METHODOLOGICAL INFORMATION

Definitions

The **Consumer Price Index (CPI)** is compiled to measure the changes of prices over time of consumer goods and services acquired, used or paid by households. Specifically, the national CPI of Cyprus covers the consumption expenses of specific goods and services (shopping basket of goods and services), of the resident households and of the households that intend to live in Cyprus for at least one year. CPI is the official index for the estimation of inflation.

The **Inflation** shows the change of the CPI when compared with the index of the corresponding month of the previous year.

The **Effect** represents the amount of the overall change in the General Index which is accounted for by any given category/product/service.

Price Collection

The price collection is carried out only in urban districts of Nicosia, Larnaca, Limassol and Paphos. For each city, the fluctuations in the product and services prices for each month, are weighted according to their population. Specifically, the weights for the four districts are: Nicosia 42%, Limassol 30%, Larnaca 18% and Paphos 10%.

The prices of 805 goods and services, which are included in the CPI, are recorded once every month, except for some seasonal products (e.g., vegetables and fruit), meat and fuels, for which prices are collected every week (every Thursday).

Base Year

The index reference period was 2005=100 for the period between January 2006 and December 2015. From January 2016 and onwards, the base year is 2015=100.

Classification

Until December 2015, COICOP 4 classification up to four digits level of analysis, was used for the calculation and the dissemination of the CPI. From January 2016 and onwards, CYPSTAT is adopting the ECOICOP classification satisfying relevant European Union Regulation. Consequently, the lowest level of detail for the classification used in CPI is COICOP 5-digits level of analysis.

Products/Services and Weights

From January 2018 and onwards, the products included in the CPI as well as their corresponding weights have been revised. The revision was based on the results of the Household Budget Survey 2015/2016.
