PRESS RELEASE

AVERAGE MONTHLY EARNINGS OF EMPLOYEES: 3rd QUARTER 2021

Annual Change 1,3%

Based on provisional data, the average gross monthly earnings of employees during the third quarter of 2021, amounted to €1.934 compared to €1.909 during the third quarter of 2020, i.e. an increase of 1,3% is observed.

The average gross monthly earnings during the third quarter of 2021, seasonally adjusted, are estimated at €2.024 and compared to the second quarter of 2021 they are increased by 0,5%.

Note: From the 1st quarter of 2021 onwards, data are provisional.

The average gross monthly earnings of male employees during the third quarter of 2021 are estimated at €2.074 and of female employees at €1.764. Compared to the third quarter of 2020, the average gross monthly earnings of male and female employees recorded an increase of 1,4% and 1,3% respectively.

Table

Gender	Average monthly earnings (€)		Percentage Change (%)	
	Unadjusted	Seasonally adjusted	To the same quarter of the previous year (unadjusted earnings)	To the previous quarter (seasonally adjusted earnings)
<u>Total</u>				
3 rd Quarter 2021	1.934	2.024	1,3	0,5
2 nd Quarter 2021	1.930	2.014	2,5	2,2
3 rd Quarter 2020	1.909	2.010	2,1	2,4
<u>Males</u>				
3 rd Quarter 2021	2.074	2.168	1,4	0,5
2 nd Quarter 2021	2.092	2.158	4,3	0,6
3 rd Quarter 2020	2.045	2.150	1,6	3,9
<u>Females</u>				
3 rd Quarter 2021	1.764	1.848	1,3	0,4
2 nd Quarter 2021	1.734	1.841	0,3	4,7
3 rd Quarter 2020	1.741	1.836	2,6	0,3

Due to the rounding of earnings, the calculation of the change may differ from the percentage change presented in the table.

METHODOLOGICAL INFORMATION

Identity

The Average Monthly Earnings of employees are calculated by dividing the total gross earnings before any deductions for compulsory social security contributions, by the total number of employees who received remuneration. The data source is the records of the Social Insurance Services. The results are published on a quarterly basis. The calculation of the average monthly earnings of the reference quarter is based on the first two months of the quarter.

Data coverage

All economic activities are covered except Section T: Activities of households as employers and Section U: Activities of extraterritorial organisations and bodies.

All employees recorded at the Social Insurance Services' Records are covered. Excluded are those employees who report a gross salary that is less than 50% of the minimum salary as determined in the decree issued by the Ministry of Labour and Social Insurance.

Exceptional methodological adjustment

Included in the calculations are, regardless of the amount of their earnings, employees who participated in the Special Schemes under the Employees' Support Schemes to deal with the pandemic of the Ministry of Labour, Welfare and Social Insurance, from April 2020 onwards.

Definitions

Average monthly earnings of employees include the basic salary, the cost of living allowance, earnings for overtime, the Holiday Fund, any other allowances received by employees during the reference period and payments in arrears.

The temporary contributions of employees of the private sector (2012-2016) and officials and employees of the central government and the broad public sector (1/9/2011-31/12/2016) and the deductions in earnings of officials and employees of the central government and the broad public sector (since 01/12/2012), do not affect the gross salary of employees but only their net income. Consequently, they are not reflected in the figures above.

It is clarified that, as regards the employees who participated in the Special Schemes under the Employees' Support Schemes to deal with the pandemic of the Ministry of Labour, Welfare and Social Insurance, the amount taken into account is the earnings paid by the employer and does not include any amount paid as an allowance by the Ministry of Labour, Welfare and Social Insurance.

Seasonally adjusted average monthly earnings are the average monthly earnings of employees, after removing the seasonal effect from the data. The removal of the seasonal component from the data is performed, using appropriate statistical techniques. Seasonally adjusted data are used in the comparison of data of a specific time period, with other periods, such as the previous quarter, where the seasonal factor affects the data.

The **Percentage Change - Compared to the same quarter of the previous year** is the percentage change of average monthly earnings, comparing data of a specific quarter, with the corresponding quarter of the previous year. The comparison is made between corresponding time periods of different years. Therefore, there is no need to use the seasonally adjusted data, since the seasonal component is the same for the two periods.

The **Percentage Change - Compared to the previous quarter (Seasonally adjusted earnings)** is the percentage change of average monthly earnings, comparing data of a specific quarter, with the previous quarter. Due to the fact that the seasonal component is different between two consecutive quarters, it is necessary to use seasonally adjusted data for this comparison.

Data Availability

The data is published on CYPSTAT's online database CYPSTAT-DB. Data is available from the first quarter of 2003.

For more information:

CYSTAT Portal, subtheme [Labour Cost and Earnings](#)

[CYSTAT-DB](#) (Online Database)

[Predefined Tables](#) (Excel)

The Predefined Tables will be available in Excel format until the 4th quarter of 2021. Afterwards, the data will be updated only on the Online Database CYSTAT-DB.
