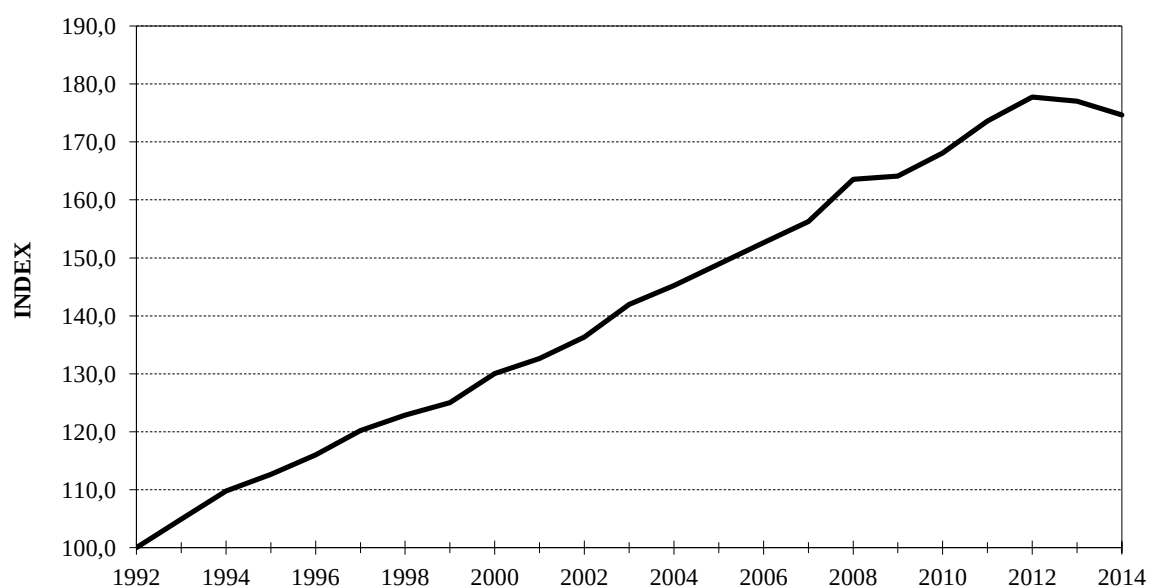

For additional data, reference may be made to the Methodology of the Consumer Price Index and the Monthly Economic Indicators published by the Statistical Service. Information on the Consumer Price Index is also available in the official Web site of the Statistical Service in the annual Labour Statistics report and the Official Government Gazette.

B. POPULATION AND SOCIAL CONDITIONS

B.1. Census years

B.2. Population

B.3. Demography

SCOPE

This section provides population estimates, vital and demographic statistics and rates which relate to births, deaths, marriages, divorces and migration.

COVERAGE

The data presented in this section are in three parts. The first part (Tables B.1.1 – B.1.6) refers to census years covering the whole population of the country until 1974 and the Government controlled area after 1974. The second part (Tables B.2.1 – B.2.5) presents population figures with reference to the Government controlled area only. The third part (Tables B.3.1 – B.3.10) gives demographic indicators of fertility, mortality, nuptiality, divorces and migration in the Government controlled area.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

Population estimates are based on census figures which are updated annually to take account of the components of change, births, deaths and net migration. Censuses had been carried out since 1881 at decennial intervals up to 1931 and then in 1946, 1960, 1973, 1976, 1982, 1992, 2001 and 2011. The last five censuses (the Census of Households in 1976, the Census of Housing of 1982 and the Census of Population of 1992, 2001 and 2011) were conducted in the Government controlled area. Population estimates for the period 1993-2000 have been revised on the basis of the results of the Census of Population 2001 and for the period 2002-2011 on the basis of the results of the Census of Population 2011.

Births and Deaths. Statistics of births are based on registered events. Statistics of deaths up to 2004 were based on two sources of data, registrations of deaths and monthly reports by priests. Estimates were obtained through matching of individual events using the Chandrasekar - Deming method. As from 2005 death registration is almost complete, and no additional estimation is required.

Marriages and Divorces. Information relating to marriages is extracted from the Registers of the six ecclesiastical districts of the Cyprus Orthodox Church and of the Armenian, Maronite and Catholic churches. For civil marriages data are supplied by the Ministry of Interior. Data on divorces were obtained from the Ecclesiastical Courts of the Cyprus Orthodox Church up to 1991, the Supreme Court up to 1998 and District Courts up to 2000. Since 1991 data on divorces are obtained from Family Courts.

DEFINITIONS OF TERMS USED

De jure population comprises all the persons who have their usual residence in Cyprus. This concept was used in censuses and population estimates after 1960.

De facto population comprises all the persons who were actually present in the country at a given time. This concept had been applied during all population censuses up to 1960.

Urban population comprises all persons living in urbanized areas. In Cyprus there are six urban areas comprising the capitals of the six administrative districts. Up to 1960 only the urban area of Lefkosia included municipality and suburbs. In 1973 Lemesos suburbs were added to the Lemesos urban area. In the 1982 Housing Census, the urban population, in the Government controlled area covered in addition to

the towns proper and suburbs the greater urban areas. As from 1989 the urban areas comprise the areas covered by the Local Town Plans as follows:

- Lefkosia:** the municipalities of Lefkosia, Agios Dometios, Egkomi, Strovolos, Aglantzia, Lakatameia, Latsia and Geri and the community of Synoikismos Anthoupolis.
- Larnaka:** the municipalities of Larnaka, Aradippou, Livadia Larnakas and Dromolaxia-Meneou.
- Lemesos:** the municipalities of Lemesos, Kato Polemidia, Mesa Geitonia, Agios Athanasios, Germasogeia and Ypsonas and the community of Pano Polemidia.
- Pafos:** the municipalities of Pafos and Geroskipou, and the communities of Chlorakas, Agia Marinouda, Acheleia, Konia, Empa, Lempa, Kissonerga, Tala, Tremithousa, Mesogi and Mesa Chorio.

Crude birth, death, marriage or divorce rate is the number of births, deaths, marriages or divorces per thousand population.

Sex ratio at birth gives the number of male births per thousand female births.

General fertility rate is the number of births per thousand women in the reproductive age-groups, 15-49.

Age specific fertility rate is the number of births occurring to women of a given age-group during a year divided by the total number of women in that age-group.

Total fertility rate gives the number of children a woman would have if she experienced the age specific fertility rates of a given year and she lived until the end of her reproductive life i.e. until her 50th birthday.

Gross reproduction rate shows the number of daughters a woman would have if she experienced the age specific fertility rates of a given year and she lived until the end of her reproductive life.

Net reproduction rate shows the number of daughters a woman would have if she experienced the fertility and mortality of a given period.

Life expectancy at birth indicates the number of years a newborn baby is expected to live if mortality in the various age-groups remains at the level of the period on which the life expectancy was computed.

Infant mortality rate is the number of deaths under one year old per thousand live births.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

Relevant publications for population and demographic data are the Census reports and the annual Demographic Reports published since 1963, preceded by the "Vital and Migration Statistics" issued annually during the period 1955-1962. Additional information may be found in the "Demographic Survey 1980/81", "Demographic Trends in Cyprus", "Mortality in Cyprus" and other research papers and reports issued from time to time by the Statistical Service.

TABLE B.1.1. POPULATION, CENSUS YEARS

Census Date	Population			Numerical Increase			Annual Rate of Growth (%)
	Total	Males	Females	Total	Males	Females	Total
1881, 4th April	186.173	95.015	91.158				
1891, 6th April	209.286	106.838	102.448	23.113	11.823	11.290	1,2

1921, 24th April	310.715	155.965	154.750	36.607	16.582	20.025	1,3
1931, 27th April	347.959	172.754	175.205	37.244	16.789	20.455	1,1
1946, 10th November	450.114	222.510	227.604	102.155	49.756	52.399	1,7
1960, 11th December	573.566	281.983	291.583	123.452	59.473	63.979	1,7
1973, 1st April	631.778	312.566	319.212	58.212	30.583	27.629	0,8
1976, 30th September ¹	497.879	248.711	249.168				
1982, 1st October ¹	522.845	259.938	262.907	24.966	11.227	13.739	0,8
1992, 1st October ¹	615.013	306.383	308.630	92.168	46.445	45.723	1,6
2001, 1st October ¹	703.529	345.322	358.207	88.516	38.939	49.577	1,5
2011, 1st October ¹	856.960	416.834	440.126	153.431	71.512	81.919	2,0

Notes: - Up to 1960 the data refer to the de facto population, but thereafter to the de jure.

- The annual rate of growth of population is based on the formula $P_t = P_o (1+r)^t$ where

P_o is the population at the beginning of the period, t is the period of time in years,

r is the average annual rate of increase and P_t is the population at the end of the period.

1. Censuses after 1974 refer to the Government controlled area. Figures have been adjusted for underenumeration as well as to include certain population groups not covered by the census.

2012	24	146	419	485	247	62	9	1,39	0,67	0,66	43,15
2013	17	129	378	471	235	55	10	1,30	0,64	0,64	40,36
2014	17	123	374	492	238	59	10	1,31	0,63	0,63	41,10

Notes: - Rates are based on average population estimates and on the female population aged 15-49 years.
- As from 1993 the TFR is calculated as a summation of the age specific fertility rate of each single age (and not of the 5-year age groups).

TABLE B.3.3. LIVE BIRTHS BY BIRTH ORDER AND MEAN AGE OF MOTHER AT CHILD BIRTH, 1974-2014

Year	Live birth order												Mean age at birth of first child	Mean age at birth of any child

2000	5.355	2.846	2.509	7,7	8,3	7,1	1.134	7,0
2001	4.827	2.565	2.262	6,9	7,4	6,3	1.134	
2002	5.168	2.752	2.416	7,3	7,9	6,7	1.139	
2003	5.200	2.764	2.436	7,2	7,8	6,7	1.135	6,0
2004	5.225	2.825	2.400	7,2	7,9	6,5	1.177	
2005	5.425	2.835	2.590	7,3	7,8	6,9	1.095	
2006	5.127	2.623	2.504	6,8	7,1	6,5	1.048	5,6
2007	5.380	2.813	2.567	7,0	7,5	6,6	1.096	
2008	5.194	2.740	2.454	6,6	7,1	6,1	1.117	
2009	5.182	2.780	2.402	6,4	7,0	5,8	1.157	5,6
2010	5.103	2.732	2.371	6,2	6,8	5,6	1.152	
2011	5.504	2.828	2.676	6,5	6,8	6,1	1.057	
2012	5.665	2.983	2.682	6,6	7,1	6,0	1.112	5,6
2013	5.141	2.798	2.343	6,0	6,7	5,3	1.194	
2014	5.250	2.739	2.511	6,2	6,6	5,7	1.091	

Note: Up to the year 2012, the number of deaths includes residents who died abroad but were buried in Cyprus and non residents who died in Cyprus. As from 2013, the number includes the deaths of the usually resident population of Cyprus only.

TABLE B.3.5. LIFE EXPECTANCY AT BIRTH FOR MALES AND FEMALES, 2002-2014

Period	Males	Females
2002	76,3	81,0
2003	76,7	81,1
2004	76,4	81,7
2005	76,4	80,7
2006	77,6	82,4
2007	77,5	82,0
2008	78,0	82,8
2009	78,3	83,3
2010	79,0	83,7
2011	79,3	83,0
2012	78,8	83,2
2013	80,0	84,8
2014	80,7	84,5

Notes: - Figures, as from 1982, include also marriages among the Catholic Church.
- Since 1990 Family Courts have been established.
- Marriages of residents of Cyprus are shown in parentheses. The ecclesiastical marriages of residents may include a small number of marriages of non-residents which could not be disaggregated.

TABLE B.3.8. MEAN AGE AT MARRIAGE BY TYPE OF MARRIAGE, 1974-2014

Notes: - Mean age at marriage was computed from the formula: $x = (\sum Fx / \sum F)$.

- As from 2004, calculations are based on marriages of residents only.

B. POPULATION AND SOCIAL CONDITIONS

B.4. Crime

SCOPE

This section presents data on crimes and offences committed, persons proceeded against and convicted, juvenile delinquency and prison statistics.

COVERAGE

The data presented as of mid-1974 refer to the Government controlled area only, while for previous years these extend to the country as a whole.

Offences reported to the Police refer to serious offences only. The rest of the analysis relates to all offences both serious and minor.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The statistics presented are based on data from three sources: the Police, the Courts and the Prison.

The series on offences reported to the Police was initiated in 1976 and is based on individual returns of serious offences known to the Police during a year. Data is presented relating to persons involved in the commission of offences (adults and juveniles) and these refer to the year in which the offence was reported to the Police.

Court statistics are based on annual returns of criminal proceedings submitted at the end of the year by the District Courts, Assize Courts and Martial Courts. These refer to occasions on which proceedings against a person are completed. They may be prosecuted and convicted of offences committed in the year in question or in a previous year. Some of the data presented for adults date back to 1950.

The series on juvenile delinquency begins in 1978 when a new procedure for dealing with juveniles was introduced. It refers to juveniles involved in the commission of offences, irrespective of whether they are proceeded against.

Prison statistics are presented as of 1950 and relate to convicted prisoners (penal offenders and other).

CLASSIFICATION SYSTEMS USED

Two classifications of offences are used. The first divides offences into two broad categories of "serious" and "minor" according to gravity and is the one used by the Police. The second classifies all offences into eleven groups, following to a large extent the division of the Criminal Code into parts. New groups have been formed for offences not included in the Criminal Code and which could not be incorporated in the other groups. Furthermore, some offences which are thought to be of a particular criminological interest are shown as a separate group.

DEFINITIONS OF TERMS USED

Juvenile refers to a child or young person who is criminally responsible according to the Criminal Code and the Juvenile Offenders Law and may be between 14 and 15 years old, both limits included,

(Amendment Law 18(I)/2006). It should be noted that a person under the age of 14 is not criminally responsible for an act or an omission.

Adult refers to a person aged 16 years and over.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

A general review of the crime trend with a brief analysis of adult and juvenile offenders as well as further information on criminal, judicial and prison statistics can be found in the report “Criminal Statistics” published annually by the Statistical Service since 1974.

TABLE B.4.1. SERIOUS OFFENCES¹ REPORTED TO THE POLICE, 1976-2014
(Police Statistics)

Life sentence	0	0	6	1	0	0	2	2	1	2	3
Death sentence ²	1	0	0	0	0	0	0	0	0	0	0
Bound over or otherwise dealt with	1.831	1.467	2.064	2.401	1.180	1.251	397	1.345	1.242	878	1.222
TOTAL	50.614	45.666	77.302	105.437	103.988	69.416	59.889	75.693	71.545	60.819	68.708

Notes: 1. Lambousa School which was non-operational as a result of the Turkish invasion and the occupation of its premises in Lapithos, became operational in 1979 after the construction of new premises in the Government controlled area. Its operation was suspended in early 1986.
2. The death sentence subsequently changed to life imprisonment.
3. The data refer to the persons against whom criminal proceedings were completed.
They may be convicted of offences committed in the year in question or in a previous year.

2012	128.445	70.970	1.192	67.122	2.656
2013	103.796	60.371	1.036	57.101	2.234
2014	125.491	68.433	849	65.364	2.220

Notes: - Data for the year 1974 from Keryneia, Ammochostos and Morfou, which were lost because of the Turkish invasion, are excluded.

- Based on data submitted by the Assize and District Courts of Lefkosa, Lemesos, Larnaka and Pafos.

1. The data refer to persons against whom criminal proceedings are completed.

They may be convicted of offences committed in the year in question or in a previous year.

2. The sentence of imprisonment includes death sentence and excludes suspended imprisonment.

CHART B.2. ADULTS PROCEEDED AGAINST AND CONVICTED, 1964-2014

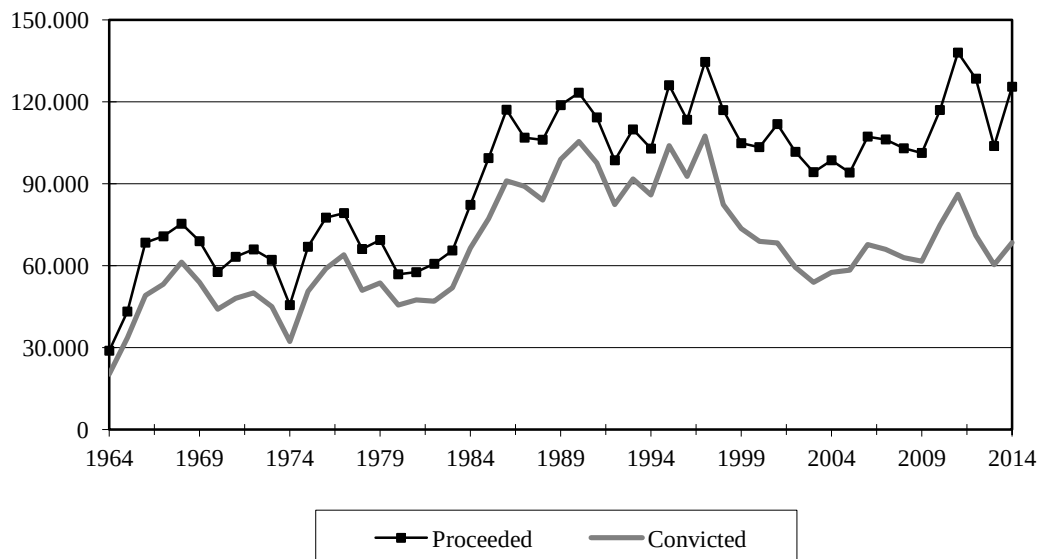

TABLE B.4.7. ADULTS PROCEEDED AGAINST BY OFFENCE GROUP, 1975-2014
(Judicial Statistics: Summary and Assize Courts)

Note: 1. Up to the year 2005 inclusive, this category referred to the age group 16-20. As of 2006, it refers to the age group 19-20.

B. POPULATION AND SOCIAL CONDITIONS

B.5. Education

SCOPE

This section presents statistics pertaining to education, mainly on the number of institutions, teachers, enrolments, finance of education and on students studying abroad.

COVERAGE

All data presented refer to Public and Private Schools.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

Data on enrolments are derived from the annual survey on education conducted by the Statistical Service as from the school year 1963/64. Prior to this, the relevant data are from the annual reports on education prepared by the Greek Communal Chamber.

Data on the finance of education extend as from 1965, the year the series was initiated.

Data on Cypriot students abroad are based on surveys carried out for the academic years 1970/71, 1974/75 to 1979/80 and 1981/82, thereafter until 1999/2000 the data are based on students' individual records kept by the Ministry of Education for administering foreign exchange remittances for studies abroad. From the academic year 2000/2001 until 2010/2011 the data have been extracted from the applications of students for grants as submitted to the Ministry of Finance and approved. As from the academic year 2011/2012 and onwards this database is incomplete for the purposes of the Statistics of Education. From this academic year onwards the data on Cypriot students studying abroad are extracted from the EUROSTAT database (Education Statistics data collection). Therefore, there is a break in the series and the data from 2011 onwards are not comparable with the previous years.

CLASSIFICATION SYSTEMS USED

The levels and fields of education adopted in this report are based on the UNESCO International Standard Classification of Education (ISCED).

DEFINITIONS OF TERMS USED

Pre-school and pre-primary refers to the initial stage of organised instruction that precedes primary education. It introduces pre-school children to a school-type environment providing education and/or day care. As from the school year 2004/05 the participation in pre-primary education is compulsory.

Primary refers to the level of compulsory education after pre-primary, providing universal basic education for six years.

Secondary refers to education at the second level providing 3 years of compulsory general education and a further 3 years specialization in the Lyceums of Optional Subjects (LEM), the Technical/Vocational Schools and as from the school year 1995/96 in the Unified Lyceum.

Post-Secondary Non-Tertiary refers to vocationally oriented education of 1 or 2 years duration. In Cyprus these programs were launched for the first time, the year 2012/2013.

Tertiary refers to higher education, awarding University level degrees (e.g. Bachelor, Master, PhD) as well as Non-University level degrees (e.g. Certificate, Diploma, Higher Diploma).

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For more detailed or additional data on education reference may be made to the annual report Statistics of Education published by the Statistical Service. Other information such as administrative policies, educational structure and curriculum development may also be obtained from the Ministry of Education.

Notes: 1. Special education is included.
2. In Cyprus and abroad.
3. Concerns expenditure for non formal education and for education of Cypriot communities abroad.
Before 2001 these expenses were allocated between the different levels of education.

Notes: 1. It includes the tuition fees of the Cypriot students abroad and payments for dormitories.

2. It includes expenditure of Cypriot students abroad to educational Institutions abroad for the tuition fees and for dormitories, as well as expenditure for school books, stationery and expenditure for tutoring.

B. POPULATION AND SOCIAL CONDITIONS

B.6. Health

SCOPE

This section provides basic information on medical services offered by the public sector and on the general level of health and morbidity. Data are also provided on health expenditure, in-patients (discharges), surgical operations, out-patient attendances, bed occupancy rates, various health indicators and information on medical, nursing and paramedical personnel.

COVERAGE

The data presented are confined to the Public Health Services, due to lack of data on the Private Sector. For the Private Sector data are available only on the number of doctors, dentists, clinics and beds. As from mid-1974 onwards all data refer to the Government controlled area of the country. For previous years data extend to the whole country.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

Statistical data are collected from all public medical institutions, either in paper or electronic form. Special statistical forms are distributed to these institutions and after completion they are forwarded to the Statistical Service for compilation, tabulation and analysis of data.

Prior to 1980 data were available only in aggregate form. Detailed data are available only after 1980.

CLASSIFICATION SYSTEMS USED

The International Classification of the World Health Organization is used for the coding of diseases and surgical operations.

Data on the diagnosis are coded according to the International Statistical Classification and Related Health Problems of the World Health Organization (Tenth Revision) at the three character categories. Statistics are tabulated according to the 21 chapters and the tabulation list for morbidity (298 diseases).

Up to 2010, surgical operations were coded according to the International Classification of Procedures in Medicine (Volume I) Surgical Procedures of the World Health Organization. From 2013 onwards, the surgical operations are coded according to the International Classification of Diseases (Ninth Revision) Clinical Modification.

DEFINITIONS OF TERMS USED

In-patient is a person who has gone through the full admission procedure in a hospital and has remained at the hospital for treatment for at least one night or has been discharged at the same day. Up to 2010, an infant born in hospital was not counted as a separate in-patient, unless treated as a “Special Care Baby”. From 2011 onwards, such cases are considered as in-patients only for Ammochostos General Hospital.

Discharge is the conclusion of a period of in-patient care, irrespective of whether the patient returned home, was sent to another hospital, left or taken against medical advice or died.

Surgical operation is any therapeutic or major diagnostic procedure which involves the use of instruments or the manipulation of part of the body and generally takes place under operating theatre conditions.

Out-patient attendance is the visit of a patient to an out-patient department.

The Bed occupancy rate represents patient days in a given year expressed as a percentage of the total patient days which would have been obtained assuming that all beds were occupied during the given year.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

For more detailed or additional information on health statistics reference may be made to the annual report Health and Hospital Statistics (prior to 1984 there were two reports entitled Health Statistics and Hospital Statistics), the Census of Doctors, Dentists and Clinics, 2000, published by the Statistical Service, as well as the annual reports of the Department of Medical and Public Health Services.

A household health survey was conducted in late 1989 and provided information on the general health status of the population on the prevalence of certain diseases, the utilization of the health services of both the private and public sector and the expenditure of households on health services. The results of the 1989 Health Survey were published in separate reports as follows: Health Survey, 1989; Health Status, Utilization and Expenditure on Health Services in Cyprus, 1989; Smoking in Cyprus 1989; Medicine Taking in Cyprus 1989, and Women, Employment and Health.

In the last quarter of 2003, another household health survey was conducted on a sample of 1.972 households. The purpose of the survey was to obtain information on the health status of the population, on long-standing illnesses and health problems, the use of health services from the public and private sector, smoking, alcohol consumption etc. The results are published in the report entitled Health Survey 2003.

In the last quarter of 2008, the latest household health survey was conducted on a sample of 2.957 households. It was the first survey conducted on a European scale with the use of a common questionnaire, leading to comparable results among European countries. The purpose of the survey was to study the health status of the population in Cyprus and the use of health services. In particular, the survey covered topics such as chronic health problems, physical and emotional status, use of health services, use of medications, prevention, diet and daily habits, i.e. smoking, alcohol consumption, physical activity etc. The results are published in the report entitled European Health Survey 2008.

The latest household health survey has been conducted during the last quarter of 2014. The survey covered a sample of 2.169 households in the urban and rural areas of Cyprus and was conducted according to the Commission Regulation (EU) No 141/2013 for the implementation of the Regulation (EC) No 1338/2008 of the European Parliament and the Council. The survey covered topics such as chronic health problems, physical and emotional status, use of health services, use of medications, prevention, diet and daily habits, i.e. smoking, alcohol consumption, physical activity etc.

Notes: 1. Beds of Dialysis Unit, Casualty, Thalassaemia and Angiographic Depts are excluded.

2. Estimated for the years 1960-2005.

3. As from 1990 General Laboratory personnel is included.

4. As from 2006, for the Mobile Dental Unit the number of children treated is calculated, not the number of treatments.

5. Estimation, not actual data

6. As from 2006 the attendances of maxillofacial and oral surgery are included, since they belong to the Medical Services.

7. As from 2006 the attendances of maxillofacial and oral surgery are not included, since they belong to the Medical Services and not the Dental Services.

		Not stated				1.053	1.042	890	1.285	300	10.518	11.900	31.029 ²	34.786 ²	17.713 ²	
		ALL DISEASE CATEGORIES	34.908	49.296	50.851	52.504	52.924	53.474	63.249	55.877	67.165	76.049	78.367	80.369	78.670	

Notes: 1 The disease category "Mental and behavioural disorders" has much smaller numbers compared to previous years because the data for psychiatric patients were not sent by all hospitals.

2. From 2011 onwards, the codification of the diagnosis has been performed from the hospitals exclusively, therefore the coverage is not complete and "not stated" is increased compared to previous years.

Notes: 1. Data refer to the number of therapies performed on out-patients. Due to a change in the method of count of therapies, the data are not comparable to previous years.

2. Includes Mobile Dental Units.

3. Includes Maxillofacial and Oral Surgery attendances from 1995 onwards.

4. From 2009, the outpatient attendances of the Old General Hospitals' Health Centers are included in Health Centres and not the General Hospitals.

B. POPULATION AND SOCIAL CONDITIONS

B.7. Welfare

SCOPE

This section presents statistics related to welfare. It provides data on beneficiaries of public assistance.

COVERAGE

Data on social welfare refer to the Government controlled area.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The principal source for data on social welfare is the Annual Report of the Department of Welfare Services. Comparable data on social welfare are available since 1980.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

Detailed information on Welfare is available in the Annual Report of the Ministry of Labour and Social Insurance. The Annual Report of the Department of Welfare Services provides detailed information on legislation, welfare benefits etc.

TABLE B.7.1. DISPLACED BENEFICIARIES OF PUBLIC ASSISTANCE BY NATURE OF DISTRESS, 1980-2014

(Number of cases)

- C.4. Earnings and Labour Cost**

SCOPE

This section provides data on the economically active population, the distribution of employment, government labour force, unemployment, placements, labour disputes and industrial accidents, indices of earnings in money and real terms and labour cost.

COVERAGE

The data presented in this report as from mid-1974 onwards refer only to the Government controlled areas. Data for previous years refer to the whole island.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented in this section were based on the Census of Population carried out in 1960, the Registration of all non-agricultural establishments conducted in 1967, 1972, 1976, 1981, 1985, 1989, 1995, 2000 and 2005 and the Employment Surveys carried out on a quarterly basis. Results for specific industries covered through other annual surveys such as the industrial production survey, the services survey and the trade survey were also utilized to arrive at the final estimate on employment in the respective industries. In addition the Labour Force Survey launched in the year 2000 is a basic source for recent labour data.

Registered Unemployment and vacancies filled are based on monthly returns from the District Labour Offices of the Ministry of Labour and Social Insurance. Labour disputes and industrial accidents are also taken from the Ministry of Labour and Social Insurance, every year.

For the years before 2010, statistics on wages, salaries and hours of work refer to October of each year and are based on an annual survey conducted by personal interviews. The data source from 2010 and subsequent years are the records of the Social Insurance Services.

CLASSIFICATION SYSTEMS USED

Establishments covered by the surveys and censuses were classified according to their major kind of economic activity, based on the principal category of goods produced or services rendered. The Statistical Classification of Economic Activities NACE Rev.2 has been used in classifying data in this report. Tables that refer to Gainfully Employed Population for the Production of G.D.P. by Industry, are also presented in previous classifications of economic activities, NACE Rev. 1.1 and ISIC (International Standard Industrial Classification of All Economic Activities).

Prior to 1976 all official published statistics on economic activities were classified according to the 1958 version of the ISIC.

Classification of occupations was based on the International Standard Classification of Occupations ISCO 1968 version for data up to 1991, and on the 1988 version of ISCO for 1992 and subsequent years.

DEFINITIONS USED

Economically Active Population. It is the total gainfully employed persons, the unemployed and the National Guard.

Labour Force. It is the total number of the employed and unemployed persons aged 15 years and over.

Employed. It refers to the persons aged 15 years and over who during the reference week worked for at least one hour, as well as persons who had a job but were temporarily absent from work.

Gainfully Employed. It refers to the number of persons who work in or for the establishment including working proprietors and working partners, unpaid family workers and persons on short-term or paid leave (such as sick leave, casual leave or paid vacation).

Government Labour Force. It is the number of persons employed by the Government excluding military personnel. It includes permanent and regular employees, casual administrative, clerical and technical employees (daily-paid and on contract), workers and craftsmen both regular and casual.

Unemployed. It refers to the persons aged 15 years and over who comply to the following standards: Neither worked nor had a job from which they were temporarily absent during the reference week, had actively sought for work, i.e. had taken specific steps during the previous 4 weeks to find work, were available to start work within the 2 weeks following the reference week and or, neither worked nor had a job from which they were temporarily absent, but found a job which will start within a period of at most 3 months and were available to start work within the 2 weeks following the reference week.

Registered Unemployment. Registered Unemployment is defined as the number of persons registered as unemployed and looking for work at the District Labour Offices on the last day of each month. It includes those persons who receive unemployment benefit from the Social Insurance Scheme as well as those not entitled to any benefit.

Vacancies. They refer to vacancies filled (placements) by the District Labour Offices.

Labour Force participation rate. It is the number of persons in the Labour Force for any group, expressed as a percentage of the total population in the same group.

Employment rate. It is the number of employed persons for any group expressed as a percentage of the total population in the same group.

Unemployment rate. It is the number of unemployed persons of any group expressed as a percentage of the labour force in the same group.

Earnings. They refer to the total gross weekly/monthly earnings (normal plus overtime earnings) for actual hours worked, including overtime.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For more detailed or additional data on the labour force by employment status and occupational or geographic breakdown, information can be obtained from the Registration of Establishments reports which are published every 4-5 years. Such reports were issued for 1967, 1972, 1976, 1981, 1985, 1989, 1995, 2000 and 2005. For more data on the Registered unemployed, vacancies notified and filled, government labour force, earnings and labour cost, information is published annually in the Labour Statistics Report. The annual report of the Ministry of Labour and Social Insurance provides detailed information on developments and legislation in the labour market. In addition, the Labour Force Survey Reports issued annually since 2000 provide a rich analysis of Labour Statistics.

1970	2.810	1.633	1.177	1,0
1974	27.069	18.243	8.826	10,0
Jan.-July	4.118	2.278	1.840	1,5
Aug.-Dec.	59.200	40.593	18.607	29,6
1975	33.543	23.721	9.822	16,9
1980	4.344	2.408	1.936	2,0
1985	8.302	4.614	3.688	3,3
1990	5.068	2.464	2.604	1,8
1995	7.870	3.557	4.313	2,6
2000	15.354	5.697	9.657	5,0
2005	19.492	9.048	10.445	5,3
2006	17.004	8.044	8.960	4,5
2007	15.428	7.348	8.080	3,9
2008	14.523	6.966	7.557	3,7
2009	21.704	11.387	10.316	5,4
2010	26.406	13.624	12.782	6,3
2011	33.951	18.302	15.649	7,9
2012	51.515	28.687	22.828	11,8
2013	68.871	37.622	31.249	15,9
2014	69.547	38.045	31.501	16,1

Notes: - Data refer to the registered unemployed except for the period August 1974-1976, for which figures on unemployment include persons registered at the District Labour Offices as well as unemployed persons not registered at these Offices. For other years unregistered unemployment was insignificant.

- Until 1999 the number of unemployed refers to the registered unemployed, whereas as of 2000 the source of the data is the Labour Force Survey.

2014	825,5	262,3	-2,7	-1,3

Notes: - The data source from 2010 onwards are the records of the Social Insurance Services. Before 2010, the data source was the Survey on Wages and Salaries. For the years 1960-65 data cover wage-earners only, whereas for the other years data cover both wage- and salary-earners.

- For the years before 2010, data refer to October of each year, whereas from 2010 they refer to the average of the year.

- Data in real terms refer to earnings in money terms deflated by the yearly average retail price index.

C. LABOUR
C.5. Social Insurance

SCOPE

This section presents statistics related to social insurance. It provides data on persons insured, insurance contributions, claims and payments, pensioners and pensions.

COVERAGE

Data on social insurance cover all contributions of the social insurance fund including Turkish Cypriots.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The principal source for data on Social Insurance is the Annual Report of the Ministry of Labour and Social Insurance.

The data on Social Insurance are available from 1957 when the Social Insurance Scheme came in operation.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

Detailed information on Social Insurance is available from the annual Report of the Ministry of Labour and Social Insurance.

Notes: - Claims for maternity benefits, marriage and funeral grants were discontinued from 17.3.1975 to 2.1.1977 and for unemployment benefits from 17.3.1975 to 3.4.1977.

- Claims for unemployment benefits from 1985 onwards include only initial claims. Continuation claims are excluded.

- Orphan's benefits include full and half benefits.

1. Marriage grant was abolished for marriages that occurred from 1.1.2013 and onwards.

Notes: - Payments for maternity benefits marriage and funeral grants were discontinued from 17.3.1975 to 2.1.1977 and for unemployment benefits from 17.3.1975 to 3.4.1977.

The sums paid represent claims submitted before 17.3.1975.

1. From 1980 onwards include medical fees for employment accidents and invalidity pension.

2. Marriage grant was abolished for marriages that occurred from 1.1.2013 and onwards.

D. EXTERNAL TRADE

D. EXTERNAL TRADE

SCOPE

This section gives a comprehensive account of Cyprus External Trade in goods. Analysis is given of the value of imports and exports by H.S. Commodity Section and by main partner country.

External trade statistics cover both extra and intra-EU trade.

COVERAGE

The data for 1974 onwards refer only to merchandise imports and exports from ports and airports in the Government controlled areas.

DATA SOURCES

Since the accession of Cyprus to EU in May 2004, major changes were brought into trade statistics data. Trade statistics with EU Member States and trade statistics with non-EU countries are compiled mainly from two separate sources. This was the consequence of the abolition of custom formalities between EU Member States, which had served as the traditional source of trade statistics, and the introduction of a new data collection system called Intrastat. Customs declarations, the traditional source of almost all trade statistics, were no longer required for most movements of goods within the EU. A new EU wide system for collecting intra-EU trade statistics, Intrastat, was introduced in May 2004 for the compilation of statistics with Member States.

The introduction of Intrastat as from May 2004 involved a methodological break with the past. Intra-EU trade statistics are compiled using the information extracted mainly from two sources: The first is the Intrastat system in which the providers of statistical information submit detailed monthly returns giving information on arrivals and/or dispatches with EU countries to national responsible Authority. The second main source for the collection of Intra-EU trade statistics is the VAT return, on which all traders are required to record the total value of goods imported from and exported to other EU Member States. The information provided on the VAT returns is necessary for the collection of Intra- EU trade for those traders below the Intrastat thresholds, for maintaining the Intrastat trader's register and for identifying those traders exceeding the thresholds, who are eligible to make the detailed Intrastat return. The Legal background of Intra-EU trade statistics is the 2004 National Intrastat Law (L38 (I)/2004) relating to the statistics of the trading of goods between Member States and the 2004 National Law (Amended) (L135(I)/2004), as well as the relevant Community legislation.

Regarding the main data sources for trade with non-EU countries, these are "Theseas" system, the customs computerized system for imports, the paper based customs exports declaration and the customs exports computerized system (from July 2013).

CLASSIFICATION SYSTEM USED

Product classification

With regards to the commodity classification used in this publication, this is based on the Harmonised Commodity Description and Coding System (H.S.) or more simply the Harmonised System or H.S. (6 digits level) and Combined Nomenclature (C.N.) which includes almost 10 000 eight-digit codes.

The Harmonised System is a legal instrument and was adopted by the Customs Co-operation Council (now the World Customs Organisation) in June 1983 and the International Convention on the Harmonised System (H.S. Convention) entered into force on the 1st January 1988.

According to the H.S. Convention, the H.S. means the Nomenclature comprising the headings and the subheadings and their related numerical codes, the Section, Chapter and Subheadings notes and the General Rules for the interpretation of the Harmonised System.

The shape of the H.S. and the C.N. classifications (reference year 2014) is illustrated in the following table:

Nomenclature	Levels of breakdown	Code	Number
Harmonised System (H.S.)	Section	One digit	21
	Chapter	Two digits	99
	Heading	Four digits	1 229
	Sub-Heading	Six digits	5 214
Combined Nomenclature (C.N.)	Sub-Heading	Eight digits	9 379

Country Classification

The classification of countries is the country nomenclature (Geonomenclature) as set out annually in the Official Journal of the European Communities. The United Nations' ISO alpha-2 coding system is followed, in which each country is identified by a two-letter code.

DEFINITIONS OF TERMS USED

Total Imports/Arrivals refer to those goods crossing the national boundaries either being cleared directly for home use or warehoused. As from May 2004, the imports from E.U Countries were renamed to arrivals according to E.U. regulations and methodology.

Imports/Arrivals destined for home use refer to those goods either cleared at the time of importation, for home use or being withdrawn from bonded warehouses for home consumption.

Total Exports/Dispatches refer to the outgoing goods from customs warehouse or directly from local market at the time they leave Cyprus. As from May 2004, the exports to E.U Countries were renamed to dispatches according to E.U. regulations and methodology.

Exports/Dispatches of domestically produced goods refer to those goods which have been produced, manufactured or partly manufactured domestically and are exported.

Exports/Dispatches of foreign produced goods (or re-exports) refer to those goods re-exported in the same physical condition as when they were previously imported or after having undergone a minor process or transformation which leaves them essentially unchanged.

Stores and provisions denote ships' and aircrafts' stores and supplies. Ships' and Aircrafts' stores means the various products for consumption by the crew and passengers of vessels or aircrafts as well as the products for the operation of the engines, machines and other equipment on vessels or aircraft, such as fuel, oil and lubricants.

Transit Trade (direct transit trade) i.e. goods being transhipped or moved through Cyprus for purposes of transportation only, are not included in the statistics.

Goods transhipped under bond are to be distinguished from goods which are entered for storage in bonded warehouses under Customs control and are afterwards exported there from. These latter goods are included in the figures of imports and exports under the "general trade" system of recording.

BASIS OF VALUATION

(a) General

The customs value of imported goods is determined according to the Section 159 of the Customs and Excise Law No. 82 of 1967, as amended by Law No. 98 of 1989, and the rules laid down by the Agreement on implementation of Article VII of the General Agreement on Tariffs and Trade (G.A.T.T.), which was signed by the Republic of Cyprus and published in the Official Gazette No. 2416 of 2 June 1989 (Seventh Supplement). The value of the exported goods is determined according to the Exchange Control Law (Chapter 199, Section 25(1) (b)).

(b) Imports/Arrivals

For goods subject to duty on “ad valorem” basis, the statistical value is the same as the value for customs purposes. This value includes freight, insurance, commissions and all other costs, charges and expenses attributed to the sale and delivery of the goods to the port or place of importation into Cyprus, with the exception of any duty or tax chargeable in Cyprus. This value is known as the CIF (cost, insurance, freight) value.

Where an amount in foreign currency is converted to its euro currency equivalent, the rate of exchange used is that applicable at the time of lodgement of the customs entry.

(c) Exports/Dispatches

Export values are on a FOB (free on board) basis i.e. the cost of the goods to the purchaser abroad, including packing, inland transport in Cyprus, port charges, loading charges and all other costs, profits, charges and expenses (i.e. insurance and commission) accruing up to the point where the goods are deposited on board the exporting vessel or aircraft.

Exclusions

The implementing Regulations covering the compilation of trade statistics contain a comprehensive list of goods to be excluded from the statistics for methodological reasons. The related lists of the aforementioned goods are defined by the relevant Commission Regulations (EC).

GROUPING OF COUNTRIES

In the detailed tables, countries are arranged in two groups:

(a) E.U Countries include Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, the United Kingdom and,

(b) Non-E.U Countries include all other countries not included in the abovementioned group, including countries and territories not specified (for data referring to periods prior to May 2004).

OTHER RELEVANT PUBLICATIONS OR SOURCES OF INFORMATION

More detailed data on Cyprus foreign trade can be found in the following publications issued by Statistical Service of Cyprus:

1. “INTRA-EXTRA EU TRADE STATISTICS (SUMMARISED DATA)”
2. “INTRA-EXTRA EU TRADE STATISTICS (BY COMMODITY AND COUNTRY)”
3. “CYPRUS EXTERNAL TRADE STATISTICS, (VOL. I-IV)”

SCOPE

This section presents a comprehensive account of the developments in the broad agricultural sector. It provides data on gross output, inputs, value added, prices and production of main products, land use, exports, investments and employment.

COVERAGE

The information presented pertains to the broad agricultural sector, covering crop and livestock production, forestry and fishing, major division 1 of the 1968 U.N. International Standard Industrial Classification of All Economic Activities (ISIC) up to 1994 whereas from 1995 onwards the European Classification of Economic Activities (Nace Rev. 1.1) was adopted.

The data for the period 1960-mid 1974 refer to the whole of the country while as from mid 1974 the data series refers to agricultural activities in the Government controlled area due to the Turkish invasion and occupation of a large part of the country.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The sources of the data given in this part are the annual sample surveys, monthly inquiries and censuses conducted by the Statistical Service, as well as administrative records and data kept in other Departments such as the Ministries of Commerce, Industry and Tourism, Agriculture, Natural Resources and Environment etc. The series of data cover the period since 1960.

DEFINITIONS OF TERMS USED

Gross output is the value of characteristic agricultural products and other ancillary output produced during a calendar year irrespective of whether these products are sold to others, consumed, held as stock, or used for further processing by farmers. Producers' prices (farm gate prices) are used for the valuation of gross output.

Intermediate inputs refer to the value of goods and services used for agricultural production. The valuation of input items (seeds, fertilizers, feeding stuff, pesticides, irrigation costs etc.) is at cost to farmers (purchasers') prices.

Value added at market prices is the difference between the value of gross output and the value of inputs.

Quantity and price indices of crop and livestock production (as well as the indices of inputs) are computed by using the Laspeyres formula for the quantity indices and the Paasche formula for the price indices, the weights being the producers' prices for the quantity indices and the quantities produced for the price indices.

Employment: The data for the years 1960-1974 refer to the number of persons working for at least one third of the year on the farm, while for the period 1975-2011 the figures refer to the “full time equivalent” number of persons derived by dividing the total work input (in terms of time) by 260 man-days per year.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

More detailed and additional data can be obtained from the report “Agricultural Statistics” published annually by the Statistical Service, the reports pertaining to the Censuses of Agriculture and the annual reports of the Department of Agriculture, the Department of Forests and the Department of Fisheries. The Agricultural Research Institute also publishes studies on various agricultural aspects.

Further information on the policies, projects and measures implemented for agriculture can be found in the reports relating to the Development Plans prepared by the Planning Bureau and the Ministry of Agriculture, Natural Resources and Environment.

Notes: 1. The data of the fishing for the years 2000-2003 is not included in this table.

The figure for 2003 is the result of the Census of Agriculture 2003.

2. The data for 1960 refer to the number of persons working for at least one third of the year on the farm whereas from the year 1990 onwards data refer to the "full-time working equivalent" number of persons employed.

3. From 2009 onwards, data include the Fishing sector.

F. INDUSTRY, CONSTRUCTION

F.1. Industry

F.2. Construction

F. INDUSTRY, CONSTRUCTION

F.1. Industry

SCOPE

This section provides data on the broad industrial sector, namely mining and quarrying, manufacturing, electricity supply, water supply, sewerage, waste management and remediation activities.

COVERAGE

The data presented in this report as from mid-1974 onwards refer only to the industrial activity in the Government controlled area. Data for previous years cover the whole country. The data do not cover manufacturing output of government departments. Cottage activities pursued at home are not covered from 2008 onwards.

The electricity sub-sector covers the Electricity Authority of Cyprus (EAC) and from 2010 the enterprises producing electricity from renewable energy sources. From 2008 onwards, it also includes the personnel working on the field for the development and maintenance of the transmission and distribution grid of the EAC, which were previously classified in the construction sector.

The water supply sub-sector includes the activities of the Water Boards in the greater urban areas and the water desalination plants. The water purification plants that fall under the activities of the Water Development Department are covered until 2007. From 1985 until 2007 the water supply activity also includes all activities for the supply of water in areas not covered by Water Boards. Sewerage activities include the Sewerage Boards, which are semi-government organisations, as well as the operation of wastewater treatment plants.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented extend to the censuses of industrial production carried out for the years 1954, 1962, 1967, 1972, 1976, 1981, 1986, 1992 and 2000, the surveys on cottage industry for 1962 and 1972, the censuses on cottage industry for 1982 and 1992 and the industrial production surveys carried out annually since 1963. The detailed data from the censuses and surveys can be found in special issues and the annual reports on industrial statistics.

Data for the years 2008 to 2012 have been revised due to changes in the coverage of the activities of electricity and water supply.

CLASSIFICATION SYSTEMS USED

Enterprises covered by the industrial surveys and censuses are classified according to their major kind of industrial activity, based on the principal category of goods produced. Data up to 1995 are presented according to the ISIC Rev. 2 classification system of the United Nations. From 1995 until 2008 data are presented according to the statistical classification of economic activities NACE Rev. 1.1. As from 2008 data are presented according to the statistical classification of economic activities NACE Rev. 2. This classification was prepared by the Statistical Office of the European Union (Eurostat). The application of the NACE Rev. 2 classification is compulsory for all EU member states and for all surveys in which statistical data on economic activities are collected. Data for production and output prices indices are presented according to the statistical classification of economic activities NACE Rev. 2.

The main differences between the statistical classification systems ISIC Rev. 2 and NACE Rev. 1.1 are:

- (a) The manufacture of artificial teeth, dentures etc. according to NACE Rev. 1.1 is classified in manufacturing under the class 33.10 (manufacture of medical and surgical equipment and orthopaedic appliances), while according to ISIC Rev. 2 it was classified under the major division of services in the medical dental and other health services group.
- (b) Recycling is classified under NACE Rev. 1.1 in manufacturing with the creation of division 37 covering recycling of metal waste and scrap as well as non-metal waste and scrap.

All other changes refer to reclassifications within sub-sectors of the manufacturing sector.

The main differences between the statistical classification systems NACE Rev. 1.1 and NACE Rev. 2 are:

- (a) The publishing activities according to NACE Rev. 1.1 were classified in manufacturing, while according to NACE Rev. 2 they are classified under the major division of services.
- (b) The new sub-sector of water supply, sewerage, waste management and remediation activities is created, which includes sewerage, waste management and remediation activities, which were previously classified under the major division of services.
- (c) Recycling is transferred from manufacturing to the new sub-sector of water supply, sewerage, waste management and remediation activities under the name “materials recovery”.
- (d) Electricity now constitutes a separate sub-sector.

DEFINITIONS OF TERMS USED

Enterprise refers to an economic unit which is a legal entity – a firm or self-employed engaging in industrial activities. It may consist of more than one industrial units located at various places.

Employment refers to the average number of all persons employed in the enterprise. It includes working proprietors, unpaid family workers (provided they worked for at least half the normal hours), apprentices and all other employees.

Gross Output is the value of goods produced, services rendered to others, net receipts from the sale of goods sold in the same condition as purchased, other receipts and changes in the value of work in progress at the end of the inquiry period. The valuation is at prices secured by the enterprise, excluding discounts, commissions and subsidies but including indirect taxes (excise duties and other indirect non-commodity taxes, such as motor vehicle licences, etc.).

Value Added at Current Market Prices is the contribution to the Gross Domestic Product. It is derived by deducting from the value of gross output the aggregate costs of all materials, fuels, electricity, the amount paid to other firms for work given out, as well as the cost of non-industrial services rendered by others (e.g. telephone and postage charges, advertising, legal services, accounting and auditing, insurance etc.) and rents paid for buildings and machinery. It is the value added to materials and services by the process of production and constitutes the fund from which wages, salaries, fees, taxes, depreciation, interest and profit have to be met.

Value Added at Factor Cost is obtained by deducting from the value added at market prices all indirect taxes, that is, excise duties net of subsidies and all other indirect non-commodity taxes, such as motor vehicle licences, municipality taxes, fees for business licences, stamp duties etc.

Wages and Salaries include direct wages and salaries, overtime earnings, bonuses, value of receipts in kind, cost of living allowance, payment for days on leave and dismissal compensation. All payments are calculated prior to any deduction of income tax, social insurance and provident fund.

Expenditure on Fixed Assets refers to the net expenditure (purchases minus sales) on fixed assets purchased or manufactured by the enterprise for its own use. It also includes the cost of any major additions and alterations to existing fixed assets.

TABLE F.1.1a. EMPLOYMENT, GROSS OUTPUT, VALUE ADDED AND DOMESTIC EXPORTS OF THE MANUFACTURING SUBSECTOR, 1962-2014

Year	Persons Engaged	Gross Output (€000's)	Value Added (€000's)	Domestic Exports of Manufactured Goods (F.O.B. €000's)
1962	27.525	52.172	21.035	3.991

2014 (pr.)	27.206	2.451.410	807.106	497.080

Notes: - Data until mid-1974 refer to both Greek and Turkish establishments; as from mid-1974 onwards they refer only to the industrial activity in the Government controlled area.

- Data until 2008 according to NACE Rev. 1.1 include cottage industry.

1. Data up to 1995 were compiled on the basis of the ISIC Rev.2 classification, from 1995 to 2008 according to NACE Rev. 1.1 classification and from 2008 onwards according to NACE Rev. 2 classification.

Notes:

- Time series data are not strictly comparable.
- Data for 1962 are taken from the 1962 Census of Industrial Production and extend to the total population of the country.
- Data for 1966 and 1972 are taken from the respective Cottage Industry Surveys and their coverage is confined to the Greek population in the rural areas only.
- Data for 1982 and 1992 are taken from the respective Censuses of Cottage Industry and their coverage is confined to the Government controlled areas of the island, both rural and urban.

F. INDUSTRY, CONSTRUCTION

F.2. Construction

SCOPE

This section provides data on the structure and evolution of the construction and housing sectors in terms of output, inputs, prices and dwellings. The construction sector (NACE Rev. 2, section F) can be distinguished into two broad sub-sectors: buildings construction and civil engineering (NACE Rev. 2, section F excluding group 41.1) and land and buildings development (NACE Rev. 2, group 41.1).

COVERAGE

Due to the Turkish invasion of Cyprus in July/August 1974 the relevant data as from mid-1974 onwards refer only to the construction activity in the Government controlled area. For previous years, coverage extends to the whole country.

From 2008 onwards, the coverage of the construction sector has been changed and no longer includes any construction activity carried out by (i) government departments or (ii) semi-government organisations which are primarily engaging in electricity, water, sewerage and telecommunications activities and may be performing construction work as a secondary activity.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

Data from 1960 to 1978 are based on ad hoc surveys, whilst as from 1979 onwards these are based on the annual sample surveys of building permits authorized, as well as the 2000 Census of Construction and the construction surveys carried out annually since 1988.

Data for the years 2008 to 2013 have been revised due to changes in the coverage of the construction sector, as well as a number of methodological improvements.

CLASSIFICATION SYSTEMS USED

Construction data are classified by economic activity on the basis of the Statistical Classification of Economic Activities (NACE Rev. 2), while housing data are classified according to UN recommendations.

DEFINITIONS OF TERMS USED

Enterprise refers to an economic unit which is a legal entity (a firm or self-employed), engaging in construction activities. It may consist of more than one construction units located at various places.

Persons Engaged refers to the average number of all employees of the enterprise. It includes working proprietors, unpaid family workers, (provided they worked for at least half the normal hours), apprentices and all other employees. The average employment for the year is derived as a simple twelve month average. Part-time workers, that is persons working less than the usual number of days of operation of the establishment or persons working fewer hours every day, are converted into full-time equivalents using as conversion factor the number of working days for which the establishment usually operates or the normal hours worked by full-time employees.

Gross Output is the value of work put in place either by direct contracts or subcontracts, services rendered to others, net receipts from the sale of goods sold in the same condition as purchased, other receipts and changes in the value of work in progress at the end of the period under investigation. The valuation of gross output is at prices secured by the enterprise, excluding discounts and commissions but including indirect taxes (excise duties and other indirect non-commodity taxes, such as motor vehicle licences, professional taxes, etc.).

Value Added at Current Market Prices is derived by deducting from the value of gross output the aggregate costs of all materials, fuels, electricity, the amount paid to other firms for work given out, administrative services rendered by others (e.g. telephone, telegraph, telexes and postage charges, advertising, legal services, accounting and auditing, insurance etc.) and rents paid for buildings and machinery. It is the value added to materials and services by the process of construction and constitutes the fund from which wages, salaries, rates, taxes and all other similar charges have to be met including depreciation, interest and profit.

Wages and Salaries refer to direct wages and salaries, overtime earnings, bonuses, value of receipts in kind, cost of living allowance, payment for leave days and redundancy compensation. All payments are calculated prior to any deduction of income tax, social insurance and provident fund. Employers' contributions to various funds, pensions and similar benefits are excluded from wages and salaries and are shown separately.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

For more detailed or additional data on the construction and housing sectors, reference may be made to the annual report "Construction and Housing Statistics", the "Census of Construction 2000" and the "Census of Population and Housing 2011", published by the Statistical Service. For housing policy and other relevant regulations, information can be obtained from the Ministry of Interior.

G.1. Transport and Storage

SCOPE

This section provides detailed data on the structure and development of the transport and storage sector, as well as on motor vehicles licensed and registered, road accidents, public roads, shipping, civil aviation and postal services.

COVERAGE

Data for the years 1960 to mid-1974 refer to the whole country and as from mid-1974 onwards to the Government controlled area only.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented are derived from the Services and Transport survey conducted annually since 1982, as well as from administrative records and returns of competent government departments and semi-government organisations. The data presented for a number of domains date back as far as 1960.

Data for section H have been revised for the years 2008-2012 due to changes in class 5229.

CLASSIFICATION SYSTEM USED

Data are presented according to the statistical classification of economic activities NACE Rev. 2, developed by the Statistical Office of the European Union (Eurostat). All activities under section H of the NACE Rev. 2 classification are being covered.

DEFINITIONS OF TERMS USED

Vehicles registered

Stock of road vehicles

Number of road vehicles registered and licensed to use roads open to public traffic. This includes road vehicles exempted from annual taxes or license fees; it also includes imported second-hand vehicles and other road vehicles according to national practices. Military vehicles are excluded.

Passenger road motor vehicle

A road motor vehicle, exclusively or primarily designed to carry one or more persons. Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, buses, coaches and minibuses, motorcycles, mopeds and motor homes. Excluded are light goods vehicles.

Light goods road vehicle

Goods road vehicle with a gross vehicle weight of not more than 3.500 kg designed, exclusively or primarily, to carry goods. Included are vans designed for and used primarily for transport of goods, pick-ups and small lorries with a gross vehicle weight of not more than 3.500 kg.

Heavy goods road vehicle

Goods road vehicle with a gross vehicle weight over 3.500 kg designed, exclusively or primarily, to carry goods.

Road tractor

Road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

Agricultural tractor

Motor vehicle designed exclusively or primarily for agricultural purposes, whether or not permitted to use roads opened to public traffic.

Moped

Two, three or four-wheeled road motor vehicle which is fitted with an engine having a cylinder capacity of less than 50 cc (3,05 cu.in) and a maximum authorized design speed in accordance with national regulations.

Motorcycle

Two, three or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

Shipping

The gross tonnage of a vessel is determined by dividing the contents in cubic feet in the vessel's closed-in space by 100. Thus, a vessel-ton is 100 cubic feet space. The gross tonnage of each vessel is determined when the ship is registered and figures given in this publication are as declared by the ships' master to the Director of Ports.

The net tonnage of a vessel is the vessel's gross tonnage less the space used for accommodation of crew, machinery for navigation, the engine room and fuel storage space and crew's quarters. Thus, the net tonnage gives the space available for the accommodation of passengers, if any, and the storage of cargo.

Road traffic accidents

Road traffic accident refers to any accident which involves a traffic unit (i.e. bicycle, motorcycle, motor car and any other kind of vehicle) moving on a public road and causing death, bodily injury or damage to property.

Casualties include persons killed or injured (seriously or slightly) in road traffic accidents.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

Additional data may be obtained from the following publications of the Statistical Service: Transport Statistics (annual), Registration of Motor Vehicles (monthly), Statistics of Motor Vehicles and Road Accidents (annual, discontinued in 1985), Shipping Statistics (annual, discontinued in 1985), Tourism Statistics (annual) and External Trade Statistics (annual).

The following ministries, departments and semi-government organisations can also provide valuable statistical information in their areas of competence: Department of Road Transport, Department of Civil Aviation, Ministry of Interior, Cyprus Police (for road accidents), Department of Public Works, Department of Postal Services, Department of Customs and Excise, Department of Merchant Shipping, Cyprus Ports Authority and the Office of the Commissioner of Electronic Communications and Postal Regulation.

G. SERVICES

G.2. Tourism

SCOPE

This section provides data on the movement of travellers, tourist flow, revenue from tourism, overnight stays in tourist accommodation as well as movement of permanent residents.

COVERAGE

The statistics cover arrivals and departures of travellers through ports and airports. As from mid-1974 these relate to the Government controlled area. Travellers going in and out of the country illegally through ports and airports of the Turkish occupied area of Cyprus are not included in the statistics.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The main source of data until April 1989 were the arrival and departure cards filled in by the travellers at the points of passport control, at the ports and airports of Cyprus.

Completion of arrival and departure cards was gradually abolished for many nationalities of travellers, at first for Cypriots as from April 1989 and then for nationals of countries of the Council of Europe as from June 1991.

From July 1991 - May 1997 the number of tourists as well as figures referring to most of the other categories of travellers are based on estimations.

As from June 1997 the Passenger Survey was initiated by the Statistical Service. It is a border sample survey covering arrivals at all points of entry (two international airports and two ports). The aim of the survey is to estimate the volume of inbound tourism as well as arrivals of other categories of travellers (residents returning from a trip abroad, short-term immigrants, long-term immigrants and same-day tourists) on the basis of total arrivals of travellers.

The overall sample size corresponds to about 3 per cent of the total travellers arriving in Cyprus.

The grossing up is effected on the basis of the monthly arrivals of travellers by country of flight and the monthly arrivals by port, compiled by the Statistical Service from statistics provided by the Civil Aviation Department and manifests of ships. The Civil Aviation figures are corrected by data provided by the immigration authorities on the numbers of transfer passengers on each flight which are deducted from total arrivals.

Data on same-day cruise-ship visitors and transits at ports are based on monthly statements prepared by the Aliens and Migration Service of the Ministry of the Interior.

Data on overnight stays and tourist accommodation are based on information provided by the Cyprus Tourism Organisation.

With reference to revenue from tourism, data is collected in the framework of the Passenger Survey at the points of departure carried out by the Statistical Service as from April 2002.

The series on arrivals and departures of travellers dates back to 1976 while for certain categories of travellers figures are presented as from a later date and visitors as from 1979. Figures on tourists and

residents for 1989 onwards are not strictly comparable with previous years due to the absence of arrival/departure cards, and the introduction as from June 1997 of the Passenger Survey. The figures of the tables resulting from the Passenger Survey may not add up to the total due to rounding at the blowing-up stage.

CLASSIFICATION SYSTEM USED

The classifications used are in accordance with the recommendations of the World Tourism Organization. Classification by country is made according to the geographical codes of the Statistical Office of the European Communities (Eurostat).

DEFINITIONS OF TERMS USED

Travellers: Persons who pass through passport control at the ports and airports of Cyprus. The various categories of travellers are visitors, residents and emigrants or immigrants.

Visitors: Persons staying not more than one year in the country visited and whose main purpose of visit can be classified under:

- (a) Pleasure: holidays, cultural, active sports, visit to friends or relatives, pilgrimage and other pleasure purposes.
- (b) Professional: meeting, mission, business.
- (c) Other tourist purposes: studies, health, transit.

There are two main categories of visitors: tourists and same-day visitors.

Tourists: Visitors staying at least one night in the country visited.

Same-day visitors: Visitors who do not stay overnight in the country visited. These are cruise-ship visitors, transit passengers who leave the airport/port area on the same day and same-day tourists who enter the country as tourists but leave on the same day.

Residents of Cyprus: This category includes persons who have been residing in Cyprus for at least 12 months prior to their travel.

Data obtained from the Cyprus Tourism Organisation:

Tourist accommodation: Hotels with stars, hotel and tourist apartments, tourist villas, guest houses and hotels without star registered by the Cyprus Tourism Organization.

Overnight stays: Number of nights spent at a tourist accommodation establishment by residents and tourists.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

Additional and more detailed data on tourism statistics may be found in the annual publications of the Statistical Service, entitled "Tourism Statistics".

Monthly figures appeared in a monthly publication up to the end of 1986. Since then summary monthly data are presented in the website of the Statistical Service.

G. SERVICES

G.3. Distributive Trade

SCOPE

This section provides data on the structure and development of activities related to wholesale and retail trade, repair of motor vehicles and motor cycles.

COVERAGE

Data refer to distributive trade activities in the Government controlled area only

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented are derived from the Wholesale and Retail Trade surveys carried out annually since 1982.

CLASSIFICATION SYSTEM USED

Data are presented according to the statistical classification of economic activities NACE Rev. 2, developed by the Statistical Office of the European Union (Eurostat). All activities under section G of the NACE Rev.2 classification are being covered.

DEFINITIONS OF TERMS USED

Enterprise refers to an economic unit engaging in one or more kinds of trade activity. It may consist of more than one trade establishments located at various sites.

Persons engaged is the number of persons employed at an enterprise and includes working proprietors, unpaid family workers and paid employees.

Gross output is defined as the value of receipts (goods and services sold) plus the increase in stocks of goods and assets produced for own use, less the cost of goods purchased for re-sale.

Value added at market prices is the gross output, less the cost of materials, fuels, rents paid and other direct costs as well as administrative expenses.

Labour costs consist of wages and salaries of persons engaged and the employers' contributions to various funds.

Wages and salaries include normal wages and salaries, 13th and 14th salaries, overtime earnings, bonuses, value of payments in kind, cost of living allowances etc. The payments are given gross, i.e. before any deductions for income tax, social insurance and other contributions for various funds have been made. Imputed wages for unpaid family workers, working proprietors and partners are also included.

Employers' contributions to various funds include social insurance, provident and pension funds, medical and other funds.

Gross fixed capital formation refers to the total value of fixed assets excluding land and existing buildings purchased, less the value of sales of fixed assets. The cost of any assets produced for own use and of any major additions and alterations to existing fixed assets are included. Fixed assets acquired from others are valued at the full cost incurred i.e. at the delivery price plus installation costs.

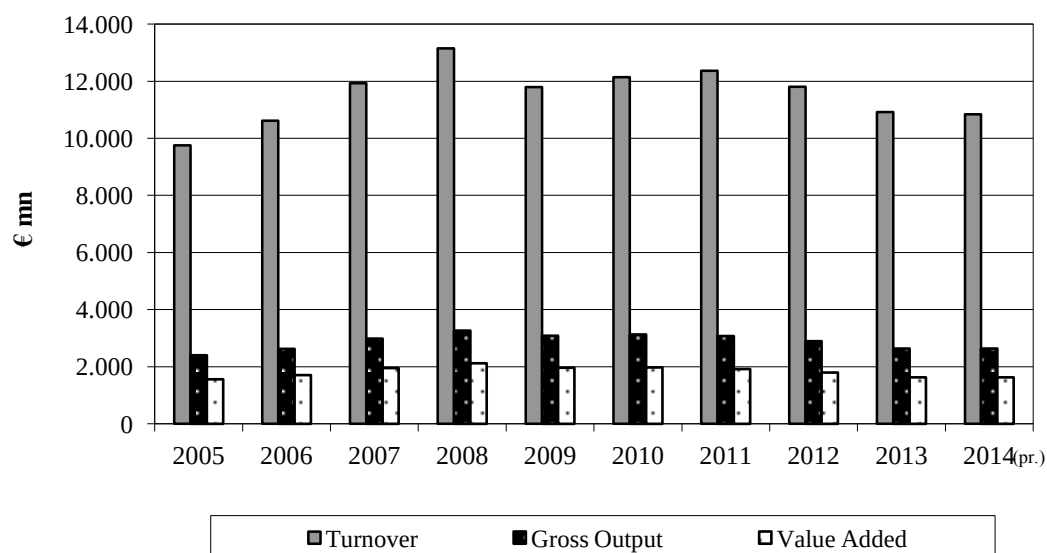

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For more detailed or additional data reference may be made to the report “Wholesale and Retail Trade Statistics”, published annually since 1982. For the years 1985-1989 the relevant data were incorporated in the publication “Services and Distributive Trade Statistics”.

G. SERVICES

G.4. Other Services

G.4.1. Hotels and Restaurants, Business Services, Education, Health, Other Social and Personal Service Activities

SCOPE

This section provides data on the structure and development of the accommodation and food services, business services, education, human health and social work, arts, entertainment and other service activities sector.

COVERAGE

Data refer to the Government controlled area only.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented are derived from the Services and Transport survey conducted annually since 1982. They cover both private enterprises and the public sector.

Data for section J for 2012, M and N for 2008-2012 and R for 2009-2012 have been revised.

CLASSIFICATION SYSTEM USED

Data are presented according to the statistical classification of economic activities NACE Rev. 2, developed by the Statistical Office of the European Union (Eurostat). All activities under sections I, J, L, M, N, P, Q, R, S and division T97 of the NACE Rev. 2 classification are being covered.

DEFINITIONS OF TERMS USED

Enterprise refers to an economic unit which is a legal entity – a firm or self employed – engaging in one, or predominantly one, kind of economic activity. It may consist of more than one establishments located at various sites.

Persons engaged in an establishment or enterprise refers to working proprietors, unpaid family members, permanent and casual employees. The average employment for the year is derived as a simple twelve-month average of the number employed in each category. Part-time employees, that is persons working less than the usual number of working days of the establishment or persons working fewer hours every day, are converted into full time equivalent, using as conversion factor the number of working days for which the establishment usually operates (around 260 days per year).

Gross output is defined as the value of services produced, net receipts from the sale of goods sold in the same condition as purchased, other receipts, change in stocks of goods and the value of assets produced for own use.

Value added at market prices is the gross output less the cost of materials, fuels and other direct costs as well as administrative expenses and rents.

Labour costs consist of wages and salaries of persons engaged and the employers' contributions to various funds.

Wages and salaries include normal wages and salaries, 13th and 14th salaries, overtime earnings, bonuses, value of payments in kind, cost of living allowances and etc. The payments are given gross i.e. before any deductions for income tax, social insurance and other contributions to other funds have been made. They also include imputed wages for unpaid family workers, working proprietors and partners.

Employer's contributions to various funds include social insurance, provident and pension funds, medical and other funds.

Gross fixed capital formation refers to the expenditure on fixed assets excluding land, less the value of sales of similar fixed assets. The cost of any assets produced for own use and of any major additions and alterations to existing fixed assets are included. Fixed assets acquired from others are valued at the full cost incurred i.e. at the delivery price plus installation costs.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For more detailed or additional data reference may be made to the Services Survey (published annually since 1964). For the years 1985-1989 the relevant data were incorporated in the publication "Services and Distributive Trade Statistics"; as from 1990 this publication was replaced by the "Community, Social and Personal Statistics" and "Hotels and Restaurants" reports. The "Community, Social and Personal Statistics" publication was discontinued as from 1995, whereas the corresponding data for the years 2001 until 2005 were incorporated in the "Economic Statistics on Education, Health and Other Social and Personal Service Activities" publication. Finally, the publication of "Economic Statistics on Education, Health and Other Social and Personal Service Activities" was discontinued as from 2006 and the data are as from then incorporated in three new publications; "Economic Statistics on Education", "Economic Statistics on Health" and "Economic Statistics on Other Social and Personal Service Activities".

Summarizing, currently there exist five publications and these are "Hotels and Restaurants Statistics", "Statistics on Business Services", "Economic Statistics on Education", "Economic Statistics on Health" and "Economic Statistics on Other Social and Personal Service Activities".

G. SERVICES
G.4. Other Services
G.4.2. Financial and Insurance Activities

SCOPE

This section provides information on the broad financial intermediation services namely financial intermediation except insurance and pension funding (banking units), insurance and pension funding except compulsory social security and activities auxiliary to financial intermediation.

COVERAGE

The data presented cover the period 1995-2014 and refer to the activities in the Government Controlled areas. The information refers to gross output, value added, investments, employment and other economic parameters.

SOURCES OF DATA

The data on banking units is mainly compiled on the basis of administrative data obtained from the Central Bank of Cyprus.

The data on insurance companies is mainly compiled on the basis of administrative data obtained from the Insurance Companies' Control Service.

The data on the activities auxiliary to financial intermediation is compiled on the basis of survey data collected through questionnaires (Cyprus Stock Exchange, Cyprus Securities and Exchange Commission, Stockbrokers).

CLASSIFICATION USED

The data presented is based on the concepts and methodology of the European System of National Accounts (ESA2010) and the European System of Classification of Economic Activities (NACE Rev.2).

DEFINITION OF TERMS USED

Enterprise refers to an economic unit engaging in one or more kinds of trade activity and which may consist of more than one trade establishments located at various sites.

Persons engaged is the yearly average number of all employees at an enterprise and includes working proprietors, unpaid family workers, and paid employees.

Gross Output in the case of:

- (a) financial service activities except insurance and pension funding is defined as the sum of Imputed Bank Service Charge (FISIM) and the Actual Service Charge (commissions received and other receipts)
- (b) insurance companies, is defined as the Premiums Earned, plus Premium Supplements, minus Claims Due, plus the change in technical provisions.

(c) activities auxiliary to financial services and insurance activities is defined as:

- for stockbrokers is the total amount received from services rendered (revenue from portfolio management, brokerage fees, etc)
- for Cyprus Stock Exchange and the Cyprus Securities and Exchange Commission is the amount collected from fees charged plus any membership subscriptions.

Value Added at market prices is taken as the gross output less intermediate consumption (direct, administrative and other expenses).

Labour Costs consist of wages and salaries of persons engaged and the employers' contributions to various funds.

Wages and Salaries include normal wages and salaries, 13th and 14th salaries, overtime earnings, bonuses, value of payments in kind, cost of living allowances etc. The payments are given gross, i.e. before any deductions have been made for income tax, social insurance and for various funds. Imputed wages for unpaid family workers, working proprietors and partners are also included.

Employers' contribution to various funds include social insurance, provident and pension funds, medical and other funds.

Gross fixed capital formation refers to total value of fixed assets excluding land and existing buildings purchased, less the value of sales of fixed assets. The cost of any assets produced for own use and of any major additions and alterations to existing fixed assets are included. Fixed assets acquired from others were valued at the full cost incurred i.e. at the delivery price plus installation costs.

G. SERVICES
G.4. Other Services
G.4.3. Insurance and Registration of Companies

SCOPE

This section presents data on the local insurance sector and on registration of local and foreign business companies.

The data on the local insurance sector presented cover the fund, income and expenditure of the different types of insurance activity such as accident and health, motor vehicle, fire, marine, aviation and transport, general liability, credit and miscellaneous insurance.

The data on registration of local and foreign companies cover among others the number of companies on the register, registrations and name applications of new companies.

COVERAGE

The data is presented for the period 2003 onwards and refers to the Government controlled area only.

SOURCE OF DATA

The data presented on the insurance sector is extracted from the “Report on Insurance in Cyprus”, published by the Insurance Companies’ Control Service. The data has been primarily obtained from the returns submitted for supervisory purposes by the insurance undertakings to the Insurance Companies Control Service, in accordance with the Insurance Services and Other Related Issues Laws of 2002-2008 and the accompanying Regulations of 2002-2004.

The data on registration of companies cover the period since 1995 and were obtained from the Department of the Official Receiver and Registrar of the Ministry of Commerce, Industry and Tourism.

CLASSIFICATION SYSTEM USED

The data on insurance sector is classified and defined according to Insurance Services and Other Related Issues Laws of 2002-2008 and the accompanying Regulations of 2002-2004. The format of the returns has changed since 2003, due to the harmonization of the Cyprus insurance legislation with the European Union legislation.

OTHER RELEVANT PUBLICATIONS AND SOURCES OF INFORMATION

For additional information on insurance sector statistics, reference may be made to the web page of Ministry of Finance (www.mof.gov.cy), under the Directorate “Insurance Companies Control Service” and the “Report on Insurance in Cyprus”.

The annual report of the Department of the Official Receiver and Registrar provides details on the registrations of companies, partnerships and business names.

H. ENERGY, ENVIRONMENT

H.1. Energy

H.2. Environment

H. ENERGY, ENVIRONMENT

H.1. Energy

SCOPE

This section provides data on the sales of petroleum products and the production and consumption of electricity, which are the main forms of energy utilised in Cyprus.

COVERAGE

The data presented on sales of petroleum products as from mid-1974 onwards refer only to the Government controlled area. Data for previous years pertain to the total area of the country.

Electricity production data refer to the Electricity Authority of Cyprus (EAC), to other establishments generating electricity for their own use and to production from renewable energy sources.

Electricity consumption data refer to billed sales only of the Electricity Authority of Cyprus, i.e. excluding electricity supplied to the areas occupied by the Turkish invading forces, for which no payment has been effected. In the electricity balance table, however, the supply of electricity to these areas is shown separately.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

Cyprus is almost exclusively dependent on imports to meet its energy needs. From 1972 until 2004 crude oil was imported and processed at the Cyprus Petroleum Refinery. The refinery ceased its operation in April 2004 and ever since all petroleum products are imported. Data on sales and prices of petroleum products are obtained from local petroleum companies, as well as the EAC and the cement industry. These data are available as from 1960.

Electricity is primarily generated from oil-burning thermal stations; small amounts are being generated from renewable energy sources (solar, wind, geothermal, biomass) which are gaining ground in recent years. Data on electricity production and consumption are obtained from the EAC, the Transmission System Operator and the Energy Service of the Ministry of Energy, Commerce, Industry and Tourism and are also presented as from 1960.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

For more detailed or additional data on energy, reference may be made to the annual publication "Industrial Statistics" of the Statistical Service of Cyprus, to the Annual Reports of the EAC and the Transmission System Operator, as well as to the local petroleum companies. Information on energy planning and Government policies on energy management and conservation may be obtained from the Cyprus Energy Regulatory Authority and the Ministry of Energy, Commerce, Industry and Tourism.

ENERGY

- Notes: - Gross Production refers to the amount of electricity produced, as metered at output terminals in the power stations.
 - Data on production pertain to the Electricity Authority of Cyprus (EAC), to other establishments generating electricity for their own use and to electricity production from renewable energy sources.
 - Data on consumption refer to billed sales only of electricity distributed from the grid of the EAC, excluding electricity supplied to the areas occupied by the Turkish invading forces, for which no payment was effected.
 - As from 1979 there has been a reclassification of consumption in the industrial and irrigation categories by the EAC.
 - As a result, certain consumers previously classified as industrial have been re-classified in the agriculture category.
 - Agriculture includes water works and water supply.
 1. Includes the supply of 40.598.000 kWh to the areas occupied by the Turkish invading forces, for which payment was effected.

Notes: - Data refer to billed sales only of the Electricity Authority of Cyprus, excluding electricity supplied to the areas occupied by the Turkish invading forces, for which no payment was effected.

1. Includes revenue of €3.784.552 from the supply of electricity to the areas occupied by the Turkish invading forces, for which payment was effected.
2. Includes revenue of €19.857.504 for 2011, €61.679.678 for 2012 and €8.047.000 for 2013 from the temporary surcharge of 6,96% which was implemented from September 2011 to June 2012 and 5,75% from July 2012 to March 2013 to recover the additional cost of production, as well as the temporary deductions of 5% (for the period April-December 2013) and 8% (for the period December 2013-February 2014) and the deduction in tariffs of 8% which was implemented as of February 2014 and resulted in a loss of €21.513.980 for 2013 and €46.505.070 for 2014.

H. ENERGY, ENVIRONMENT

H.2. Environment

SCOPE

This section provides data on various environmental concerns, such as the amounts of municipal and industrial waste generated, the composition of waste, the treatment of waste, air emissions, water abstraction and consumption and wastewater treatment. Moreover, information is provided about the expenditures and the investments occurring for environmental protection purposes as well as the revenues from environmental protection activities in various sectors of economic activity.

COVERAGE

Data refer only to the Government controlled area of the island.

SOURCES OF DATA

Municipal Waste. Data are derived from an annual survey carried out by the Statistical Service. A questionnaire is addressed to all municipal authorities, which have the responsibility for the collection and treatment of the municipal waste generated.

Industrial Waste. Data are derived from sample surveys carried out on a biennial basis by the Statistical Service, starting from the reference year 2004. Surveys conducted cover enterprises operating in the broad industrial sector (including mining and quarrying, manufacturing, electricity, gas, steam and air conditioning supply, water supply, sewerage, waste management and remediation activities) and in the construction sector.

Air Emissions. Data are calculated by the Industrial Pollution Control Sector of the Department of Labour Inspection, Ministry of Labour, Welfare and Social Insurance and the Department of Environment, Ministry of Agriculture, Rural Development and Environment.

Water Abstraction. Data are provided by the Water Development Department, Ministry of Agriculture, Rural Development and Environment.

Wastewater Treatment. Data are derived from an ad hoc survey carried out by the Statistical Service in cooperation with the Water Development Department, Ministry of Agriculture, Rural Development and Environment. The survey covered the years 2004 and 2005.

Water Consumption and Environmental Expenditure. Data are derived from an annual survey carried out by the Statistical Service. The survey is addressed to enterprises classified in the mining and quarrying, manufacturing, electricity, gas, steam, air conditioning supply and water supply sectors (sections B to E of the Statistical Classification of Economic Activities NACE Rev. 2).

DEFINITIONS OF TERMS USED

Waste refers to every product, material or substance that does not provide any usefulness to its generator and, therefore, there is no intention of being reused, and it is discarded or there is an intention for the waste to be discarded.

Municipal waste refers to waste collected by or on behalf of municipalities. It includes household waste and similar waste, as well as waste originating from commerce, trade, small businesses, office buildings and institutions (schools, hospitals, government buildings). It also includes: bulky waste, yard waste, leaves, grass clippings, street sweepings, the content of litter containers and market cleansing waste, if managed as waste. Municipal waste is collected door-to-door either through the traditional collection scheme (mixed household waste) or as fractions collected separately for recovery operations (mainly for recycling purposes, through door-to-door collection and/or through voluntary deposits). It also includes waste similar in nature and composition which: 1) is collected directly by the private sector (business or private non-profit institutions), not on behalf of municipalities (mainly separate collection for recovery purposes) and 2) originates from rural areas not served by a regular waste service, even if they are disposed by the generator. It excludes waste from municipal sewage network and treatment, municipal construction and demolition waste.

Industrial waste refers to the waste generated and treated by industrial enterprises. It covers only substances and materials which are considered as wastes according to the EU waste definitions, described in the Waste Framework Directive. The wastes which are reported either as generated or treated are directly linked to the European Waste Catalogue (EWC). This code list contains 48 aggregated categories, of which 21 are hazardous. Wastes which are recycled on the site of generation are not included. The quantities of waste generated are further classified among the different waste treatment operations: incineration, recovery and disposal.

Incineration refers to the thermal treatment of waste in an incineration plant in order to reduce the volume and the hazardousness of the waste, and to obtain a still product that can be disposed of.

Recovery refers to the treatment of waste, whose principal objective is for the waste to serve a useful purpose in replacing other materials which would normally be used for that purpose. The temporary storage of waste or any preparatory activities are not included.

Recycling is defined as any reprocessing of material in a production process that diverts it from the waste stream. Both reprocessing as the same type of product and for different purposes are included. Direct recycling within industrial plants at the place of generation is excluded.

Composting is defined as a biological process that submits biodegradable waste to anaerobic or aerobic decomposition and that results in a product used on land or for the production of growing media or substrates.

Disposal refers to the deposit of waste into or onto land, in especially engineered landfills, surface impoundment, permanent storage etc. As in the case of recovery, disposal does not include the temporary storage of waste or any preparatory activities.

Landfill site is defined as an area where waste is deposited. It covers both landfills in internal sites (i.e. where the generator of waste is carrying out its own waste disposal at the place of generation) and external sites.

Greenhouse effect is a natural occurring process that aids in heating the earth's surface. It results from the fact that certain atmospheric gases, trap some of the outgoing energy, retaining heat somewhat like the glass panels of a greenhouse. Without this natural greenhouse effect temperatures would be much lower than they are now and life as known today would not be possible.

Greenhouse gases are certain atmospheric gases such as carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs) and sulphur hexafluoride (SF₆).

Fresh surface water includes water which flows over or rests on the surface of a land mass, natural water resources such as rivers, streams, brooks, lakes, etc., as well as artificial water resources such as irrigation, industrial and navigation canals, drainage systems and artificial reservoirs.

Fresh ground water includes the fresh water which is being held in and can usually be recovered from or via an underground formation. All permanent and temporary deposits of water both artificially charged and naturally, in the subsoil, of sufficient quantity for at least seasonal use are included.

Returned water is water abstracted from any fresh water source and discharged into freshwaters without use or before use. Discharges to the sea are excluded.

Water net abstraction equals water gross abstraction minus returned water.

Desalinated water is the total volume of water obtained from desalination processes.

Reused water is water that has undergone wastewater treatment and is delivered to a user as reclaimed wastewater. This means the direct supply of treated effluent to the user. Excluded is wastewater discharged into a watercourse and used again downstream. Recycling within industrial sites is excluded.

Imports of water refer to traded bulk water from another territory. Bottled water is not included.

Wastewater is water which is of no further immediate value to the purpose for which it was used or in the pursuit of which it was produced because of its quality, quantity or time of occurrence. Wastewater originates from two sources, domestic and industrial. Domestic wastewater is wastewater resulting from residential settlements and services which originates predominantly from the human metabolism and from household activities. Industrial wastewater is water discharged after being used in, or produced by, industrial production processes and which is of no further immediate value to these processes.

Wastewater collecting system is a system of conduits which collects and conducts wastewater. Collecting systems are often operated by public authorities or semi-public organisations.

BOD capacity is the total quantity of oxygen-demanding material that a wastewater treatment plant is designed for which can be treated daily with a certain efficiency.

Population equivalent is the organic biodegradable load having a five-day biochemical oxygen demand (BOD₅) of 60g of oxygen per day.

Wastewater treatment is the process to render wastewater fit to meet applicable environmental standards or other quality norms for recycling or reuse. Different types of treatment exist.

Primary treatment is the treatment of wastewater by a physical and/or chemical process involving settlement of suspended solids, or other process in which the BOD₅ of the incoming wastewater is reduced by at least 20% before discharge and the total suspended solids of the incoming waste water are reduced by at least 50%.

Secondary treatment is the treatment of wastewater by a process generally involving biological treatment with a secondary settlement or other process, resulting in a BOD removal of at least 70% and a COD removal of at least 75%.

Further treatment is the treatment (additional to secondary treatment) of nitrogen and/or phosphorous and/or any other pollutant affecting the quality or a specific use of water: microbiological pollution, colour etc. The following minimum treatment efficiencies define a further treatment: organic pollution removal of at least 95% for BOD and 85% for COD, and at least one of the following:

- nitrogen removal of at least 70%
- phosphorus removal of at least 80%
- filtration
- microbiological removal achieving a faecal coliform density less than 1000 in 100 ml

Environmental protection is an action or activity where the main purpose is to collect, treat, reduce, prevent or eliminate pollutants and pollution or any other degradation of the environment. Examples of such activities are: treatment of waste and wastewater, elimination or reduction of emissions of air pollutants, protection of soils and ground water, abatement or reduction of noise and vibration, protection of natural resources and biodiversity, as well as monitoring of the quality of the environment and the control of waste generation etc. Actions that aim at the safety of health at the work place are excluded.

Environmental protection expenditure is the sum of capital investments and current expenditure for the undertaking of environmental protection activities. Capital investments are distinguished between integrated and end-of-pipe investments. They include the purchase of machinery, equipment, buildings, land etc. Current expenditure is distinguished between internal expenditure and purchase of services. It includes labour costs, purchases of raw materials, use of energy, maintenance of equipment, fees, charges and similar payments to external bodies in exchange for environmental protection services etc.

Integrated investments refer to installations (or part of them) that have been adapted in order to generate less pollution or to measure the pollution level. This equipment is integrated in the production process and cannot be identified as separate parts.

End-of-pipe investments consist of identifiable and distinct equipment and/or installations which function independently at the end of the production cycle, where the release of pollution into the environment occurs. This equipment is destined to handle pollution already generated, by preventing, controlling and monitoring the emission of pollutants freed in the environment.

Subsidies/transfers include (a) the amounts granted by a certain ministry, department, service, organisation either to other sectors of the economy or to another body in the public sector for environmental protection purposes, and (b) the amounts received as financing from the European Union and/or other bodies. Such amounts include subsidies towards the promotion of the usage of renewable energy sources, cleaning campaigns and campaigns for raising awareness on environmental issues, fees for the participation in international organisations, etc.

Income from environmental protection activities includes the income from selling environmental services to other entities and the financial aid received by enterprises from the public budget or from institutions not controlled by the government for acquisition and operation of environmental facilities. It also refers to income from the reuse of materials resulting from environmental protection activities. This income is estimated as the saving in cost, as a result of using these products. The income resulting from selling such products to other entities is also included.

Source: Water Development Department, Ministry of Agriculture, Rural Development and Environment.

Notes: 1. The difference between the total and its two components equals the amount of water released from dams for aquifer artificial recharge.

2. Includes the amount of water used for aquifer artificial recharge.

3. Refers to the amount of water released from dams for aquifer artificial recharge.

4. Reused water from the major urban wastewater treatment plants only. It includes reused water discharged to dams, used for irrigation purposes and for aquifer artificial recharge, but not the amounts discharged to the sea.

Notes: - The figures may not add up to the total due to rounding.

- Part of the changes observed between the years is attributed to the increased capital expenditure in the cement industry in 2002, 2007, 2009 and 2010 and in the electricity supply industry in 2004.

- The increase observed in the income from environmental protection activities of the water supply industry in 2007 is due to the introduction of a new production process that resulted in considerable energy savings, while the increase observed in the electricity supply industry in 2012 refers to income from the sale of scrap material.

I. SCIENCE AND TECHNOLOGY

I.1. Research and Development

SCOPE

This section provides data on scientific research and experimental development (R & D) pertaining to the personnel engaged in, expenditures devoted to and sources of funding of R & D activities.

COVERAGE

The data presented in this section refer to scientific research and experimental development for all economic activities in the Government controlled area only.

The data have been compiled in accordance with the definitions, concepts and methodology of the “Frascati Manual”, developed by the Organisation for Economic Co-operation and Development (OECD). It forms the proposed standard practice for surveys of R & D and is also used by the Statistical Office of the European Union (Eurostat).

The “Frascati Manual” defines scientific research and experimental development as creative work undertaken on a systematic basis in order to increase the stock of knowledge of man, culture and society and the use of this stock of knowledge to devise new applications. R & D is distinguished from a wide range of related activities with a scientific and technological base. These related activities may be closely linked to R & D in terms of operations, institutions and personnel, but they do not form R & D as long as they are lacking an appreciable element of novelty.

Three types of R & D activity can be identified:

Basic research: experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundation of phenomena and observable facts, without any particular application or use in view.

Applied research: original investigation undertaken in order to acquire new knowledge. It is, however, directed primarily towards a specific practical aim or objective.

Experimental development: systematic work, drawing on existing knowledge gained from research and practical experience, that is directed towards producing new materials, products or devices, installing new processes, systems and services or improving substantially those already produced or installed.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data have been compiled from the findings of the surveys of research and development, carried out in 1992 (covering the years 1991 and 1992) and on an annual basis as from 1998 onwards.

CLASSIFICATION SYSTEM USED

Economic units engaging in R & D activities have been classified in one of the four institutional sectors (government, business enterprise, higher education and private non-profit) on the basis of the recommendations of the “Frascati Manual”.

Business enterprises were classified according to their major kind of economic activity, on the basis of their principal category of goods/services produced/offered. The Statistical Classification of Economic Activities NACE Rev. 2, developed by Eurostat, is being used as from the year 2008 onwards, while NACE Rev. 1.1 was used in earlier years.

DEFINITIONS OF TERMS USED

R & D expenditure comprises all expenditures (current and capital) performed within a statistical unit or sector of the economy, whatever the source of funds. Expenditures made outside the statistical unit or sector but in support of R & D are also included.

R & D personnel comprises all persons employed directly on R & D, as well as those providing direct services such as R & D managers, administrators and clerical staff. R & D personnel can be distinguished into three categories: researchers, technicians and other supporting staff.

Researcher is the professional engaged in the conception and the creation of new knowledge, products, processes, methods and systems and in the management of the projects concerned.

Technician is the person who participates in R & D by performing scientific and technical tasks, normally under the supervision of researchers, e.g. computer programmer, laboratory assistant, designer, etc.

Other supporting staff includes the persons who participate in R & D projects by performing various tasks indispensable for their completion, e.g. secretarial and clerical staff, labourers, administrators, etc.

Full-time Equivalent (F.T.E.) expresses the total time devoted to research by a person during one year. One F.T.E. may be thought of as one person-year which corresponds to one person working full-time on R & D during one year.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

Further information can be found in the report "Research and Development Statistics" of the Statistical Service, issued for the years 1991-1992 and annually as from 1998 onwards.

I. SCIENCE AND TECHNOLOGY

I.2. Innovation

SCOPE

This section provides data on the introduction to the market or within an enterprise of new or significantly improved products and processes and other related activities such as organisational and marketing innovation, on the objectives and benefits of such activities on enterprises, on strategies and obstacles for reaching the enterprises' goals etc.

COVERAGE

The data presented in this section cover enterprises with 10 or more employees only, active in one of the following branches of economic activity (in brackets, the NACE Rev. 1.1 or Rev. 2 codes):

For the period 2010 – 2012 (NACE Rev. 2 code)

Industry

- Mining and quarrying (section B)
- Manufacturing (section C)
- Electricity, gas, steam and air conditioning supply (section D)
- Water supply; sewerage, waste management and remediation activities (section E)

Services

- Wholesale trade, except of motor vehicles and motorcycles (division 46)
- Transportation and storage (section H)
- Information and communication (section J)
- Financial and insurance activities (section K)
- Architectural and engineering activities; technical testing and analysis (division 71)
- Scientific research and development (division 72)
- Advertising and market research (division 73)

For the periods 2006 – 2008 and 2008 – 2010 (NACE Rev. 2 code)

Industry

- Mining and quarrying (section B)
- Manufacturing (section C)
- Electricity, gas, steam and air conditioning supply (section D)
- Water supply; sewerage, waste management and remediation activities (section E)

Services

- Wholesale trade, except of motor vehicles and motorcycles (division 46)
- Transportation and storage (section H)
- Publishing activities (division 58)
- Telecommunications (division 61)
- Computer programming, consultancy and related activities (division 62)
- Information service activities (division 63)
- Financial and insurance activities (section K)
- Architectural and engineering activities; technical testing and analysis (division 71)

For the period 2004 – 2006 (NACE Rev. 1.1 code)

Industry

- Mining and quarrying (section C)

- Manufacturing (section D)
- Electricity, gas and water supply (section E)

Services

- Wholesale trade and commission trade, except of motor vehicles and motorcycles (division 51)
- Transport, storage and communication (section I)
- Financial intermediation (section J)
- Computer and related activities (division 72)
- Research and development (division 73)
- Architectural and engineering activities (group 74.2)
- Technical testing and analysis (group 74.3)

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data presented have been compiled from the findings of the last four rounds of Innovation Surveys carried out in Cyprus, which referred to the three-year periods 2004–2006, 2006–2008, 2008–2010 and 2010–2012 respectively.

The surveys were fully harmonised with the methodological guidelines set out by the Statistical Office of the European Union (Eurostat), on the basis of the core questionnaire adopted by all EU Member States within the context of the Community Innovation Surveys (CIS).

To enable international comparisons, the definitions and concepts of the Oslo Manual, developed by the Organisation for Economic Co-operation and Development (OECD), were used.

DEFINITIONS OF TERMS USED

There are 5 **types of innovation** activities which create 2 innovation categories:

Technological product and process innovation

- Product innovation
- Process innovation
- Ongoing and/or abandoned innovation activities

Non-technological product and process innovation

- Organisational innovation
- Marketing innovation

The surveys focussed primarily on the first category of innovation activities.

Technological innovation is a new or significantly improved product (good or service) introduced to the market or the introduction within an enterprise of a new or significantly improved process. Innovations are based on the results of new technological developments, new combinations of existing technology or the utilisation of other knowledge acquired by the enterprise.

Innovations should be new to the enterprise concerned; for product innovations they do not necessarily have to be new to the market and for process innovations the enterprise does not necessarily have to be the first to have introduced the process. In addition, it is not of interest whether innovations were developed by the innovating enterprise or by another enterprise. However, purely selling innovations wholly produced and developed by other enterprises are not included as an innovation activity.

Product innovation is the market introduction of a new or significantly improved good or service with respect to its fundamental characteristics and capabilities, technical specifications, incorporated software or other immaterial components, intended uses, or user friendliness. Changes of a solely aesthetic nature are not included.

Process innovation is the implementation of a new or significantly improved production process, method of supplying and distribution, or support activity for the goods or services. The outcome (of the process) should be significant with respect to the level of output, quality of products or costs of production and distribution. Purely organisational or managerial changes are not included.

The **ongoing and/or abandoned innovation activities** include the acquisition of machinery, equipment, software and licenses; engineering and development work, training, marketing and R&D activities when they are specifically undertaken to develop and/or implement a product or process innovation and for some reasons either they are not completed and continue or either they are abandoned and terminated. Basic R&D is also included as an innovation activity even when not related to a product and/or process innovation.

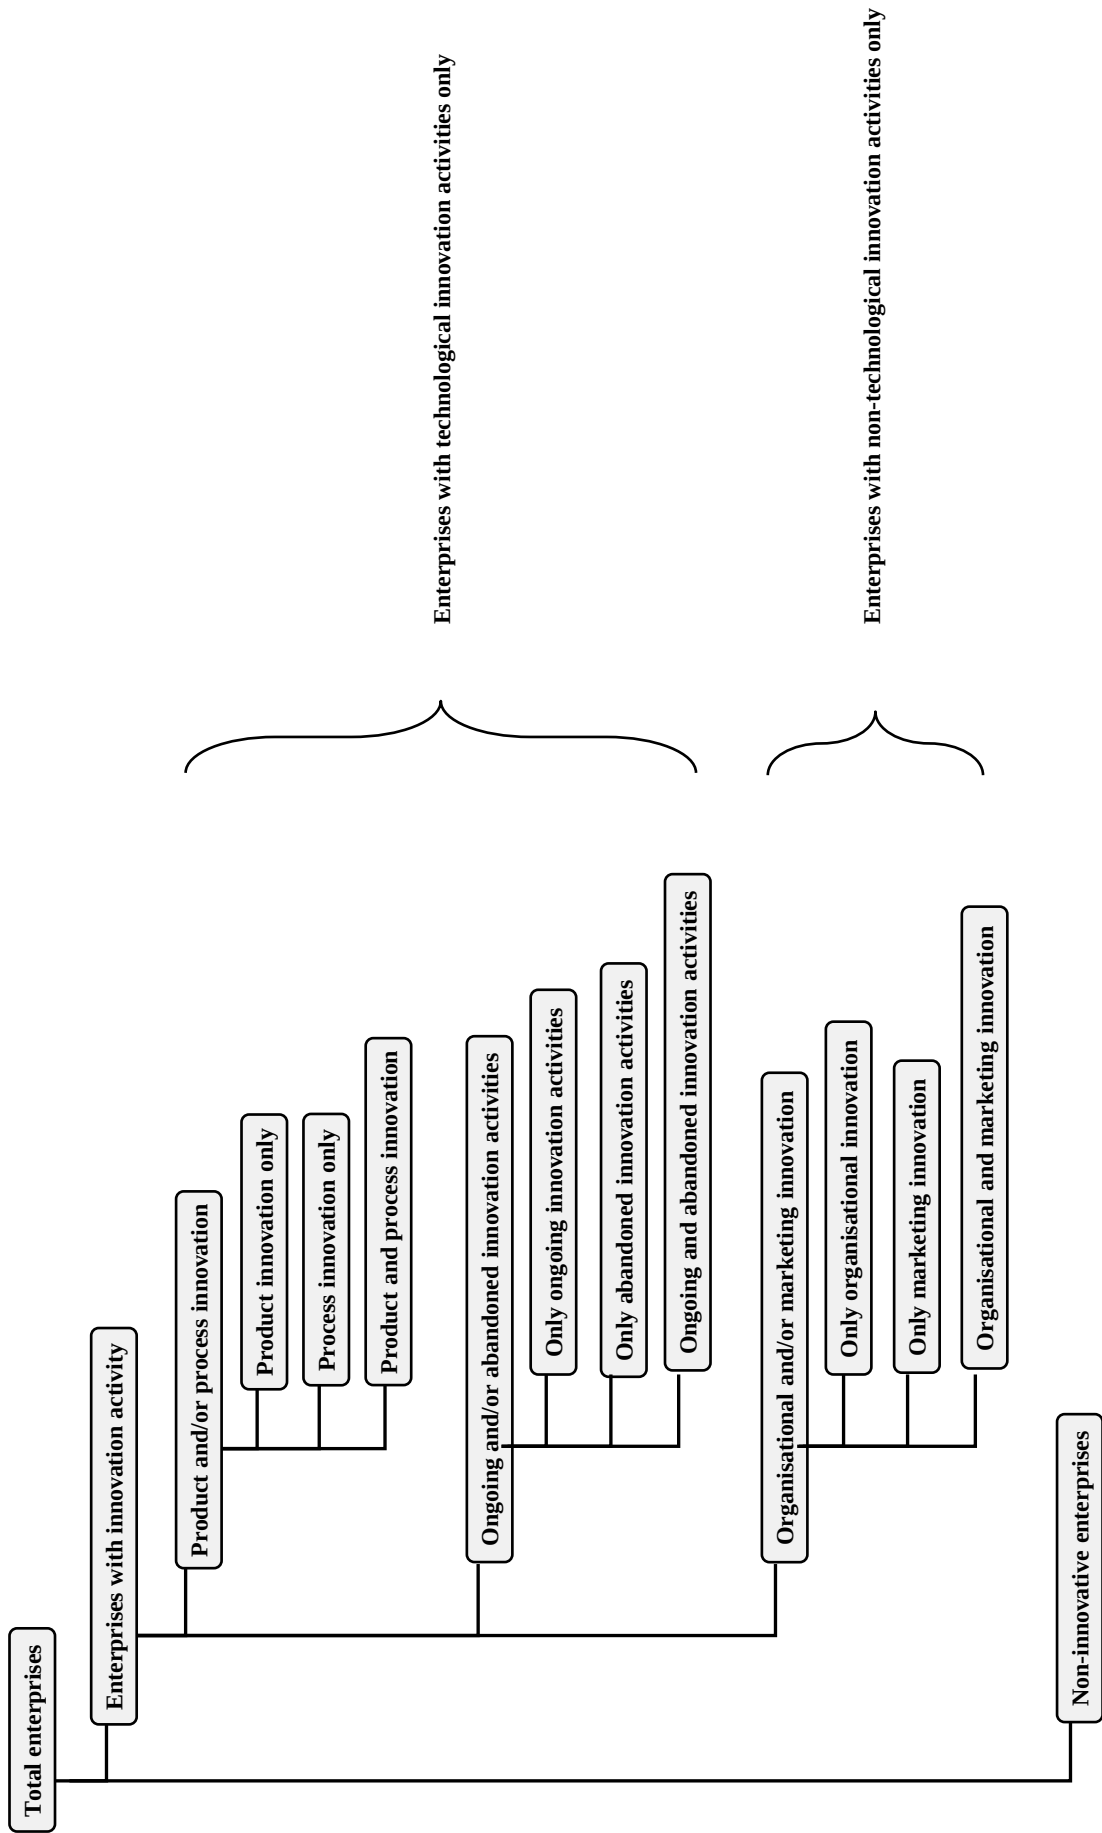

Organisational innovation is the implementation of new or significant changes in firm structure or management methods that are intended to improve the enterprise's use of knowledge, the quality of goods and services or the efficiency of work flows. The innovation must be the result of strategic decisions taken by management. Mergers and acquisitions, even if for the first time, are excluded.

Marketing innovation is the implementation of a new marketing concept or strategy that differs significantly from the enterprise's existing marketing methods and which has not been used before. It requires significant changes in product design or packaging, product placement, product promotion or pricing, that aim at increasing the appeal of goods and services or to entering new markets.

OTHER RELEVANT SOURCES OF INFORMATION

Further information on the results of the six Innovation Surveys carried out in Cyprus (for the periods 2000–2002, 2002–2004, 2004–2006, 2006–2008, 2008–2010 and 2010–2012) can be downloaded free of charge from the website of the Statistical Service, under the statistical theme “Science and Technology”.

I. SCIENCE AND TECHNOLOGY

I.3. Information Society

SCOPE

This section provides data on Information and Communication Technologies (ICT) usage by enterprises and by individuals.

COVERAGE

The data presented in this section refer to the Government controlled area of the country. Data on enterprises refer to enterprises with 10 or more employees in the following codes of economic activities (Nace Rev. 1.1): D, F, G, H55.1, H55.2, I, K, O92.1 and O92.2 for 2004 -2009 and (Nace Rev. 2): C, D, E, F, G, H, I, J, L, M, N and S for 2010. Data on households and individuals refer to households with at least one member aged 16-74 and individuals aged 16-74.

SOURCES OF DATA AND CHRONOLOGY OF SERIES

The data are based on the annual surveys on ICT Usage and on Internet Access. The surveys on ICT Usage are carried out since 2004, whereas the survey on Internet Access since 2003.

DEFINITIONS OF TERMS USED

ISPs: Internet Service Providers.

Dial-up is a temporary connection to the Internet via an analogue (standard) modem and standard telephone line, which requires that the modem dial a phone number when Internet access is needed.

ISDN (Integrated Services Digital Network) is a temporary connection to the Internet using a type of circuit switched telephone network system, designed to allow digital transmission of voice and data over ordinary telephone copper wires, resulting in better quality and higher speeds, than available with analogue systems.

DSL is a high-bandwidth (broadband), local loop technology to carry data at high speeds over traditional (copper) telephone lines.

OTHER RELEVANT PUBLICATIONS & SOURCES OF INFORMATION

Further information can be found in the report “Information Society Statistics” of the Statistical Service.

Notes: - Turkish occupied areas excluded.

- As from 1998 the International O/G Traffic is measured in calls.

- As from 2002 the Inland Traffic is measured in minutes.

- As from 2004 data refers to all electronic communication service providers.

1. Includes the minutes of the International Mobile Service.

2. Includes pulses of National Mobile Service (GSM , NMT).
