METHODOLOGICAL INFORMATION

Definitions

The **Consumer Price Index (CPI)** is compiled to measure changes over time in the prices of consumer goods and services acquired, used or paid for by households. Specifically, the national CPI of Cyprus covers the consumption expenditure of specific goods and services (shopping basket of goods and services), of resident households and of households that intend to live in Cyprus for at least one year. The CPI is the official index for measuring inflation.

The **Inflation** shows the change in the CPI when compared with the index of the corresponding month of the previous year.

The **Effect** represents the amount of the overall change in the General Consumer Price Index which is accounted for by any given category/product/service.

Price Collection

The price collection is carried out only in the urban districts of Nicosia, Larnaca, Limassol and Paphos. For each city, the monthly price fluctuations for product and services are weighted according to the population. Specifically, the weights for the four districts are: Nicosia 40%, Limassol 30%, Larnaca 18% and Paphos 12%.

The prices of 850 goods and services, which are included in the CPI, are recorded once every month, except for some seasonal products (e.g., vegetables and fruit), meat and fuels, for which prices are collected every week (every Thursday).

Base Year

From January 2026 onwards, the base year is 2025=100. The index reference period (base year) was 2015=100 for the period between January 2016 and December 2025.

Classification

Until December 2025, the ECOICOP classification was used for the calculation and dissemination of the CPI. From January 2026 onwards, CYPSTAT adopts the ECOICOP ver.2 classification. The lowest level of detail for the classification used in the CPI is the five-digits level of analysis.

Products/Services and Weights

From January 2026 onwards, the products and services included in the CPI, as well as their corresponding weights, have been revised. The revision was based on the results of the Household Budget Survey 2023.
