## **P R E F A C E**

The “Monthly Economic Indicators” is designed to bring together selected economic indicators so as to capture significant short-term developments in the Cyprus economy. This report is produced directly from a computerised information storage system.

As far as possible, monthly data are presented for the last twenty-five months, quarterly data for the last eight quarters, and annual data for the last three years.

This edition refers to the first half of 2007 although in certain cases it also includes recently available data covering the months July - August 2007.

Most of the data are compiled by the Statistical Service. The indicators on the balance of payments, foreign exchange and the monetary sector are provided by the Central Bank of Cyprus and the Department of Co-operative Development. Part of the data on tourism is compiled by the Cyprus Tourism Organisation and the data on share price indices by the Cyprus Stock Exchange.

The co-ordination of the various series and the preparation of this publication were undertaken by Mrs A. Christodoulou, Mrs M. Constantinou and Mrs A. Sofroniou, under the supervision of Mr Zeitountsian, officer-in-charge of the National Accounts.

Sincere thanks and appreciation are extended to all government departments, semi-government organizations and private enterprises for their valuable assistance in providing the necessary data for this report.

G. Chr. Georgiou  
Director  
Statistical Service

September, 2007

## CONTENTS

	<u>Page</u>
<b>INTRODUCTION</b>	
Latest economic developments .....	9-15
Monthly economic indicators for 2006 and 2007 .....	16-17
Comparative indicators for 2004, 2005, 2006 and 2007 .....	18-19
Definitions and explanatory notes.....	20-25
<b>SUMMARY TABLES</b>	
1. Monthly index of industrial production .....	29
2. International statistics of inflation and unemployment .....	30
<b>GRAPHS</b>	
Selected indicators .....	33-35
<b>SECTIONS/TABLES</b>	
<b>AGRICULTURE</b>	
1. Animals slaughtered in urban and rural slaughter-houses .....	39
2. Cows milk purchased by the Cyprus Milk Industry Organization (CMIO) .....	40
Exports of raw agricultural products .....	40
<b>INDUSTRIAL</b>	
3.Turnover index by nace.....	41
4.Turnover index by main industrial groupings.....	42
<b>MINING AND QUARRYING</b>	
5. Volume index of production .....	43
Value of production and exports .....	43
6. Production of main quarrying materials .....	44
<b>MANUFACTURING</b>	
7. Volume index of manufacturing production by major group of industry .....	45-49
8. Production of selected industrial products .....	50
9. Domestic exports of manufactured products .....	51-52
10. Comparative data for domestic exports of selected manufactured products .....	53
<b>ENERGY</b>	
11. Production, imports and sales of petroleum products .....	54
12. Sales of petroleum products by product .....	55-57
13. Production and consumption of electricity .....	58
14. Consumption of electricity by class of consumers .....	59-60
15. Consumption of electricity by economic activity .....	61-63
<b>CONSTRUCTION</b>	
16. Volume Index of production in construction.....	64
17. Price index of main construction materials .....	65
Index of labour cost in construction .....	65
18. Average hourly wage-rates for the main occupations in the private construction sector .....	66
19. Index of output prices in construction.....	67

20. Local sales of cement .....	68
21. Number, area and value of building permits authorised .....	69
22. Building permits authorised by type of project .....	70
<b>WHOLESALE AND RETAIL TRADE</b>	
23. Turnover value index of sale, maintenance and repair of motor vehicles and motorcycles and retail sale of automotive fuel .....	71
24. Turnover value index of wholesale trade and commission trade.....	72-73
25. Turnover value index of retail trade.....	74-75
26. Turnover volume index of retail trade.....	76-77
<b>SERVICES</b>	
27. Turnover index of hotels and restaurants.....	78
28. Turnover index of computer and other business activities .....	79-80
<b>TRANSPORT AND COMMUNICATION</b>	
29. Registrations of passenger cars and light goods vehicles .....	81
30. Turnover value index in transport, storage and communication by activity .....	82
<b>FOREIGN TRADE</b>	
31. Total exports .....	83
Domestic exports .....	83
Re-exports .....	83
32. Total imports .....	84
Imports for home consumption .....	84
33. Imports for home consumption by economic destination .....	85
<b>BALANCE OF PAYMENTS AND EXCHANGE RATES</b>	
34. Balance of payments summary .....	86
35. Exchange rates .....	87
<b>MONETARY INDICATORS</b>	
36. Total liquidity, money supply, quasi-money .....	88
37. Net foreign assets .....	89
Claims on private and public sectors .....	89
38. Monetary indicators summary .....	90
39. Interest rates .....	91
40. Central bank short-term liquidity operations .....	92
41. Interbank market .....	93
42. Deposits and loans of co-operative credit institutions .....	94
43. Analysis of deposits and loans, net liquid assets and liquidity ratio of co-operative credit institutions .....	95-96
44. Analysis of loans of co-operative credit institutions .....	97-98
<b>STOCK MARKET</b>	
45. Cyprus stock exchange share price indices .....	99
<b>PRICES</b>	
46. Wholesale price index by economic origin .....	100
47. Wholesale price index by economic destination .....	101
48. Consumer price index by category .....	102-104
49. Consumer price index by economic origin .....	105-106
50. Price index of industrial production.....	107-108

51. Price index of manufacturing production by major group of industry .....	109-112
52. Price index of industrial production by economic destination .....	113
<b>LABOUR</b>	
53. Employment by economic activity .....	114-117
54. Foreign workers in Cyprus by economic activity .....	118
55. Registered unemployed by economic activity .....	119-122
56. Unemployment from the Labour Force Survey .....	123-125
57. Vacancies notified and outstanding .....	126
<b>TOURISM</b>	
58. Arrivals and departures of travellers .....	127
59. Arrivals of travellers by country of origin .....	128-129
60. Arrivals of tourists by country of usual residence.....	130-131
61. Arrivals of tourists and revenue estimates.....	132
62. Per person and per day expenditure of tourists and type of expenditure.....	133
63. Return of residents by country visited.....	134-135
64. Overnight stays in tourist accommodation establishments ....	136
65. Bed occupancy rates in tourist accommodation establishments .....	137
66. Bed capacity in tourist accommodation establishments in operation .....	138
67. Number of beds in tourist accommodation establishments under construction .....	139
<b>APPENDIX</b>	
1. Summary statistics, 2006-2007.....	143-146

## **OUTLINE OF ECONOMIC DEVELOPMENTS**

The economy continued its expansion through the year 2007, with the first and second quarter of the year showing real growth rates of 4,0% and 3,7% respectively.

More particularly, the main developments were as follows:

- During the period January-August 2007, arrivals of **travellers** (including excursionists) reached 2.578.389 showing an increase of 2,3%, while arrivals of tourists reached 1.657.052 recording also an increase of 0,1% compared to the same period of the previous year. **Revenue** from tourism for January-June 2007 is estimated at £396,0mn compared to £387,3mn in January-June 2006 recording an increase of 2,2%.
- **Manufacturing production** during January-July 2007 showed an increase of 3,2% compared to 2006. The food, beverages & tobacco industry showed an increase of 1,9% and the textiles & textile products industry recorded also an increase of 3,3%.

Domestic exports of manufactured products rose to £107,2mn and recorded an increase of 12,6% during January-June 2007. Exports of pharmaceutical products rose to £27,6mn and recorded an increase of 8,2% compared to January-June 2006. Exports of clothing fell to £2,0mn showing a decline of 8,8% and exports of cigarettes rose to £2,2mn or increased by 25,5%.

- As regard the **construction** activity, local sales of cement increased by 11,0% during January-August 2007. The area of building permits authorised, which is a leading indicator of the future performance of construction activity, increased by 5,3% during January-June 2007.
- At the end of August 2007, the number of **registered unemployed** fell to 11.783, compared to 12.852 in August 2006.
- As regard the **unemployment from the Labour Force Survey**, the number of unemployed persons in the 1<sup>st</sup> quarter of 2007 amounted to 18.808 representing a rate of 4,8% of the labour force. The unemployment rate for males was 4,2% or 8.933 persons, whereas for females the rate was 5,7% or 9.875. In the 4<sup>th</sup> quarter of 2006 the number of unemployed persons was 16.034 or 4,2% (males 3,7% and females 4,9%). The respective rate for the 1<sup>st</sup> quarter of 2006 was 5,9% or 21.993 persons (males 5,3% and females 6,6%).  
The analysis of the unemployed persons by age in the 1<sup>st</sup> quarter of 2007 shows that the unemployment rate is higher for young persons aged 15-24, which accounted for 10,9% of the labour force of the same age group (males 11,3% and females 10,6%). In the 4<sup>th</sup> quarter of 2006 the rate was 10,5% (males 9,6% and females 11,6%). In the 1<sup>st</sup> quarter of 2006 the respective rate was 12,0% (males 12,6% and females 11,4%).
- During January-August 2007, **motor vehicle registrations** reached a total number of 45.349, recording an increase of 33,2% compared to the same period of the previous year. Registrations of private

saloon cars rose to 33.328 or increased by 36,8% and light goods vehicles also rose to 3.787 recording an increase of 41,3%.

- **Consumer demand** during January-July 2007 as indicated by the turnover index of retail trade, showed an increase of 10,6% in nominal terms and an increase of 7,6% in real terms.
- The rate of **inflation** as measured by the consumer price index, showed an average increase of 1,9% during January-August 2007. The prices of local products increased by 4,1% and those of services by 3,4%, while the prices of imported products decreased by 2,1%.
- During January-August 2007, total **imports** rose to £2.031,4mn or increased by 8,2%. Total **exports** fell to £385,0mn or decreased by 2,9%.
- The **balance of payments** current account showed a deficit of £267,5mn during January-March 2007 compared to a deficit of £210,6mn in January-March 2006.
- The **total Money Supply** at the end of August 2007, expanded at a higher growth rate (on an annual basis) of 19,7%, compared to a 13,3% growth rate at the end of August 2006. An increase was observed in the expansion of the claims on the private sector, which rose to 24,2 % in August 2007, compared to a 14,2% growth rate in August 2006.
- The **Cyprus Stock Market** shows an increasing trend during 2007 and the all-share price index rose to 4.983,9 units in August 2007 from 3.900,4 units at the end of year 2006.

### **Composite Leading Indicator for the Overall Economic Activity**

For the improvement of short-term economic analysis the Statistical Service compiles composite indicators for the Cyprus economy, by bringing together a number of individual indicators.

The most important of the indicators constructed is the composite leading indicator for the overall economic activity, which is concerned with identifying turning points of the business cycle earlier than the other customary monthly economic data - it reflects forthcoming trends in economic activity with a lead of about six months. For the compilation of the leading indicator, a number of economic series has been used which, by their nature, demonstrate predictive potential and can thus provide an indication of the performance of the Cyprus economy in the near future.

The causes, consequences, duration and magnitude of changes in an economy vary and therefore the composite indicators, which extend to a wide range of economic activities, can provide a better evaluation of the fluctuations than do individual indicators separately. Composite indicators are less affected by irregular fluctuations and therefore the inaccuracies that may exist in individual indicators are significantly reduced.

The methodology adopted for compiling the composite indicators involves the use of the X-11 Programme of the U.S. Bureau of the Census to seasonally adjust the component series, the computation of moving averages for smoothing irregular variations, the detrending of the series and, after some further adjustments, the combination of the various series to composite indicators using the arithmetic mean.

The series included in the compilation of the composite leading indicator for the overall economic activity are: the number of vacancies outstanding at the District Labour Offices; building permits authorised; registrations of motor vehicles; price index of shares; money supply; the exchange rate of the pound sterling to the Cyprus pound; the composite leading indicator for tourism; and the business climate indicators for manufacturing, tourism and services.

On the basis of the latest available data, the composite leading indicator for the overall economic activity (figure 1) shows an improvement since September 2006. (It should be noted that the composite leading indicator from May 2007 up to July 2007, is based on an incomplete set of data and is subject to revision).

It should be emphasised that the composite indicators do not measure the absolute level of output or actual rates of growth but are concerned only with identifying the cyclical variations around the long-term trend. In particular, the leading indicator provides early indications of cyclical turning points in economic activity. For example, a downturn in the leading indicator indicates that there will be a downturn in the business cycle, i.e., a reduction in the growth rate below that of its long-term trend, but it does not necessarily imply a negative growth rate.

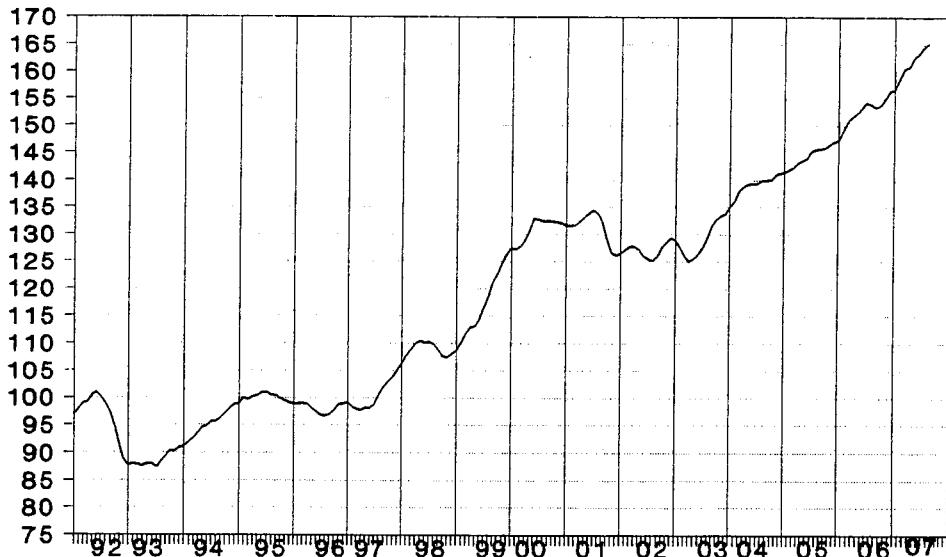

### **Composite Leading Indicator for Tourism**

The series included in the construction of the composite leading indicator for tourism are: the composite leading indicator for the E.U.; the consumer confidence indicator for the E.U.; the exchange rate of a number of foreign currencies relative to the Cyprus pound (inverted), weighted according to the proportion of visitors to Cyprus using these currencies; the level of consumer prices in Cyprus in relation to those in the E.U. (inverted); existing bed capacity in tourist accommodation; business position expectations in the hotel industry for the next six months; demand expectations in the hotel industry for the next three months; and price expectations in the hotel industry for the next three months.

The composite leading indicator for tourism (figure 2) shows an improvement from October 2006 up to June 2007. In July 2007 a small decline of the index is observed but it should be noted that the composite leading indicator for July 2007, is based on an incomplete set of data and is subject to revision. These developments are shown in the diagrams on page 12.

**FIGURE 1: COMPOSITE LEADING INDICATOR FOR THE OVERALL ECONOMIC ACTIVITY**

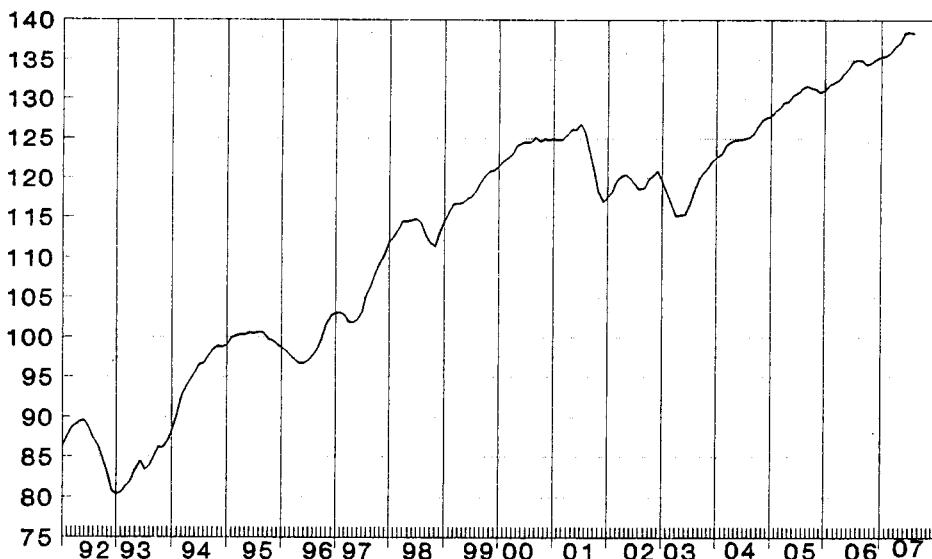

1995 = 100

Note: The indicator from May 2007 to July 2007  
is based on an incomplete set of data  
and is subject to revision.

**FIGURE 2: COMPOSITE LEADING INDICATOR FOR TOURISM**

1995 = 100

Note: The leading indicator for July 2007  
is based on an incomplete set of data  
and is subject to revision.

### **Business and Consumer Survey Results for the E.U.**

According to the latest results of the European Commission business and consumer surveys, the economic sentiment indicator for the EU-27, decreased by 0,1 point in August 2007 compared to July 2007. The ESI is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). The decrease of 0,1 point in ESI is the outcome of a decrease in Consumer confidence indicator (1 point), of an increase in Services and Retail Trade indicators (1 point) and of no change in Industry and Construction confidence indicators.

### **World Economic Developments**

**According to the Statistical Office of the European Communities (Eurostat)**, (see summary table 2 on page 30) inflation in the EU-27 in August 2007 rose to 1,9 % compared to August 2006. The lowest inflation rates were recorded in Malta (0,6%), Denmark (0,9%), Netherlands (1,1%), Belgium, Slovakia and Sweden (1,2%), whereas the highest rates were recorded in Latvia (10,2%), Bulgaria (9,3%) and Hungary (7,1%).

The EU-27 seasonally adjusted unemployment rate decreased to 6,8% in July 2007 compared to June 2007. In July 2007, the lowest unemployment rates were recorded in Denmark (3,2%), in Netherlands (3,4%) and Cyprus (4,1%), whereas the highest unemployment rates were recorded in Slovakia (10,6%), Poland (9,7%) and France (8,5%).

**According to the latest “World Economic Outlook”**, (see table on page 14) prepared by the IMF staff and published in April 2007, world output is projected to expand by 4,9% in 2007 and remain steady to 4,9% in 2008, compared to a 5,4% growth rate in 2006.

World trade volume (goods and services) is expected to expand by 7,0% in 2007 and 7,4% in 2008, compared to a 9,2% increase in 2006.

The average price of oil in U.S. dollars was \$64.27 in 2006 and the assumed price is \$60.75 for 2007 and \$64.75 for 2008.

**WORLD ECONOMIC OUTLOOK FOR 2006 AND 2007**  
**(annual percentage change unless otherwise noted)**

(1) Simple average of spot prices of U.K. Brent, Dubai, and West Texas Intermediate crude oil.

(2) Average, based on world commodity export weights.

(3) London interbank offered rate.

Source: "IMF, World Economic Outlook", April 2007

**According to the Spring 2007 economic forecasts published by the services of the European Commission** (based on available data up to 23<sup>rd</sup> of April, 2007) GDP in the EU-27 is estimated to slow down from 3,0% in 2006 to 2,9% in 2007 and further down to 2,7% in 2008.

The unemployment rate is expected to fall from 7,9% in 2006 to 7,2% in 2007 and to 6,7% in 2008.

Inflation is expected to fall from 2,3% in 2006 to 2,2% in 2007 and to 2,1% in 2008.

The main features of the Spring 2007 forecasts for the principal macro-economic aggregates of the EU-27, as prepared by the Directorate-General II for Economic and Financial Affairs of the European Commission, are summarized in the table below.

#### **MAIN ECONOMIC INDICATORS FOR THE EU-27, 2004-2008**

	<u>Spring 2007 Forecast</u>				
	2004	2005	2006	2007	2008
GDP growth <sup>(a)</sup>	2,5	1,7	3,0	2,9	2,7
Consumption <sup>(a)</sup>	2,1	1,7	2,2	2,5	2,6
Total investment <sup>(a)</sup>	3,2	3,1	5,6	5,2	4,2
Employment <sup>(a)</sup>	0,8	0,9	1,5	1,4	1,1
Unemployment rate <sup>(b)</sup>	9,0	8,7	7,9	7,2	6,7
Inflation <sup>(c)</sup>	2,3	2,3	2,3	2,2	2,1
Government balance (% GDP)	-2,7	-2,4	-1,7	-1,2	-1,0
Government debt (% GDP)	62,2	62,9	61,7	59,9	58,3
Current account balance (%GDP)	0,2	-0,5	-0,7	-0,7	-0,8

(a) Real annual percentage change.

(b) Percentage of the labour force.

(c) Harmonised index of consumer prices, nominal change.

Notes

1. D.L.O.=District Labour Offices

2. <sup>1</sup> Absolute difference.

3: <sup>2</sup> Statistics cover the Commercial Banks, the Co-operative Central Bank (excluding the Co-operative Credit Institutions) and other Financial Institutions

4: <sup>3</sup> The data from May onwards is estimated by the Central Bank of Cyprus from a sample of co-operative credit institutions, which represents approximately 97% of the value of deposits and loan

5: <sup>4</sup> On 21/1/2006, the old CSE General Index was suspended and the Index of Main and Parallel market,

which had been introduced with the other new CSE Indexes on 3/9/2004, was renamed to CSE General Index

6. n.a= not applicable

## **DEFINITIONS AND EXPLANATORY NOTES**

### **INDUSTRIAL**

**Turnover Index of Industrial Sector:** It is compiled from the monthly turnover of a representative sample of enterprises. The weights given to the various industries are proportional to their turnover in 2000, derived from the Census of Industrial Production.

**Volume Index of Industrial Production:** This is a composite index of the volume indices of mining and quarrying, manufacturing, electricity, gas and water.

### **MINING AND QUARRYING**

**Volume Index of Mining and Quarrying Production:** The index is compiled from data on the production of minerals and quarrying materials obtained from the Mines Department and mining enterprises, supplemented with data from other sources. The weights utilised are proportional to the value of the various products at producer prices in 2000.

### **MANUFACTURING**

**Volume Index of Manufacturing Production:** It is compiled from data on the quantities of the main products manufactured by a representative sample of enterprises; in the case of heterogeneous products where no quantity measurement is possible, value indices are compiled, deflated by corresponding price indices. The weights given to the various industries are proportional to their value added in 2000, derived from the 2000 Census of Industrial Production.

### **ELECTRICITY, GAS AND WATER**

**Volume Indices of Production:** The indices are based on data on the billed consumption of electricity (i.e., excluding the amount of electricity supplied to the areas occupied by the Turkish invading forces), sales of gas, sales of the Water Boards and the quantity of water purified.

### **ENERGY**

**Sales of Petroleum Products** are compiled from monthly returns submitted by the petroleum companies. They include sales to industrial establishments, petrol stations, ships, aircraft, military forces, and others. Data for heavy fuel oil include also direct imports by the Electricity Authority and the cement industries. The cement industries also use coal partly in substitution of fuel oil.

**Electricity:** Data on the production of electricity pertain to the Electricity Authority of Cyprus only. They refer to gross production i.e. the amount of electric energy produced as metered at the output terminals of all sets in the power stations. Consumption figures refer to the billed sales of the Electricity Authority.

## **CONSTRUCTION**

**Production Index:** The index measures the quarterly changes in production value at constant prices. It is based on a sample of enterprises active in the construction sector. For the calculation of the index and for every quarter the information collected is either work done, or turnover or hours worked by the production personnel (according to the enterprise) and this output measures are then deflated by the Output Prices index.

**Price Index of Construction Materials:** The price index is based on an extensive list of the main construction materials. The index measures price changes, which are compiled monthly from the main distributors or producers of construction materials. The weights of the various materials are proportional to their respective values at market prices in the base year 2000.

**Labour Cost Index:** The index measures variations in the average hourly labour cost for manual workers in the construction sector. Labour cost comprises the basic wage-rate, the cost of living allowance, and the employers' contributions to the Social Insurance, Medical, Provident, Holiday, Annual Leave with Pay, 56th Week, Redundancy and Industrial Training Funds. The index is compiled from data for the main occupations taken from the paylists of a representative sample of building contractors. The weights utilised for the compilation of the overall index are based on the wage-bill for the various occupations in April 2000.

**Output Prices Index:** The quarterly index measures the movements in prices charged to clients of construction work. It is based on a sample of enterprises and a list of various construction tasks for which unit prices are requested. It is used also as a deflator for the calculation of the Production index.

## **TRANSPORT, STORAGE AND COMMUNICATION**

**Turnover Value Index for Transport, Storage and Communication:** The Index covers Land, Water and Air Transport activities, Supporting and Auxiliary activities, Telecommunication and Postal Services. It is compiled from data obtained in a monthly sample survey, relating to the monthly turnover of the above activities. The weights allocated to the various activities are proportional to their turnover in 2000.

**New Registrations of Motor-Vehicles:** The data refer to both new and second-hand vehicles. License "A" is for heavy or light goods vehicles carrying loads for reward and Licence "B" refers to vehicles carrying loads for the owner's account.

## **DISTRIBUTIVE TRADE**

**Turnover Value and Volume Indices:** Turnover Value Indices are compiled from data collected in a monthly survey covering a sample of enterprises. The Indices are published for a selected number of activities according to the STS-

Regulations. The weighting figure is the turnover of the activity measured by the Distributive Trade Survey of 2000.

Turnover Volume Indices of Retail Trade are calculated by deflating Turnover Value Indices of Retail Trade by a selected number of components from the HICP.

## SERVICES

**Turnover Value Index:** The index measures the monthly changes in turnover. It is based on a sample of enterprises active in the services sector. The turnover is collected from the enterprises monthly and the results are presented quarterly. The weights of the various enterprises are proportional to their output in 2000.

## FOREIGN TRADE

**Source of Data:** Foreign trade statistics with non –EU countries are compiled mainly from the electronic declarations made by the importers or their agents through the computerized system of Customs Authorities (Theseas System) (for imports) and the Single Administrative Document made by exporters or their agents (for exports). The statistics on trade with EU countries are compiled from the data received via Intrastat system and VAT returns.

**Total Imports** include all goods entered in the statistical territory of Cyprus either for free circulation or received into customs or excise warehouses from the rest of the world with the exception of simple transit.

**Imports for Home Consumption** include imports of goods from non-EU countries under special trade system and arrivals of goods from EU countries in local market either directly or withdrawn from excise warehouses.

**Total Exports** include exports of domestic goods (domestic exports) and foreign goods (re-exports of foreign goods).

**Domestic Exports** are exports of goods originating in the economic territory of Cyprus; if they have been wholly obtained in it or foreign goods, which were substantially transformed in Cyprus, so that the processing confers domestic origin. Goods originally imported and having undergone only repair or minor operations which leave them essentially unchanged are not defined as domestic. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and selling.

**Re-exports (or foreign exports)** are exports of goods originating in the rest of the world, i.e not included in the economic territory of Cyprus and compensating goods obtained under the outward processing procedure when such processing confers foreign origin.

## **MONETARY STATISTICS**

**All Banks:** These include: the Bank of Cyprus, Public Company, the Arab Bank PLC, the National Bank of Greece (Cyprus), the National Bank of Greece S.A., the Cyprus Popular Bank, the Hellenic Bank, the Alpha Bank, the Co-operative Central Bank, the Universal Bank, the Mortgage Bank of Cyprus, the Cyprus Development Bank, the Housing Finance Corporation, the Societe Generale Cyprus and the Emporiki Bank-Cyprus.

**Total Liquidity** consists of currency outside all banks and demand, savings and time deposits held by the domestic private sector, public corporations and municipalities, with all banks.

**Money Supply** (or primary liquidity) comprises currency held by the public and demand deposits.

**Quasi-Money** (or secondary liquidity) consists of savings, time deposits and residents' foreign currency.

**Monetary Statistics relating to Co-operative Financial Institutions** are published, in addition to the statistics compiled by the Central Bank, in order to give a more complete picture of short-term developments in the monetary sector. The data are compiled by the Department of Co-operative Development.

## **PRICES**

**Consumer Price Index:** The index measures changes in the retail prices of goods and services consumed by private households. It is based on the price movements of a representative selection of goods and services. The prices of the various items are collected once a month, on a Thursday nearest to the middle of each month; fruit and vegetables are collected on a weekly basis (every Thursday), and rents on a monthly basis. The base year is 2005 and the weights are based on the results of the Household Consumption Expenditure survey.

**Price Index of Industrial Production:** The index aims to measure the variations in the average ex-factory prices of the main manufactured products sold in the home market and exported. It is compiled from data on the prices prevailing as on the first Thursday of each month (excluding discounts, commissions and excise duties), obtained from a representative sample of manufacturers. The weights of the various industries are proportional to their output in 2000.

## **Commercial Rent Index**

The index is compiled from data collected in a sample survey covering most sectors of economic activity except agriculture, mining and quarrying, electricity, gas and water, where premises are mainly owner-occupied. The general rent index is the weighted average of the sectoral indices. The weights are proportional to the total amount of rents paid in the various sectors in the base year 1990 derived from the various sectoral surveys.

## LABOUR

**Employment** data are based on the results of a quarterly survey covering all establishments employing 30 or more persons and a rotating probability sample of establishments employing up to 29 persons. They refer to the average number of persons employed during the month, and part-time employees are converted into full-time equivalent on the basis of the number of hours worked. The data include working proprietors and working partners, unpaid family workers, and persons temporarily absent from work, eg. on sick leave, casual leave or vacation.

**Registered Unemployment** comprises all persons who are registered as unemployed at the District Labour Offices on the last day of each month, and are currently available for work. It includes persons receiving unemployment benefit under the Social Insurance Scheme as well as those not entitled to any benefit.

## UNEMPLOYMENT FROM THE LABOUR FORCE SURVEY

**Unemployed:** Persons aged 15 years and over who comply to the following standards:

- Neither worked nor had a job from which they were temporarily absent during the reference week.
- They had actively sought for work, i.e. had taken specific steps during the previous 4 weeks to find work
- They were available to start work within the 2 weeks following the reference week

and/or,

- Persons who neither worked nor had a job from which they were temporarily absent, but found a job which will start within a period of at most 3 months
- They were available to start work within the 2 weeks following the reference week.

**Labour Force:** The total number of the employed and unemployed persons aged 15 years and over.

**Unemployment rate:** The number of unemployed persons of any age group expressed as a percentage of the labour force in the same age group.

## TOURISM

**Travellers:** Are all persons who pass through passport control at the ports and airports of Cyprus. The various categories of travellers are visitors, residents, and emigrants or immigrants.

**Source of data:** From 14.6.1991-May 1997, the statements prepared by airline and shipping companies were the main source of data for tourism and migration statistics. These statements provided information only on the total number of passengers on each flight/route. Thus from the second half of 1991-May 1997 data for most categories of travellers are based on

estimations. As from June 1997 the figures for the various categories of travellers are based on the results of the Passenger Survey carried out at airports / ports by the Statistical Service.

## NOTES ON THE TABLES

### Seasonally Adjusted and Moving Average Series

Certain series are presented in seasonally adjusted form and as a moving average of deseasonalised figures. The seasonal adjustment factors have been derived from running the data through the Seasonal Adjustment Program of the U.S. Bureau of the Census. The reader can obtain the seasonal adjustment indices for any month by dividing the actual data by the seasonally adjusted figures, which in the tables are designated by the shorthand expression sa. In view of the smallness and openness of the Cyprus economy, irregular or erratic disturbances can have a significant impact on the behaviour of certain time series. Thus, in series where irregular factors are estimated to be important, an appropriate moving average of seasonally adjusted monthly data is also presented. The moving average is referred to by the shorthand expression ma with the span of months it covers in brackets.

**Rounding** may lead to slight discrepancies between the sum of individual items and the totals in some tables.

## Symbols and Abbreviations Used

0	nil or less than half the final digit shown
prov. or *	provisional, preliminary or estimated figure
proj	projected
+	indicates that the data have been revised since last issue
..	not applicable
mn	million
000's	thousand
m.t.	metric ton
sq m	square metre
act	actual data
sa	seasonally adjusted data
ma	moving average
min	minimum
n.a.	not available

## Currency Unit Used

1 Cyprus pound (£) = 100 cents

## Changes in this issue:

All seasonally adjusted and moving average series have been revised on the basis of updated seasonal adjustment factors and appropriate monthly spans for moving averages.

Note: The data are based on a monthly survey covering a representative sample of building contractors. They refer to the average (mean) hourly wage-rates (including the basic rate of pay and cost of living allowance) for normal hours of work, excluding overtime.

The data refer to the gross rates, before any deductions for income tax, etc. are made and they do not include the employers' contributions to Social Insurance and other funds. Apprentice workers are not covered.

Notes:

1. Data refer to permits issued to the private sector, municipal authorities and semi-government organisations.

Government projects are excluded.

2. Big projects are those with a declared area of 900m<sup>2</sup> and over.

3. The number and value of permits for all types of buildings include permits in which no volume is stated e.g. in the case of conversions.
