P R E F A C E

The “Monthly Economic Indicators” is designed to bring together selected economic indicators so as to capture significant short-term developments in the Cyprus economy. This report is produced directly from a computerised information storage system.

As far as possible, monthly data are presented for the last twenty-five months, quarterly data for the last eight quarters, and annual data for the last three years.

This edition refers to the first half of 2008.

Most of the data are compiled by the Statistical Service. The indicators on the balance of payments, foreign exchange and the monetary sector are provided by the Central Bank of Cyprus and the Department of Co-operative Development. Part of the data on tourism is compiled by the Cyprus Tourism Organisation and the data on share price indices by the Cyprus Stock Exchange.

The co-ordination of the various series and the preparation of this publication were undertaken by Mrs A. Christodoulou, Mrs M. Constantinou and Mrs A. Sofroniou, under the supervision of Mr G. Zeitountsian, officer-in-charge of the National Accounts.

Sincere thanks and appreciation are extended to all government departments, semi-government organizations and private enterprises for their valuable assistance in providing the necessary data for this report.

INTERNATIONAL DEVELOPMENTS

Business and Consumer Survey Results for the E.U.

According to the latest results of the European Commission business and consumer surveys, the Economic Sentiment Indicator (ESI) for the EU-27, decreased by 1,9 points in August 2008 compared to July 2008. The ESI is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). The decrease of 1,9 points in the ESI is the outcome of decreases in the confidence indicators of Retail Trade (4 points), Industry (3 points), Services (1 point) and Construction (1 point) and an increase in the Consumer Confidence Indicator (1 point).

World Economic Developments

According to the Statistical Office of the European Communities (Eurostat), (see summary table 2 on page 30) inflation in the EU-27 rose to 4,2% in August 2008 compared to August 2007. The lowest inflation rates were recorded in Netherlands (3,0%), in Portugal (3,1%), and in Ireland (3,2%), whereas the highest rates were recorded in Latvia (15,6%), Lithuania (12,2%) and Bulgaria (11,8%).

The EU-27 seasonally adjusted unemployment rate decreased to 6,8% in July 2008 compared to July 2007. In July 2008, the lowest unemployment rates were recorded in Denmark (2,3%), in Netherlands (2,6%), and in Cyprus (3,7%), whereas the highest unemployment rates were recorded in Spain (11,0%), Slovakia (10,3%) and in Hungary (7,6%).

According to the latest “World Economic Outlook”, (see table on page 14) prepared by the IMF staff and published in April 2008, world output is projected to fall to 3,7% in 2008 and rose to 3,8% in 2009, compared to a 4,9% growth rate in 2007.

World trade volume (goods and services) is expected to expand by 5,6% in 2008 and 5,8% in 2009, compared to a 6,8% increase in 2007.

The average price of oil in U.S. dollars a barrel was \$70.95 in 2007 and the assumed price is \$95.50 in 2008 and \$94.50 in 2009.

DEFINITIONS AND EXPLANATORY NOTES

INDUSTRIAL

Turnover Index of Industrial Sector: It is compiled from the monthly turnover of a representative sample of enterprises. The weights given to the various industries are proportional to their turnover in 2000, derived from the Census of Industrial Production.

Volume Index of Industrial Production: This is a composite index of the volume indices of mining and quarrying, manufacturing, electricity, gas and water.

MINING AND QUARRYING

Volume Index of Mining and Quarrying Production: The index is compiled from data on the production of minerals and quarrying materials obtained from the Mines Department and mining enterprises, supplemented with data from other sources. The weights utilised are proportional to the value of the various products at producer prices in 2000.

MANUFACTURING

Volume Index of Manufacturing Production: It is compiled from data on the quantities of the main products manufactured by a representative sample of enterprises; in the case of heterogeneous products where no quantity measurement is possible, value indices are compiled, deflated by corresponding price indices. The weights given to the various industries are proportional to their value added in 2000, derived from the 2000 Census of Industrial Production.

ELECTRICITY, GAS AND WATER

Volume Indices of Production: The indices are based on data on the billed consumption of electricity (i.e., excluding the amount of electricity supplied to the areas occupied by the Turkish invading forces), sales of gas, sales of the Water Boards and the quantity of water purified.

ENERGY

Sales of Petroleum Products are compiled from monthly returns submitted by the petroleum companies. They include sales to industrial establishments, petrol stations, ships, aircraft, military forces, and others. Data for heavy fuel oil include also direct imports by the Electricity Authority and the cement industries. The cement industries also use coal partly in substitution of fuel oil.

Electricity: Data on the production of electricity pertain to the Electricity Authority of Cyprus only. They refer to gross production i.e. the amount of electric energy produced as metered at the output terminals of all sets in the power stations. Consumption figures refer to the billed sales of the Electricity Authority.

CONSTRUCTION

Production Index: The index measures the quarterly changes in production value at constant prices. It is based on a sample of enterprises active in the construction sector. For the calculation of the index and for every quarter the information collected is either work done, or turnover or hours worked by the production personnel (according to the enterprise) and this output measures are then deflated by the Output Prices index.

Price Index of Construction Materials: The price index is based on an extensive list of the main construction materials. The index measures price changes, which are compiled monthly from the main distributors or producers of construction materials. The weights of the various materials are proportional to their respective values at market prices in the base year 2000.

Labour Cost Index: The index measures variations in the average hourly labour cost for manual workers in the construction sector. Labour cost comprises the basic wage-rate, the cost of living allowance, and the employers' contributions to the Social Insurance, Medical, Provident, Holiday, Annual Leave with Pay, 56th Week, Redundancy and Industrial Training Funds. The index is compiled from data for the main occupations taken from the paylists of a representative sample of building contractors. The weights utilised for the compilation of the overall index are based on the wage-bill for the various occupations in April 2000.

Output Prices Index: The quarterly index measures the movements in prices charged to clients of construction work. It is based on a sample of enterprises and a list of various construction tasks for which unit prices are requested. It is used also as a deflator for the calculation of the Production index.

TRANSPORT, STORAGE AND COMMUNICATION

Turnover Value Index for Transport, Storage and Communication: The Index covers Land, Water and Air Transport activities, Supporting and Auxiliary activities, Telecommunication and Postal Services. It is compiled from data obtained in a monthly sample survey, relating to the monthly turnover of the above activities. The weights allocated to the various activities are proportional to their turnover in 2000.

New Registrations of Motor-Vehicles: The data refer to both new and second-hand vehicles. License "A" is for heavy or light goods vehicles carrying loads for reward and Licence "B" refers to vehicles carrying loads for the owner's account.

DISTRIBUTIVE TRADE

Turnover Value and Volume Indices: Turnover Value Indices are compiled from data collected in a monthly survey covering a sample of enterprises. The Indices are published for a selected number of activities according to the STS-

Regulations. The weighting figure is the turnover of the activity measured by the Distributive Trade Survey of 2000.

Turnover Volume Indices of Retail Trade are calculated by deflating Turnover Value Indices of Retail Trade by a selected number of components from the HICP.

SERVICES

Turnover Value Index: The index measures the monthly changes in turnover. It is based on a sample of enterprises active in the services sector. The turnover is collected from the enterprises monthly and the results are presented quarterly. The weights of the various enterprises are proportional to their output in 2000.

FOREIGN TRADE

Source of Data: Foreign trade statistics with non –EU countries are compiled mainly from the electronic declarations made by the importers or their agents through the computerized system of Customs Authorities (Theseas System) (for imports) and the Single Administrative Document made by exporters or their agents (for exports). The statistics on trade with EU countries are compiled from the data received via Intrastat system and VAT returns.

Total Imports include all goods entered in the statistical territory of Cyprus either for free circulation or received into customs or excise warehouses from the rest of the world with the exception of simple transit.

Imports for Home Consumption include imports of goods from non-EU countries under special trade system and arrivals of goods from EU countries in local market either directly or withdrawn from excise warehouses.

Total Exports include exports of domestic goods (domestic exports) and foreign goods (re-exports of foreign goods).

Domestic Exports are exports of goods originating in the economic territory of Cyprus; if they have been wholly obtained in it or foreign goods, which were substantially transformed in Cyprus, so that the processing confers domestic origin. Goods originally imported and having undergone only repair or minor operations which leave them essentially unchanged are not defined as domestic. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and selling.

Re-exports (or foreign exports) are exports of goods originating in the rest of the world, i.e not included in the economic territory of Cyprus and compensating goods obtained under the outward processing procedure when such processing confers foreign origin.

MONETARY AND FINANCIAL STATISTICS

Monetary Financial Institutions (MFIs) are central banks, resident credit institutions and other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credits and/or make investments in securities.

Monetary and Banking Statistics cover the aggregated data of Monetary Financial Institutions (MFIs) which comprise all credit institutions operating in Cyprus, including Co-operative Credit Institutions (CCIs) former International Banking Units (IBUs) and the Central Bank of Cyprus where applicable.

Monetary Statistics relating to Co-operative Financial Institutions are published, in addition to the statistics compiled by the Central Bank, in order to give a more complete picture of short-term developments in the monetary sector. The data are compiled by the Department of Co-operative Development.

PRICES

Consumer Price Index: The index measures changes in the retail prices of goods and services consumed by private households. It is based on the price movements of a representative selection of goods and services. The prices of the various items are collected once a month, on a Thursday nearest to the middle of each month; fruit and vegetables are collected on a weekly basis (every Thursday), and rents on a monthly basis. The base year is 2005 and the weights are based on the results of the Household Consumption Expenditure survey.

Price Index of Industrial Production: The index aims to measure the variations in the average ex-factory prices of the main manufactured products sold in the home market and exported. It is compiled from data on the prices prevailing as on the first Thursday of each month (excluding discounts, commissions and excise duties), obtained from a representative sample of manufacturers. The weights of the various industries are proportional to their output in 2000.

Commercial Rent Index

The index is compiled from data collected in a sample survey covering most sectors of economic activity except agriculture, mining and quarrying, electricity, gas and water, where premises are mainly owner-occupied. The general rent index is the weighted average of the sectoral indices. The weights are proportional to the total amount of rents paid in the various sectors in the base year 1990 derived from the various sectoral surveys.

LABOUR

Employment data are based on the results of a quarterly survey covering all establishments employing 30 or more persons and a rotating probability

sample of establishments employing up to 29 persons. They refer to the average number of persons employed during the month, and part-time employees are converted into full-time equivalent on the basis of the number of hours worked. The data include working proprietors and working partners, unpaid family workers, and persons temporarily absent from work, eg. on sick leave, casual leave or vacation.

Registered Unemployment comprises all persons who are registered as unemployed at the District Labour Offices on the last day of each month, and are currently available for work. It includes persons receiving unemployment benefit under the Social Insurance Scheme as well as those not entitled to any benefit.

UNEMPLOYMENT FROM THE LABOUR FORCE SURVEY

Unemployed: Persons aged 15 years and over who comply to the following standards:

- Neither worked nor had a job from which they were temporarily absent during the reference week.
- They had actively sought for work, i.e. had taken specific steps during the previous 4 weeks to find work
- They were available to start work within the 2 weeks following the reference week

and/or,

- Persons who neither worked nor had a job from which they were temporarily absent, but found a job which will start within a period of at most 3 months
- They were available to start work within the 2 weeks following the reference week.

Labour Force: The total number of the employed and unemployed persons aged 15 years and over.

Unemployment rate: The number of unemployed persons of any age group expressed as a percentage of the labour force in the same age group.

TOURISM

Travellers: Are all persons who pass through passport control at the ports and airports of Cyprus. The various categories of travellers are visitors, residents, and emigrants or immigrants.

Source of data: From 14.6.1991-May 1997, the statements prepared by airline and shipping companies were the main source of data for tourism and migration statistics. These statements provided information only on the total number of passengers on each flight/route. Thus from the second half of 1991-May 1997 data for most categories of travellers are based on estimations. As from June 1997 the figures for the various categories of travellers are based on the results of the Passenger Survey carried out at airports / ports by the Statistical Service.

NOTES ON THE TABLES

Seasonally Adjusted and Moving Average Series

Certain series are presented in seasonally adjusted form and as a moving average of deseasonalised figures. The seasonal adjustment factors have been derived from running the data through the Seasonal Adjustment Program of the U.S. Bureau of the Census. The reader can obtain the seasonal adjustment indices for any month by dividing the actual data by the seasonally adjusted figures, which in the tables are designated by the shorthand expression sa. In view of the smallness and openness of the Cyprus economy, irregular or erratic disturbances can have a significant impact on the behaviour of certain time series. Thus, in series where irregular factors are estimated to be important, an appropriate moving average of seasonally adjusted monthly data is also presented. The moving average is referred to by the shorthand expression ma with the span of months it covers in brackets.

Rounding may lead to slight discrepancies between the sum of individual items and the totals in some tables.

Note: The data are based on a monthly survey covering a representative sample of building contractors. They refer to the average (mean) hourly wage-rates (including the basic rate of pay and cost of living allowance) for normal hours of work, excluding overtime.

The data refer to the gross rates, before any deductions for income tax, etc. are made and they do not include the employers' contributions to Social Insurance and other funds. Apprentice workers are not covered.
