P R E F A C E

The “Monthly Economic Indicators” is designed to bring together selected economic indicators so as to capture significant short-term developments in the Cyprus economy. This report is produced directly from a computerised information storage system.

As far as possible, monthly data are presented for the last twenty-five months, quarterly data for the last eight quarters, and annual data for the last three years.

This edition refers to the second half of 2003 although in certain cases it also includes recently available data covering the months January-March 2004.

Most of the data are compiled by the Statistical Service. The indicators on the balance of payments, foreign exchange and the monetary sector are provided by the Central Bank of Cyprus and the Department of Co-operative Development. The Government accounts are prepared by the Ministry of Finance. Part of the data on tourism is compiled by the Cyprus Tourism Organisation and the data on share price indices by the Cyprus Stock Exchange.

The co-ordination of the various series and the preparation of this publication was undertaken by the National Accounts Section of the Statistical Service, under the supervision of Mr Zeitountsian, officer-in-charge of the section, assisted by Mrs A. Christodoulou and Mrs M. Constantinou

Sincere thanks and appreciation are extended to all government departments, semi-government organizations and private enterprises for their valuable assistance in providing the necessary data for this report.

P. Philippides
Director
Statistical Service

April, 2004.

Latest economic developments	9-15
Monthly economic indicators for 2003 and 2004	16-17
Comparative indicators for 2001, 2002, 2003 and 2004	18-19
Definitions and explanatory notes.....	20-26
SUMMARY TABLES	
1. Monthly index of industrial production	29
2. International statistics of output, demand, prices and wages ..	30
3. International statistics of inflation and unemployment	31
GRAPHS	
Selected indicators	33-35
SECTIONS/TABLES	
AGRICULTURE	
1. Volume indices of agricultural production	39-40
2. Animals slaughtered in urban and rural slaughter-houses	41
3. Cows milk purchased by the Cyprus Milk Industry Organization (CMIO)	42
Exports of raw agricultural products	42
MINING AND QUARRYING	
4. Volume index of production	43
Value of production and exports	43
5. Production of main quarrying materials	44
MANUFACTURING	
6. Volume index of manufacturing production by major group of industry	45-49
7. Production/sales of selected industrial products	50-51
8. Domestic exports of manufactured products	52-53
9. Comparative data for domestic exports of selected manufactured products	54
ENERGY	
10. Production, imports and sales of petroleum products	55
11. Sales of petroleum products by product	56-58
12. Production and consumption of electricity	59
13. Consumption of electricity by class of consumers	60-61
14. Consumption of electricity by economic activity	62-64
CONSTRUCTION	
15. Price index of main construction materials	65
Index of labour cost in construction	65
16. Average hourly wage-rates for the main occupations in the private construction sector	66
17. Local sales of cement	67
18. Number, volume and value of building permits authorised ...	68
19. Building permits authorised by category	69

TRANSPORT AND COMMUNICATION

20. Volume indices of output in transport and communication by activity	70
21. Registrations of passenger cars and light goods vehicles	71
22. Turnover value index in transport, storage and communication by activity	72

RETAIL SALES

23. Retail sales value indices by category	73-74
24. Retail sales volume indices by category	75-76

FOREIGN TRADE

25. Total exports	77
Domestic exports	77
Re-exports	77
26. Total imports	78
Imports for home consumption	78
27. Imports for home consumption by economic destination	79

BALANCE OF PAYMENTS AND EXCHANGE RATES

28. Quarterly balance of payments summary	80
29. Exchange rates	81

MONETARY INDICATORS

30. Total liquidity, money supply, quasi-money	82
31. Net foreign assets	83
Claims on private and public sectors	83
32. Monetary indicators summary	84
33. Interest rates	85
34. Central bank short-term liquidity operations	86
35. Interbank market	87
36. Deposits and loans of co-operative credit institutions	88
37. Analysis of deposits and loans, net liquid assets and liquidity ratio of co-operative credit institutions	89
38. Analysis of loans of co-operative credit institutions	90

STOCK MARKET

39. Cyprus stock exchange share prices indices	91
--	----

PRICES

40. Wholesale price index by economic origin	92
41. Wholesale price index by economic destination	93
42. Consumer price index by category	94-96
43. Consumer price index by economic origin	97-98
44. Price index of manufacturing production, local/export markets	99
45. Price index of manufacturing production by major group of industry	100-103
46. Price index of manufacturing production by economic destination	104
47. Commercial rent index	105

LABOUR

48. Employment by economic activity	106-109
49. Foreign workers in Cyprus by economic activity	110
50. Registered unemployed by economic activity	111-114
51. Vacancies notified and outstanding	115

MOVEMENT OF TRAVELLERS/TOURISM

52. Arrivals and departures of travellers	116
53. Arrivals of travellers by country of origin	117-118
54. Overnight stays in tourist accommodation establishments ...	119
55. Bed occupancy rates in tourist accommodation establishments	120
56. Bed capacity in tourist accommodation establishments in operation	121
57. Number of beds in tourist accommodation establishments under construction	122

GOVERNMENT ACCOUNTS

58. Revenue and grants	123-124
59. Expenditure	125-126

SHORT-TERM BUSINESS PROSPECTS

60. Results of the Business Trends Survey in Tourism	127

APPENDIX

1. Summary statistics, 2002-2003	131-136
--	---------

OUTLINE OF ECONOMIC DEVELOPMENTS

The economy continued its expansion through the year 2003, with a growth rate anticipated at 2,0%, which is the same as in 2002.

More particularly, the main developments were as follows:

- During the period January-December 2003, arrivals of **travellers** (including excursionists) reached 3.182.929 showing a decrease of 2,5%, while arrivals of tourists reached 2.303.243 recording a decrease of 4,8% compared to the previous year.
- During the first two months of 2004 arrivals of travellers recorded an increase of 0,3%, while tourists arrivals decreased by 3,8% compared to January-February 2003.
- **Manufacturing production** during January-December 2003 showed a 2,9% decrease compared to 2002. The food, beverages & tobacco industry showed an increase of 2,3% while the textiles & textile products industry recorded a decline of 23,3%.

Domestic exports of manufactured products fell to £159,2mn and recorded a decrease of 12,5% during the year of 2003. Exports of pharmaceutical products fell to £38,7mn and recorded a decrease of 10,1%. Exports of clothing fell to £9,8mn and showed a decline of 38,7% compared to 2002, while exports of cigarettes rose to £6,8mn or increased by 50,5%.

- As regards the **construction** activity, local sales of cement increased by 10,1% during January-December 2003 compared to 2002. The volume of building permits authorised, which is a leading indicator of the future performance of construction activity, increased by 14,8%.

- During the first two months of 2004, local sales of cement recorded an increase of 4,1% compared to January-February 2003.

- At the end of December 2003, the number of **registered unemployed** rose to 14.691 or 4,4% of the economically active population, compared to 12.344 or 3,8% of the economically active population in December 2002.

- At the end of March 2004 the registered unemployed fell to 4,1% of the economically active population, compared to 4,7% in February 2004.

- During January-December 2003, **motor vehicle registrations** reached a total number of 40.362, remaining stagnant compared to 2002. Registrations of private saloon cars increased to 27.753 or increased by 6,6% while light goods vehicles fell to 3.923 and recorded a decrease of 38,9%.

- Total motor vehicles registrations during January-March 2004 showed an increase of 14%. Private saloon cars increased by 20,8% while light goods vehicles registrations decreased by 17,6% compared to January-March 2003.

- **Consumer demand** during January-December 2003 as indicated by the retail sales index, showed a decrease of 1,2% in nominal terms, and a decrease of 2,7% in real terms.

- The rate of **inflation** as measured by the consumer price index, showed an average increase of 4,1% in 2003. The prices of local products increased by 7,3% and by 4,4% that of services, while the prices of imported products decreased by 2,4%.

- During January-March consumer price index increased by 1,4%, the price of local products by 3,5%, that of services by 2,8% while the price index of imported products decreased by 6,2%.

- During January-December 2003, total **imports** fell to £2.301,6mn or decreased by 7,4%, compared to 2002. Total **exports** fell to £476,8mn or decreased by 6,7%. Domestic exports including exports to ships and aircraft fell to £214,8mn or decreased by 7,3% while re-exports including shipstores, fell to £262,0mn or decreased by 6,3%.

- In January 2004 total imports registered an increase of 5,6% while total exports declined by 8,6%

- The **balance of payments** current account, showed a deficit of £152,0mn during January-December 2003 compared to a deficit of £330,9mn in January-December 2002.

- The **total liquidity** of the private sector during January-December 2003, expanded at a lower seasonally adjusted growth rate (on an annual basis) of 4,0%, compared to a 10,3% growth rate in January-December 2002. A deceleration was also observed in the expansion of the claims on the private sector, which increased by 5,1% in January-December 2003, compared to an 8,0% growth rate in 2002.

- The **Cyprus Stock Market** after a continuous fall in the past few years, shows a stabilising trend during 2003 and the all-share price index reached 80,58 units in December 2003, while the overall index reached 85,64 units in March 2004.

Composite Leading Indicator for the Overall Economic Activity

For the improvement of short-term economic analysis the Statistical Service compiles composite indicators for the Cyprus economy, by bringing together a number of individual indicators.

The most important of the indicators constructed is the composite leading indicator for the overall economic activity, which is concerned with identifying turning points of the business cycle earlier than the other customary monthly economic data - it reflects forthcoming trends in economic activity with a lead of about six months. For the compilation of the leading indicator, a number of economic series has been used which, by their nature, demonstrate predictive potential and can thus provide an indication of the performance of the Cyprus economy in the near future.

The causes, consequences, duration and magnitude of changes in an economy vary and therefore the composite indicators, which extend to a wide range of economic activities, can provide a better evaluation of the fluctuations than do individual indicators separately. Composite indicators are less affected by irregular fluctuations and therefore the inaccuracies that may exist in individual indicators are significantly reduced.

The methodology adopted for compiling the composite indicators involves the use of the X-11 Programme of the U.S. Bureau of the Census to seasonally adjust the component series, the computation of moving averages for smoothing irregular variations, the detrending of the series and, after some further adjustments, the combination of the various series to composite indicators using the arithmetic mean.

The series included in the compilation of the composite leading indicator for the overall economic activity are: the number of vacancies outstanding at the District Labour Offices; building permits authorised; registrations of motor vehicles; price index of shares; money supply; the exchange rate of the pound sterling to the Cyprus pound; the composite leading indicator for tourism; and the business climate indicators for manufacturing, tourism and services.

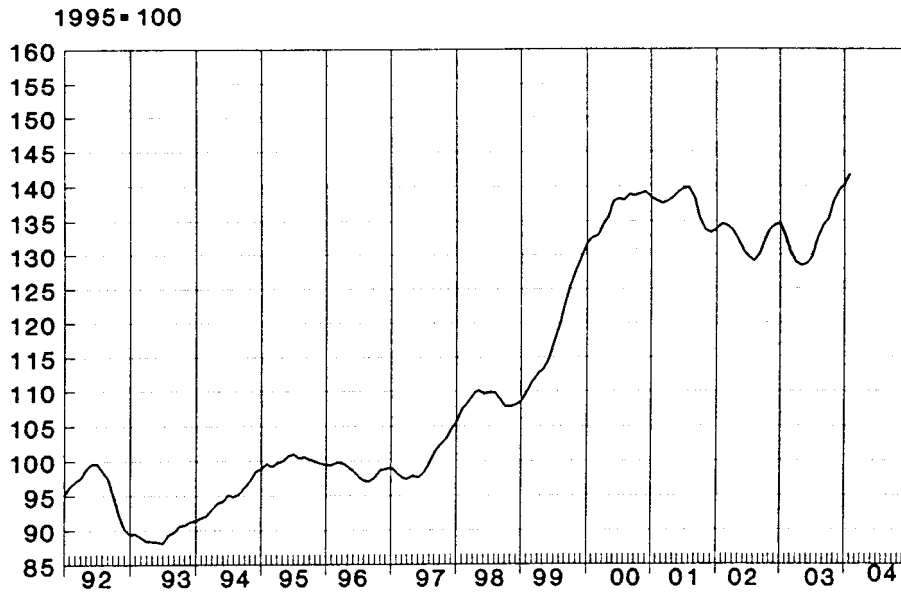

On the basis of the latest available data, the composite leading indicator for the overall economic activity (figure 1) showed an increasing trend from May 2003 to January 2004. (It should be noted that the composite leading indicator from August 2002 to January 2004 is based on an incomplete set of data and is subject to revision).

It should be emphasised that the composite indicators do not measure the absolute level of output or actual rates of growth but are concerned only with identifying the cyclical variations around the long-term trend. In particular, the leading indicator provides early indications of cyclical turning points in economic activity. For example, a downturn in the leading indicator indicates that there will be a downturn in the business cycle, i.e., a reduction in the growth rate below that of its long-term trend, but it does not necessarily imply a negative growth rate.

Composite Leading Indicator for Tourism

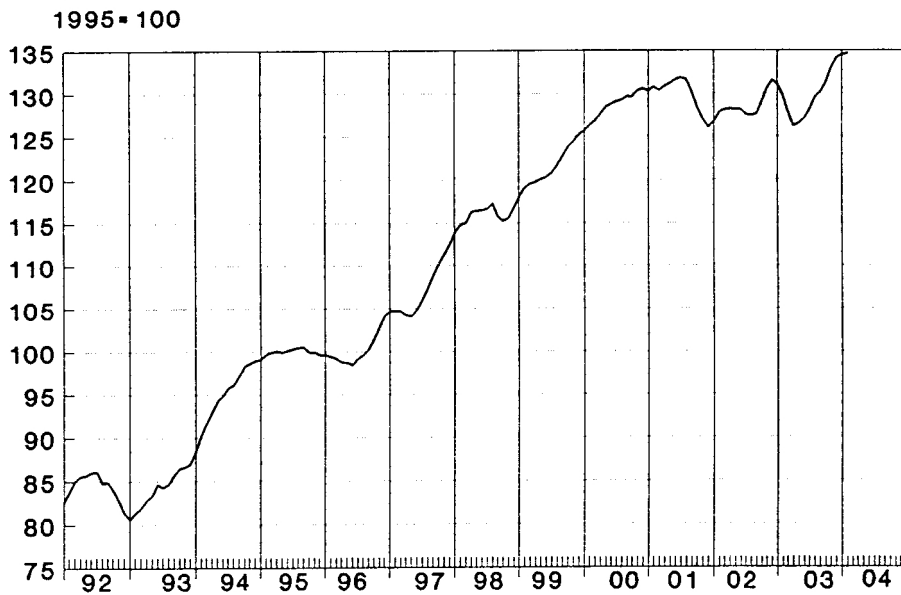

The series included in the construction of the composite leading indicator for tourism are: the composite leading indicator for the E.U.; the consumer confidence indicator for the E.U.; the exchange rate of a number of foreign currencies relative to the Cyprus pound (inverted), weighted according to the proportion of visitors to Cyprus using these currencies; the level of consumer prices in Cyprus in relation to those in the E.U. (inverted); existing bed capacity in tourist accommodation; business position expectations in the hotel industry for the next six months; demand expectations in the hotel industry for the next threemonths; and price expectations in the hotel industry for the next three months.

FIGURE 1: COMPOSITE LEADING INDICATOR FOR THE OVERALL ECONOMIC ACTIVITY

Note: The leading indicator from August 2002 to January 2004 is based on an incomplete set of data and is subject to revision.

FIGURE 2: COMPOSITE LEADING INDICATOR FOR TOURISM

Note: The leading indicator from December 2003 to January 2004 is based on an incomplete set of data and is subject to revision.

The composite leading indicator for tourism (figure 2) showed an increasing trend from April 2003 onwards. (It should be noted that the composite leading indicator from December 2003 to January 2004 is based on an incomplete set of data and is subject to revision). These developments are shown in the diagrams on page 12

Business and Consumer Survey Results for the E.U.

According to the latest results of the European Commission business and consumer surveys, the leading economic indicator for the EU15, (compiled from the industrial, construction, consumer and the retail trade confidence indicators) improved slightly by 0,1 points in March 2004 compared to February 2004. The indicator increased to a level of 96,8 from 96,7 and 96,2 in December 2003. The marginal increase of 0,1 point of the leading economic indicator in March 2004 is due to improvements in the construction (1 point), and retail trade (1 point) confidence indicators. Confidence indicators in the industry sector and the consumer confidence remained steady.

World Economic Developments

According to the Statistical Office of the European Communities (Eurostat), (see summary table 3 on page 31) the euro-zone inflation in 2003 was 2,1% and 2,0% in EU15. Lowest 12-month averages up to December 2003, were recorded in Germany (1,0%), Austria and Finland (both 1,3%) and the highest were in Ireland (4,0%), Portugal (3,3%) and Spain (3,1%).

Euro-zone inflation fell from 1,9% in January 2004 to 1,6% in February 2004 while EU15 inflation fell from 1,8% to 1,5%. Lowest rate in February 2004 was recorded in Sweden (0,2%) and the highest in Greece (2,6%)

The seasonally adjusted unemployment rate in December 2003 was 8,8% in Euro-zone and 8,0% in EU15. The lowest unemployment rate was recorded in Luxembourg (3,9%) and the highest unemployment rate was recorded in Spain (11,2%).

In February 2004 the seasonally adjusted unemployment rate stood at 8,8% in Euro-zone and 8,0% in the EU15 unchanged compared to January 2004 and December 2003.

According to the latest "World Economic Outlook", (see table on page 14) prepared by the IMF staff and published in September 2003, world output is projected to expand by 4,1% in 2004, compared to a 3,2% growth rate in 2003.

World trade volume (goods and services) is expected to expand by 5,5% in 2004 compared to a 2,9% increase in 2003.

The average price of oil in U.S. dollars is assumed to fall to \$25.50 a barrel in 2004 from \$28.50 in 2003.

Source: "IMF, World Economic Outlook", September 2003

According to the Autumn 2003 economic forecasts published by the services of the European Commission (based on available data up to 20 of October, 2003) GDP in the euro area is estimated to expand by 1,8 in 2004 approaching 2,3% in 2005 compared to a 0,4% in 2003. Recovery in economic performance in 2004 and 2005 is explained by an expected recovery in consumer expenditure supported by a growing external demand, and by recovery in investment

The expected rise in the unemployment rate remained limited. It is expected to reach 9,1% in 2004 and 8,9% in 2005, compared to a 8,9% in 2003.

Inflation in the euro area is expected to fall at 2,0% in 2004 and 1,7% in 2005 from 2,1% in 2003.

The main features of the Autumn 2003 forecasts for the principal macro-economic aggregates of the euro area, as prepared by the Directorate-General II for Economic and Financial Affairs of the European Commission, are summarized in the table below.

**MAIN ECONOMIC INDICATORS FOR THE
EURO AREA, 2001-2005**

DEFINITIONS AND EXPLANATORY NOTES

AGRICULTURE

Volume Indices of Agricultural Production: The indices cover crop and livestock production and are based on data on the local sales and exports of the various products, slaughterings of animals, and other information from secondary sources. As all other indices in this report, the index is base weighted of the Laspeyres type; the weights of the various products are proportional to their total value at producer prices in 1995.

MINING AND QUARRYING

Volume Index of Mining and Quarrying Production: The index is compiled from data on the production of minerals and quarrying materials obtained from the Mines Department and mining enterprises, supplemented with data from other sources. The weights utilised are proportional to the value of the various products at producer prices in 1995.

MANUFACTURING

Volume Index of Manufacturing Production: It is compiled from data on the quantities of the main products manufactured by a representative sample of enterprises; in the case of heterogeneous products where no quantity measurement is possible, value indices are compiled, deflated by corresponding price indices. The weights given to the various industries are proportional to their value added in 1995, derived from the 1995 Industrial Production Survey.

ELECTRICITY, GAS AND WATER

Volume Indices of Production: The indices are based on data on the billed consumption of electricity (i.e., excluding the amount of electricity supplied to the areas occupied by the Turkish invading forces), sales of gas, sales of the Water Boards and the quantity of water purified.

VOLUME INDEX OF INDUSTRIAL PRODUCTION

This is a composite index of the volume indices of mining and quarrying, manufacturing, electricity, gas and water.

ENERGY

Sales of Petroleum Products are compiled from monthly returns submitted by the petroleum companies. They include sales to industrial establishments, petrol stations, ships, aircraft, military forces, and others. Data for heavy fuel oil include also direct imports by the Electricity Authority and the cement industries. The cement industries also use coal partly in substitution of fuel oil.

Electricity: Data on the production of electricity pertain to the Electricity Authority of Cyprus only. They refer to gross production i.e. the amount of electric energy produced as metered at the output terminals of all sets in the power stations. Consumption figures refer to the billed sales of the Electricity Authority.

CONSTRUCTION

Labour Cost Index: The index measures variations in the average hourly labour cost for manual workers in the construction sector. Labour cost comprises the basic wage-rate, the cost of living allowance, and the employers' contributions to the Social Insurance, Medical, Provident, Holiday, Annual Leave with Pay, 56th Week, Redundancy and Industrial Training Funds. The index is compiled from data for the main occupations taken from the paylists of a representative sample of building contractors. The weights utilised for the compilation of the overall index are based on the wage-bill for the various occupations in March 1989.

Price Index of Construction Materials: The price index is based on an extensive list of the main construction materials. The index measures price changes which are compiled monthly from the main distributors or producers of construction materials. The weights of the various materials are proportional to their respective values at market prices in the base year 1995.

TRANSPORT AND COMMUNICATION

Volume Indices of Output for Transport and Communication: The indices cover land, water and air transport, travel agencies, telecommunications and postal services. They are compiled from data obtained in a monthly sample survey, relating to the number of passengers, kilometres and freight tonnage conveyed, for transport enterprises and travel agencies; the number of local and international telephone/telex calls and telegrams, for telecommunications; and the number of letters and parcels handled by post offices. The weights allocated to the various activities are proportional to their gross output in 1995.

New Registrations of Motor-Vehicles: The data refer to both new and second-hand vehicles. License "A" is for heavy or light goods vehicles carrying loads for reward and Licence "B" refers to vehicles carrying loads for the owner's account.

RETAIL SALES

Value and Volume Indices of Retail Sales are compiled from data collected in a monthly survey covering a sample of retailers in the major urban areas. Separate indices are compiled for ten commodity categories which are considered representative of consumer demand. The volume indices are obtained by deflating the value indices of the various categories by suitable retail price indices. The weights allocated to the various commodity categories are proportional to their total retail sales value in 1995, derived from the Distributive Trades Survey of 1995.

FOREIGN TRADE

Source of Data: Foreign trade statistics are compiled from the declarations made by importers and exporters on the completed customs documents which are received by the Statistical Service after they have been cleared by Customs. Transit trade is excluded. Exports are in FOB values and imports in CIF values.

Total Imports comprise all merchandise imported whether or not they are intended for use in Cyprus, or for re-export; they include goods cleared directly by Customs at the time of importation and goods imported and placed into bonded warehouses.

Imports for Home Consumption include goods cleared by Customs at the time of importation and goods withdrawn from bonded warehouses, for home consumption.

Total Exports include domestic exports and re-exports.

Domestic Exports are goods which have been produced, manufactured or partly manufactured in Cyprus.

Re-exports are goods originally imported and re-exported in the same condition in which they were imported, or after undergoing repair or minor operations which leave them essentially unchanged.

MONETARY STATISTICS

All Banks: These include: the Bank of Cyprus, the Arab Bank PLC, the National Bank of Greece (Cyprus), the National Bank of Greece S.A., the Cyprus Popular Bank, the Hellenic Bank, the Alpha Bank, the Co-operative Central Bank, the Commercial Bank of Greece S.A., the Universal Bank, the Mortgage Bank of Cyprus, the Cyprus Development Bank, the Housing Finance Corporation and the Societe Generale Cyprus.

Total Liquidity consists of currency outside all banks and demand, savings and time deposits held by the domestic private sector, public corporations and municipalities, with all banks.

Money Supply (or primary liquidity) comprises currency held by the public and demand deposits.

Quasi-Money (or secondary liquidity) consists of savings, time deposits and residents' foreign currency.

Monetary Statistics relating to Co-operative Financial Institutions are published, in addition to the statistics compiled by the Central Bank, in order to give a more complete picture of short-term developments in the monetary sector. The data are compiled by the Department of Co-operative Development.

PRICES

Consumer Price Index: The index measures changes in the retail prices of goods and services consumed by private households. It is based on the price movements of a representative selection of goods and services. The prices of

the various items are collected once a month, on a Thursday nearest to the middle of each month; fruit and vegetables are collected on a weekly basis (every Thursday), and rents on a monthly basis. The base year is 1998 and the weights are based on the results of the Household Consumption Expenditure survey.

Price Index of Manufacturing Production: The index aims to measure the variations in the average ex-factory prices of the main manufactured products sold in the home market and exported. It is compiled from data on the prices prevailing as on the first Thursday of each month (excluding discounts, commissions and excise duties), obtained from a representative sample of manufacturers. The weights of the various industries are proportional to their output in 1995.

Commercial Rent Index

The index is compiled from data collected in a sample survey covering most sectors of economic activity except agriculture, mining and quarrying, electricity, gas and water, where premises are mainly owner-occupied. The general rent index is the weighted average of the sectoral indices. The weights are proportional to the total amount of rents paid in the various sectors in the base year 1990 derived from the various sectoral surveys.

LABOUR

Employment data are based on the results of a monthly survey covering all establishments employing 30 or more persons and a rotating probability sample of establishments employing up to 29 persons. They refer to the average number of persons employed during the month, and part-time employees are converted into full-time equivalent on the basis of the number of hours worked. The data include working proprietors and working partners, unpaid family workers, and persons temporarily absent from work, eg. on sick leave, casual leave or vacation.

Registered Unemployment comprises all persons who are registered as unemployed at the District Labour Offices on the last day of each month, and are currently available for work. It includes persons receiving unemployment benefit under the Social Insurance Scheme as well as those not entitled to any benefit.

TOURISM

Travellers: Are all persons who pass through passport control at the ports and airports of Cyprus. The various categories of travellers are tourists, excursionists, residents, emigrants or immigrants and families of British Military Personnel.

Source of data: From 14.6.1991-May 1997, the statements prepared by airline and shipping companies were the main source of data for tourism and migration statistics. These statements provide information only on the total number of passengers on each flight/route. Thus from the second half of 1991-May 1997 data for most categories of travellers are based on

estimations. As from June 1997 the figures for the various categories of travellers are based on the results of the Passenger Survey carried out at airports / ports by the Statistical Service.

PUBLIC FINANCE

Consolidated Accounts of Central Government: These include the Ordinary and Development Budgets, the Relief Fund for the Displaced and Affected Persons, the Public Loans Fund, the Social Security Funds, the Sinking Funds, the Cyprus Grain Commission and other funds.

SHORT-TERM BUSINESS PROSPECTS

A Business Trends Survey was launched by the Statistical Service in September 1993. It covers the sectors of manufacturing, retail trade, tourism (hotels and hotel apartments) and business services (such as legal services, accounting and auditing services, data processing and computer services, architects and civil engineers, advertising and market research services, economic research offices and other business and management consultants). The survey for tourism and retail trade is conducted on a monthly basis. The survey for manufacturing and business services was conducted on a monthly basis until 1994 and on a quarterly basis as from 1995.

Most of the questions in the Survey involve a three-point scale. For instance, for a question concerning an assessment of the present business position of an enterprise, the answers are good (+) /satisfactory(=) /bad(-). Analysis of the results employs the net balance of positive (good) over negative (bad) replies.

NOTES ON THE TABLES

Seasonally Adjusted and Moving Average Series

Certain series are presented in seasonally adjusted form and as a moving average of deseasonalised figures. The seasonal adjustment factors have been derived from running the data through the Seasonal Adjustment Program of the U.S. Bureau of the Census. The reader can obtain the seasonal adjustment indices for any month by dividing the actual data by the seasonally adjusted figures, which in the tables are designated by the shorthand expression sa. In view of the smallness and openness of the Cyprus economy, irregular or erratic disturbances can have a significant impact on the behaviour of certain time series. Thus, in series where irregular factors are estimated to be important, an appropriate moving average of seasonally adjusted monthly data is also presented. The moving average is referred to by the shorthand expression ma with the span of months it covers in brackets.

Rounding may lead to slight discrepancies between the sum of individual items and the totals in some tables.

Symbols and Abbreviations Used

0	nil or less than half the final digit shown
prov. or *	provisional, preliminary or estimated figure
proj	projected
+	indicates that the data have been revised since last issue
..	not applicable

Euro-zone	1,9	1,6	2,1	8,8	8,8	8,8
Denmark	1,0	0,7	2,0	6,1	n.a.	6,1
Sweden	1,3	0,2	2,3	6,0	6,4	6,0
United Kingdom	1,4	1,3	1,4	4,8	n.a.	n.a.
EU 15	1,8	1,5	2,0	8,0	8,0	8,0
Cyprus	1,8	1,9	4,1	4,4	4,7	4,7

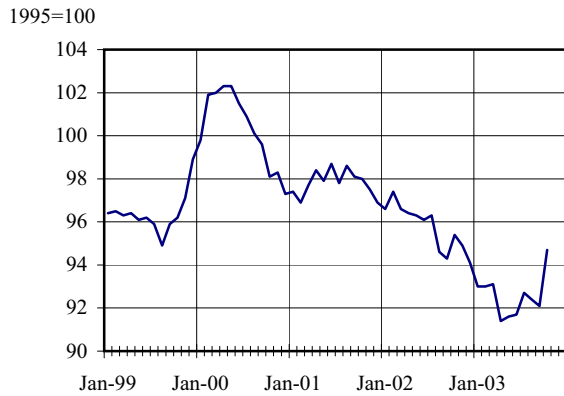

Note: 1. The data for E.U. countries refer to the Harmonised Indices of Consumer Prices (HICPs). HICPs are designed for international comparisons of consumer price inflation, required by the Treaty on European Union (Maastricht Treaty).
The CPIs for Cyprus is not strictly comparable with HICPs.

2. Unemployment series for Cyprus are not seasonally adjusted.

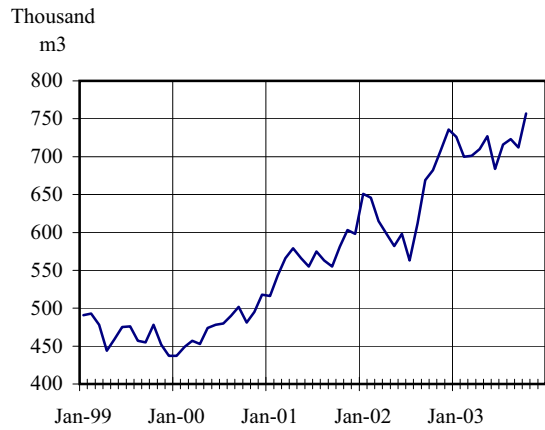

3. Euro-zone data as from January 2001 include Greece -up to end 2000 data cover the eleven member states excluding Greece.

TABLE 16

C O N S T R U C T I O N
Average (mean) Hourly Wage-rates for the Main Manual
Occupations in the Private Construction Sector

(£)

Occupation	2001	2002		2003			
	Jan.- Dec.	Jan.- June	July- Dec.	Jan.- Dec.	Jan.- June	July- Dec.	Jan.- Dec.
Mason	4,64	4,81	4,86	4,84	5,04	5,14	5,09
Concrete shutterer	4,64	4,80	4,86	4,83	5,03	5,12	5,08
Carpenter	4,49	4,71	4,78	4,75	4,93	5,02	4,98
Electrician	4,45	4,64	4,66	4,65	4,85	4,94	4,90
Welder	4,53	4,78	4,87	4,83	5,05	5,14	5,10
Painter	4,63	4,73	4,78	4,76	5,03	5,13	5,08
Ironbender	4,62	4,74	4,76	4,75	4,94	5,03	4,99
Labourer, male	3,77	3,95	4,00	3,98	4,18	4,23	4,21
Labourer, female	3,36	3,51	3,61	3,56	3,76	3,81	3,79
Engine-driver	4,63	4,79	4,85	4,82	5,04	5,15	5,10
Mechanic	4,60	4,76	4,81	4,79	4,95	5,08	5,02
Plumber	4,45	4,71	4,80	4,76	4,96	5,05	5,01
Driver	4,50	4,67	4,71	4,69	4,87	5,02	4,95

Note: The data are based on a monthly survey covering a representative sample of building contractors. They refer to the average (mean) hourly wage-rates (including the basic rate of pay and cost of living allowance) for normal hours of work, excluding overtime.

The data refer to the gross rates, before any deductions for income tax, etc. are made and they do not include the employers' contributions to Social Insurance and other funds. Apprentice workers are not covered.

Total	<u>6.856</u>	<u>7.669</u>	<u>879.726</u>	<u>7.548</u>	<u>8.807</u>	<u>1.030.477</u>
Big projects	518	3.495	359.152	691	4.037	431.487
Small projects	6.338	4.174	520.574	6.857	4.770	598.990

Notes:

1. Data refer to the private sector, municipalities and semi-government organizations. They exclude civil engineering projects and government buildings.
2. Big projects refer to projects of a declared building volume of 2.850 cubic metres or more (or of a total value of £50.000 and over in cases where no volume is stated).
3. The number and value of permits for all types of building include permits in which no volume is stated e.g. in the case of conversions.
