P R E F A C E

The “Monthly Economic Indicators” is designed to bring together selected economic indicators so as to capture significant short-term developments in the Cyprus economy. This report is produced directly from a computerised information storage system.

As far as possible, monthly data are presented for the last twenty-five months, quarterly data for the last eight quarters, and annual data for the last three years.

This edition refers to the first half of 2006 although in certain cases it also includes recently available data covering the months January-September 2006.

Most of the data are compiled by the Statistical Service. The indicators on the balance of payments, foreign exchange and the monetary sector are provided by the Central Bank of Cyprus and the Department of Co-operative Development. Part of the data on tourism is compiled by the Cyprus Tourism Organisation and the data on share price indices by the Cyprus Stock Exchange.

The co-ordination of the various series and the preparation of this publication were undertaken by Mrs A. Christodoulou, Mrs M. Constantinou and Mrs A. Sofroniou, under the supervision of Mr Zeitountsian, officer-in-charge of the National Accounts.

Sincere thanks and appreciation are extended to all government departments, semi-government organizations and private enterprises for their valuable assistance in providing the necessary data for this report.

P. Philippides
Director
Statistical Service

November, 2006

Latest economic developments	9-15
Monthly economic indicators for 2005 and 2006	16-17
Comparative indicators for 2003, 2004, 2005 and 2006	18-19
Definitions and explanatory notes.....	20-25
SUMMARY TABLES	
1. Monthly index of industrial production	29
2. International statistics of output, demand, prices and wages	30
3. International statistics of inflation and unemployment	31
GRAPHS	
Selected indicators	33-35
SECTIONS/TABLES	
AGRICULTURE	
1. Animals slaughtered in urban and rural slaughter-houses	39
2. Cows milk purchased by the Cyprus Milk Industry Organization (CMIO)	40
Exports of raw agricultural products	40
INDUSTRIAL	
3. Turnover index by nace.....	41
4. Turnover index by main industrial groupings.....	42
MINING AND QUARRYING	
5. Volume index of production	43
Value of production and exports	43
6. Production of main quarrying materials	44
MANUFACTURING	
7. Volume index of manufacturing production by major group of industry	45-49
8. Production of selected industrial products	50
9. Domestic exports of manufactured products	51-52
10. Comparative data for domestic exports of selected manufactured products	53
ENERGY	
11. Production, imports and sales of petroleum products	54
12. Sales of petroleum products by product	55-57
13. Production and consumption of electricity	58
14. Consumption of electricity by class of consumers	59-60
15. Consumption of electricity by economic activity	61-63
CONSTRUCTION	
16. Volume Index of production in construction.....	64
17. Price index of main construction materials	65
Index of labour cost in construction	65
18. Average hourly wage-rates for the main occupations in the private construction sector	66
19. Index of output prices in construction.....	67

20.	Local sales of cement	68
21.	Number, area and value of building permits authorised	69
22.	Building permits authorised by type of project	70
WHOLESALE AND RETAIL TRADE		
23.	Turnover value index of sale, maintenance and repair of motor vehicles and motorcycles and retail sale of automotive fuel	71
24.	Turnover value index of wholesale trade and commission trade.....	72-73
25.	Turnover value index of retail trade.....	74-75
26.	Turnover volume index of retail trade.....	76-77
SERVICES		
27.	Turnover index of hotels and restaurants.....	78
28.	Turnover index of computer and other business activities	79-80
TRANSPORT AND COMMUNICATION		
29.	Registrations of passenger cars and light goods vehicles ...	81
30.	Turnover value index in transport, storage and communication by activity	82
FOREIGN TRADE		
31.	Total exports	83
	Domestic exports	83
	Re-exports	83
32.	Total imports	84
	Imports for home consumption	84
33.	Imports for home consumption by economic destination ...	85
BALANCE OF PAYMENTS AND EXCHANGE RATES		
34.	Balance of payments summary	86
35.	Exchange rates	87
MONETARY INDICATORS		
36.	Total liquidity, money supply, quasi-money	88
37.	Net foreign assets	89
	Claims on private and public sectors	89
38.	Monetary indicators summary	90
39.	Interest rates	91
40.	Central bank short-term liquidity operations	92
41.	Interbank market	93
42.	Deposits and loans of co-operative credit institutions	94
43.	Analysis of deposits and loans, net liquid assets and liquidity ratio of co-operative credit institutions	95
44.	Analysis of loans of co-operative credit institutions	96
STOCK MARKET		
45.	Cyprus stock exchange share price indices	97
PRICES		
46.	Wholesale price index by economic origin	98
47.	Wholesale price index by economic destination	99
48.	Consumer price index by category	100-102
49.	Consumer price index by economic origin	103-104
50.	Price index of industrial production.....	105-106

51. Price index of manufacturing production by major group of industry	107-110
52. Price index of industrial production by economic destination	111

LABOUR

53. Employment by economic activity	112-115
54. Foreign workers in Cyprus by economic activity	116
55. Registered unemployed by economic activity	117-120
56. Unemployment from the Labour Force Survey	121-123
57. Vacancies notified and outstanding	124

TOURISM

58. Arrivals and departures of travellers	125
59. Arrivals of travellers by country of origin	126-127
60. Arrivals of tourists by country of usual residence.....	128-129
61. Arrivals of tourists and revenue estimates.....	130
62. Per person and per day expenditure of tourists and type of expenditure.....	131
63. Return of residents by country visited.....	132-133
64. Overnight stays in tourist accommodation establishments .	134
65. Bed occupancy rates in tourist accommodation establishments	135
66. Bed capacity in tourist accommodation establishments in operation	136
67. Number of beds in tourist accommodation establishments under construction	137

APPENDIX

1. Summary statistics, 2005-2006.....	141-145
---------------------------------------	---------

OUTLINE OF ECONOMIC DEVELOPMENTS

The economy continued its expansion through the year 2006, with the first and second quarter of the year showing real growth rates of 3,4% and 3,7% respectively.

More particularly, the main developments were as follows:

- During the period January-September 2006, arrivals of **travellers** (including excursionists) reached 2.928.385 showing an increase of 0,8%, while arrivals of tourists reached 1.951.169 recording a decrease of 2,3% compared to the same period of the previous year. **Revenue** from tourism is estimated at £1.005,7 mn compared to £982,3 in 2005 recording an increase of 2,4%.

- **Manufacturing production** during January-August 2006 showed a 2,0% decrease compared to 2005. The food, beverages & tobacco industry showed a decrease of 8,6% and the textiles & textile products industry recorded also a decrease of 17%.

Domestic exports of manufactured products rose to £112,4mn and recorded an increase of 2,6% during January-July 2006. Exports of pharmaceutical products rose to £30,5mn and recorded an increase of 2,4% compared to January-July 2005. Exports of clothing fell to £2,5mn and showed a decline of 8,3% and exports of cigarettes fell to £2,0mn or decreased by 68,4%.

- As regard the **construction** activity, local sales of cement increased by 1,0% during January-September 2006. The area of building permits authorised, which is a leading indicator of the future performance of construction activity, increased by 6,9% during January-July 2006.

- At the end of September 2006, the number of **registered unemployed** rose to 11.092, compared to 11.549 in September 2005.

- As regard the **unemployment from the Labour Force Survey** the unemployment rate amounted to 4,1% or 15.176 persons of the labour force (males 3,4% or 7.048 persons and females 5,0% or 8.128) while in the 1st quarter the rate was 5,9% or 21.993 persons (males 5,3% and females 6,6%) and the corresponding quarter of 2005 the rate was 5,4% or 19.678 persons (males 4,3% and females 6,7%). The improvement in the unemployment rate is due to the reactivation of the tourism sector. Also the unemployment rate for young persons aged 15-24 recorded a decrease and reached 8,7% of the labour force of the same age group from 12,0% in the previous quarter and 12,7% in the corresponding quarter of 2005.

- During January-September 2006, **motor vehicle registrations** reached a total number of 38.043, recording a decrease of 0,1% compared to the same period of the previous year. Registrations of private saloon

cars fell to 27.100 or decreased by 4,5%, while light goods vehicles rose to 3.120 and recorded an increase of 15%.

- **Consumer demand** during January-August 2006 as indicated by the turnover index of retail trade, showed an increase of 8,2% in nominal terms and an increase of 6,4% in real terms.

- The rate of **inflation** as measured by the consumer price index, showed an average increase of 2,9% during January-September 2006. The prices of local products increased by 4,7% and those of services by 2,5%, while the prices of imported products also increased by 1,7%.

- During January-August 2006, total **imports** rose to £2.152.7mn or increased by 17,5%. Total **exports** fell to £416.1mn or decreased by 3,5%.

- The **balance of payments** current account showed a deficit of £337,5mn during January-June 2006 compared to a deficit of £108,1mn in January-June 2005.

- The **total Money Supply** at the end of September 2006, expanded at a higher growth rate (on an annual basis) of 14,9%, compared to a 7,6% growth rate at the end of September 2005. An increase was observed in the expansion of the claims on the private sector, which rose to 15,2 % in September 2006, compared to a 5,0% growth rate in September 2005.

- The **Cyprus Stock Market** shows an increasing trend during 2006 and the all-share price index raised to 3.476,8 units in October 2006, compared to 2.948,0 units in September 2006 and 1.565,7 units in October 2005.

Composite Leading Indicator for the Overall Economic Activity

For the improvement of short-term economic analysis the Statistical Service compiles composite indicators for the Cyprus economy, by bringing together a number of individual indicators.

The most important of the indicators constructed is the composite leading indicator for the overall economic activity, which is concerned with identifying turning points of the business cycle earlier than the other customary monthly economic data - it reflects forthcoming trends in economic activity with a lead of about six months. For the compilation of the leading indicator, a number of economic series has been used which, by their nature, demonstrate predictive potential and can thus provide an indication of the performance of the Cyprus economy in the near future.

The causes, consequences, duration and magnitude of changes in an economy vary and therefore the composite indicators, which extend to a wide range of economic activities, can provide a better evaluation of the fluctuations than do individual indicators separately. Composite indicators are less affected by irregular fluctuations and therefore the inaccuracies that may exist in individual indicators are significantly reduced.

The methodology adopted for compiling the composite indicators involves the use of the X-11 Programme of the U.S. Bureau of the Census to seasonally adjust the component series, the computation of moving averages for smoothing irregular variations, the detrending of the series and, after some further adjustments, the combination of the various series to composite indicators using the arithmetic mean.

The series included in the compilation of the composite leading indicator for the overall economic activity are: the number of vacancies outstanding at the District Labour Offices; building permits authorised; registrations of motor vehicles; price index of shares; money supply; the exchange rate of the pound sterling to the Cyprus pound; the composite leading indicator for tourism; and the business climate indicators for manufacturing, tourism and services.

On the basis of the latest available data, the composite leading indicator for the overall economic activity (figure 1) shows a deterioration since July 2006. (It should be noted that the composite leading indicator from May 2006 up to August 2006, is based on an incomplete set of data and is subject to revision).

It should be emphasised that the composite indicators do not measure the absolute level of output or actual rates of growth but are concerned only with identifying the cyclical variations around the long-term trend. In particular, the leading indicator provides early indications of cyclical turning points in economic activity. For example, a downturn in the leading indicator indicates that there will be a downturn in the business cycle, i.e., a reduction in the growth rate below that of its long-term trend, but it does not necessarily imply a negative growth rate.

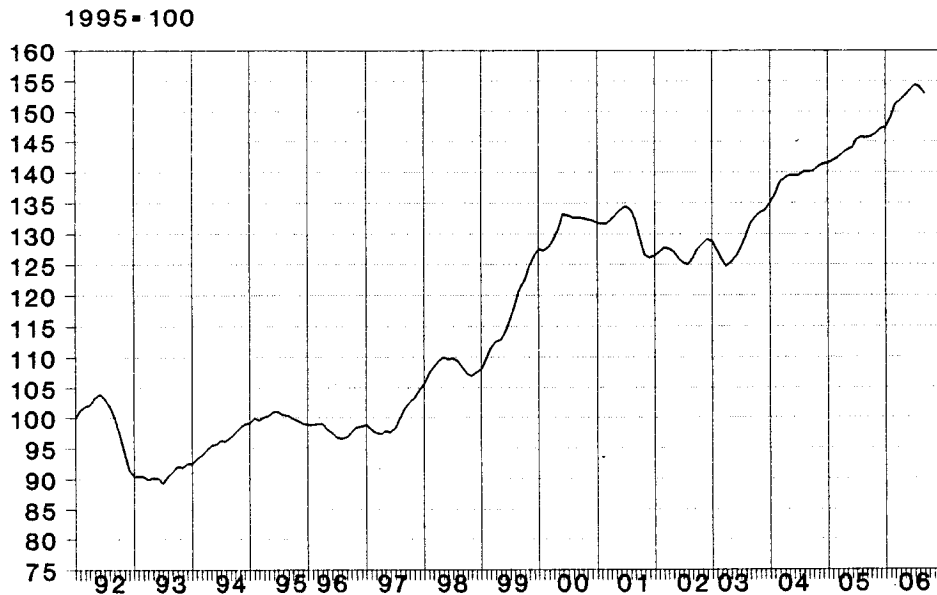

Composite Leading Indicator for Tourism

The series included in the construction of the composite leading indicator for tourism are: the composite leading indicator for the E.U.; the consumer confidence indicator for the E.U.; the exchange rate of a number of foreign currencies relative to the Cyprus pound (inverted), weighted according to the proportion of visitors to Cyprus using these currencies; the level of consumer prices in Cyprus in relation to those in the E.U. (inverted); existing bed capacity in tourist accommodation; business position expectations in the hotel industry for the next six months; demand expectations in the hotel industry for the next threemonths; and price expectations in the hotel industry for the next three months.

The composite leading indicator for tourism (figure 2) shows a decrease in August 2006. These developments are shown in the diagrams on page 12.

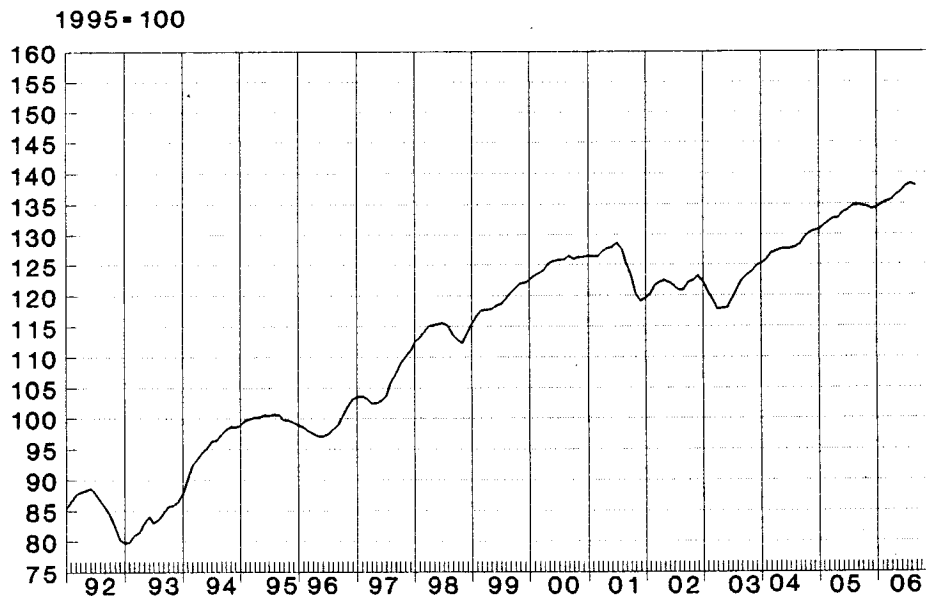

The indicator since December 2005 was in an upward trend up to July 2006. (It should be noted that the composite leading indicator for July and August 2006, is based on an incomplete set of data and is subject to revision).

FIGURE 1: COMPOSITE LEADING INDICATOR FOR THE OVERALL ECONOMIC ACTIVITY

Note: The indicator from May 2006 up to August 2006 is based on an incomplete set of data and is subject to revision.

FIGURE 2: COMPOSITE LEADING INDICATOR FOR TOURISM

Note: The leading indicator for July and August 2006 is based on an incomplete set of data and is subject to revision.

Business and Consumer Survey Results for the E.U.

According to the latest results of the European Commission business and consumer surveys, the economic sentiment indicator for the EU-25, increased by 0,5 points in October 2006 compared to September 2006. The ESI is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). The increase of 0,5 points is due to an improvement in services (1 point), and Consumer (1 point), confidence indicators. There was decline in the retail trade (1 point) and construction (1 point) confidence indicators. Confidence indicator in industry remained steady compared to September 2006.

World Economic Developments

According to the Statistical Office of the European Communities (Eurostat), (see summary table 3 on page 31) inflation in the EU-25 in September 2006 rose to 1,9% compared to September 2005. The lowest inflation rates were recorded in Finland (0,8%), Germany (1,0%), Sweden (1,2%) and the highest rates were recorded in Hungary and Latvia (5,9%), Slovakia (4,5%) and Estonia (3,8%). For Cyprus, the harmonised index of consumer prices rose to 2,2% in September 2006 compared to September 2005.

The EU-25 seasonally adjusted unemployment rate remained steady at 8,0% in August 2006 and July 2006. In August 2006, the lowest unemployment rates were recorded in Denmark (3,7%), the Netherlands (3,8%) and Estonia (4,2%) and the highest unemployment rates were recorded in Poland (15,0%), Slovakia (13,1%) and France (8,8%).

According to the latest “World Economic Outlook”, (see table on page 14) prepared by the IMF staff and published in April 2006, world output is projected to expand by 4,9% in 2006 and 4,7% in 2007, compared to a 4,8% growth rate in 2005.

World trade volume (goods and services) is expected to expand by 8,0% in 2006 and 7,5% in 2007, compared to a 7,3% increase in 2005.

The average price of oil in U.S. dollars was \$53.35 in 2005 and the assumed price is \$61.25 for 2006 and \$63.00 for 2007.

(1) Simple average of spot prices of U.K. Brent, Dubai, and West Texas Intermediate crude oil.

(2) Average, based on world commodity export weights.

(3) London interbank offered rate.

Source: "IMF, World Economic Outlook", April 2006

According to the Spring 2006 economic forecasts published by the services of the European Commission (based on available data up to 24 of April, 2006) GDP in the EU-25 is estimated to expand by 1,6% in 2005, approaching to 2,3% in 2006 and slowing down to 2,2% in 2007.

The unemployment rate is expected to fall from 8,7% in 2005 to 8,5% in 2006 and to 8,2% in 2007.

Inflation is expected to fall from 2,2% in 2005, to 2,1% in 2006 and rising again to 2,2% in 2007.

The main features of the Spring 2006 forecasts for the principal macro-economic aggregates of the EU-25, as prepared by the Directorate-General II for Economic and Financial Affairs of the European Commission, are summarized in the table below.

**MAIN ECONOMIC INDICATORS FOR THE
EU-25, 2003-2007**

	Spring 2006 Forecast				
	2003	2004	2005	2006	2007
GDP growth ^(a)	1,2	2,4	1,6	2,3	2,2
Consumption ^(a)	1,5	2,0	1,5	1,9	1,7
Total investment ^(a)	0,9	3,0	2,9	4,4	3,1
Employment ^(a)	0,3	0,6	0,8	0,9	0,8
Unemployment rate ^(b)	9,0	9,1	8,7	8,5	8,2
Inflation ^(c)	1,9	2,1	2,2	2,1	2,2
Government balance (% GDP)	-3,0	-2,6	-2,3	-2,3	-2,2
Government debt (% GDP)	62,0	62,4	63,4	63,2	62,9
Current account balance (%GDP)	0,1	0,0	-0,3	-0,9	-0,7

(a) Real annual percentage change.

(b) Percentage of the labour force.

(c) Harmonised index of consumer prices, nominal change.

5. ⁴ On 2/1/2006, the old CSE General Index was suspended and the Index of Main and Parallel market

DEFINITIONS AND EXPLANATORY NOTES

INDUSTRIAL

Turnover Index of Industrial Sector: It is compiled from the monthly turnover of a representative sample of enterprises. The weights given to the various industries are proportional to their turnover in 2000, derived from the Census of Industrial Production.

Volume Index of Industrial Production: This is a composite index of the volume indices of mining and quarrying, manufacturing, electricity, gas and water.

MINING AND QUARRYING

Volume Index of Mining and Quarrying Production: The index is compiled from data on the production of minerals and quarrying materials obtained from the Mines Department and mining enterprises, supplemented with data from other sources. The weights utilised are proportional to the value of the various products at producer prices in 2000.

MANUFACTURING

Volume Index of Manufacturing Production: It is compiled from data on the quantities of the main products manufactured by a representative sample of enterprises; in the case of heterogeneous products where no quantity measurement is possible, value indices are compiled, deflated by corresponding price indices. The weights given to the various industries are proportional to their value added in 2000, derived from the 2000 Census of Industrial Production.

ELECTRICITY, GAS AND WATER

Volume Indices of Production: The indices are based on data on the billed consumption of electricity (i.e., excluding the amount of electricity supplied to the areas occupied by the Turkish invading forces), sales of gas, sales of the Water Boards and the quantity of water purified.

ENERGY

Sales of Petroleum Products are compiled from monthly returns submitted by the petroleum companies. They include sales to industrial establishments, petrol stations, ships, aircraft, military forces, and others. Data for heavy fuel oil include also direct imports by the Electricity Authority and the cement industries. The cement industries also use coal partly in substitution of fuel oil.

Electricity: Data on the production of electricity pertain to the Electricity Authority of Cyprus only. They refer to gross production i.e. the amount of electric energy produced as metered at the output terminals of all sets in the power stations. Consumption figures refer to the billed sales of the Electricity Authority.

CONSTRUCTION

Production Index: The index measures the quarterly changes in production value at constant prices. It is based on a sample of enterprises active in the construction sector. For the calculation of the index and for every quarter the information collected is either work done, or turnover or hours worked by the production personnel (according to the enterprise) and this output measures are then deflated by the Output Prices index.

Price Index of Construction Materials: The price index is based on an extensive list of the main construction materials. The index measures price changes, which are compiled monthly from the main distributors or producers of construction materials. The weights of the various materials are proportional to their respective values at market prices in the base year 2000.

Labour Cost Index: The index measures variations in the average hourly labour cost for manual workers in the construction sector. Labour cost comprises the basic wage-rate, the cost of living allowance, and the employers' contributions to the Social Insurance, Medical, Provident, Holiday, Annual Leave with Pay, 56th Week, Redundancy and Industrial Training Funds. The index is compiled from data for the main occupations taken from the paylists of a representative sample of building contractors. The weights utilised for the compilation of the overall index are based on the wage-bill for the various occupations in April 2000.

Output Prices Index: The quarterly index measures the movements in prices charged to clients of construction work. It is based on a sample of enterprises and a list of various construction tasks for which unit prices are requested. It is used also as a deflator for the calculation of the Production index.

TRANSPORT, STORAGE AND COMMUNICATION

Turnover Value Index for Transport, Storage and Communication: The Index covers Land, Water and Air Transport activities, Supporting and Auxiliary activities, Telecommunication and Postal Services. It is compiled from data obtained in a monthly sample survey, relating to the monthly turnover of the above activities. The weights allocated to the various activities are proportional to their turnover in 2000.

New Registrations of Motor-Vehicles: The data refer to both new and second-hand vehicles. License "A" is for heavy or light goods vehicles carrying loads for reward and Licence "B" refers to vehicles carrying loads for the owner's account.

DISTRIBUTIVE TRADE

Turnover Value and Volume Indices: Turnover Value Indices are compiled from data collected in a monthly survey covering a sample of enterprises. The Indices are published for a selected number of activities according to the STS-

Regulations. The weighting figure is the turnover of the activity measured by the Distributive Trade Survey of 2000.

Turnover Volume Indices of Retail Trade are calculated by deflating Turnover Value Indices of Retail Trade by a selected number of components from the HICP.

SERVICES

Turnover Value Index: The index measures the monthly changes in turnover. It is based on a sample of enterprises active in the services sector. The turnover is collected from the enterprises monthly and the results are presented quarterly. The weights of the various enterprises are proportional to their output in 2000.

FOREIGN TRADE

Source of Data: Foreign trade statistics with non –EU countries are compiled mainly from the electronic declarations made by the importers or their agents through the computerized system of Customs Authorities (Theseas System) (for imports) and the Single Administrative Document made by exporters or their agents (for exports). The statistics on trade with EU countries are compiled from the data received via Intrastat system and VAT returns.

Total Imports include all goods entered in the statistical territory of Cyprus either for free circulation or received into customs or excise warehouses from the rest of the world with the exception of simple transit.

Imports for Home Consumption include imports of goods from non-EU countries under special trade system and arrivals of goods from EU countries in local market either directly or withdrawn from excise warehouses.

Total Exports include exports of domestic goods (domestic exports) and foreign goods (re-exports of foreign goods).

Domestic Exports are exports of goods originating in the economic territory of Cyprus; if they have been wholly obtained in it or foreign goods, which were substantially transformed in Cyprus, so that the processing confers domestic origin. Goods originally imported and having undergone only repair or minor operations which leave them essentially unchanged are not defined as domestic. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and selling.

Re-exports (or foreign exports) are exports of goods originating in the rest of the world, i.e not included in the economic territory of Cyprus and compensating goods obtained under the outward processing procedure when such processing confers foreign origin.

MONETARY STATISTICS

All Banks: These include: the Bank of Cyprus, Public Company, the Arab Bank PLC, the National Bank of Greece (Cyprus), the National Bank of Greece S.A., the Cyprus Popular Bank, the Hellenic Bank, the Alpha Bank, the Co-operative Central Bank, the Universal Bank, the Mortgage Bank of Cyprus, the Cyprus Development Bank, the Housing Finance Corporation, the Societe Generale Cyprus and the Emporiki Bank-Cyprus.

Total Liquidity consists of currency outside all banks and demand, savings and time deposits held by the domestic private sector, public corporations and municipalities, with all banks.

Money Supply (or primary liquidity) comprises currency held by the public and demand deposits.

Quasi-Money (or secondary liquidity) consists of savings, time deposits and residents' foreign currency.

Monetary Statistics relating to Co-operative Financial Institutions are published, in addition to the statistics compiled by the Central Bank, in order to give a more complete picture of short-term developments in the monetary sector. The data are compiled by the Department of Co-operative Development.

PRICES

Consumer Price Index: The index measures changes in the retail prices of goods and services consumed by private households. It is based on the price movements of a representative selection of goods and services. The prices of the various items are collected once a month, on a Thursday nearest to the middle of each month; fruit and vegetables are collected on a weekly basis (every Thursday), and rents on a monthly basis. The base year is 2005 and the weights are based on the results of the Household Consumption Expenditure survey.

Price Index of Industrial Production: The index aims to measure the variations in the average ex-factory prices of the main manufactured products sold in the home market and exported. It is compiled from data on the prices prevailing as on the first Thursday of each month (excluding discounts, commissions and excise duties), obtained from a representative sample of manufacturers. The weights of the various industries are proportional to their output in 2000.

Commercial Rent Index

The index is compiled from data collected in a sample survey covering most sectors of economic activity except agriculture, mining and quarrying, electricity, gas and water, where premises are mainly owner-occupied. The general rent index is the weighted average of the sectoral indices. The weights are proportional to the total amount of rents paid in the various sectors in the base year 1990 derived from the various sectoral surveys.

LABOUR

Employment data are based on the results of a quarterly survey covering all establishments employing 30 or more persons and a rotating probability sample of establishments employing up to 29 persons. They refer to the average number of persons employed during the month, and part-time employees are converted into full-time equivalent on the basis of the number of hours worked. The data include working proprietors and working partners, unpaid family workers, and persons temporarily absent from work, eg. on sick leave, casual leave or vacation.

Registered Unemployment comprises all persons who are registered as unemployed at the District Labour Offices on the last day of each month, and are currently available for work. It includes persons receiving unemployment benefit under the Social Insurance Scheme as well as those not entitled to any benefit.

UNEMPLOYMENT FROM THE LABOUR FORCE SURVEY

Unemployed: Persons aged 15 years and over who comply to the following standards:

- Neither worked nor had a job from which they were temporarily absent during the reference week.
- They had actively sought for work, i.e. had taken specific steps during the previous 4 weeks to find work
- They were available to start work within the 2 weeks following the reference week

and/or,

- Persons who neither worked nor had a job from which they were temporarily absent, but found a job which will start within a period of at most 3 months
- They were available to start work within the 2 weeks following the reference week.

Labour Force: The total number of the employed and unemployed persons aged 15 years and over.

Unemployment rate: The number of unemployed persons of any age group expressed as a percentage of the labour force in the same age group.

TOURISM

Travellers: Are all persons who pass through passport control at the ports and airports of Cyprus. The various categories of travellers are visitors, residents, and emigrants or immigrants.

Source of data: From 14.6.1991-May 1997, the statements prepared by airline and shipping companies were the main source of data for tourism and migration statistics. These statements provided information only on the total number of passengers on each flight/route. Thus from the second half of 1991-May 1997 data for most categories of travellers are based on

estimations. As from June 1997 the figures for the various categories of travellers are based on the results of the Passenger Survey carried out at airports / ports by the Statistical Service.

NOTES ON THE TABLES

Seasonally Adjusted and Moving Average Series

Certain series are presented in seasonally adjusted form and as a moving average of deseasonalised figures. The seasonal adjustment factors have been derived from running the data through the Seasonal Adjustment Program of the U.S. Bureau of the Census. The reader can obtain the seasonal adjustment indices for any month by dividing the actual data by the seasonally adjusted figures, which in the tables are designated by the shorthand expression sa. In view of the smallness and openness of the Cyprus economy, irregular or erratic disturbances can have a significant impact on the behaviour of certain time series. Thus, in series where irregular factors are estimated to be important, an appropriate moving average of seasonally adjusted monthly data is also presented. The moving average is referred to by the shorthand expression ma with the span of months it covers in brackets.

Rounding may lead to slight discrepancies between the sum of individual items and the totals in some tables.

Symbols and Abbreviations Used

0	nil or less than half the final digit shown
prov. or *	provisional, preliminary or estimated figure
proj	projected
+	indicates that the data have been revised since last issue
..	not applicable
mn	million
000's	thousand
m.t.	metric ton
sq m	square metre
act	actual data
sa	seasonally adjusted data
ma	moving average
min	minimum
n.a.	not available

Currency Unit Used

1 Cyprus pound (£) = 100 cents

Changes in this issue:

All seasonally adjusted and moving average series have been revised on the basis of updated seasonal adjustment factors and appropriate monthly spans for moving averages.

SUMMARY TABLES & GRAPHS

Note: The data are based on a monthly survey covering a representative sample of building contractors. They refer to the average (mean) hourly wage-rates (including the basic rate of pay and cost of living allowance) for normal hours of work, excluding overtime.

The data refer to the gross rates, before any deductions for income tax, etc. are made and they do not include the employers' contributions to Social Insurance and other funds. Apprentice workers are not covered.

- Notes: 1. "Other accommodation" includes tourist apartments, furnished apartments, hotels without star, tourist villas, guest houses, tourist villages, traditional buildings and tourist campsites.
2. The data for the last quarter of 1999 onwards are not strictly comparable with data for previous periods, owing to a change in the method of calculating bed capacity in hotel apartments in operation.
