

STATISTICAL SERVICE

GENDER STATISTICS

A collection of statistics by sex on demographics,
labour market, education, public life, health,
poverty and crime.

OCTOBER
2023

CONTENTS

1

Demographic Characteristics

- 1.1 Population at the end of the year, by sex
- 1.2 Percentage distribution of population by sex and age group (0-14, 15-64, 65+)
- 1.3 Fertility rates
- 1.4 Age-specific fertility rates

2

Labour Market

2.1

Labour Force Survey

- 2.1.1 Main results by sex
- 2.1.2 Employment and unemployment by economic activity and occupation
- 2.1.3 Persons outside the labour force due to caring responsibilities by sex - Eurostat
- 2.1.4 Difference between the employment rates of men and women - Eurostat
- 2.1.5 Labour Market Slack - The total sum of all unmet need for employment by sex, for persons 15-74 years old

2.2

Earnings

- 2.2.1 Gender pay gap
- 2.2.2 Gender pay gap by occupational group - full-time employees, 2018
- 2.2.3 Gender pay gap by form of financial control (Public/Private) - full-time employees, 2018
- 2.2.4 Gender overall earnings gap (GOEG) - Eurostat
- 2.2.5 Average monthly earnings
- 2.2.6 Average gross monthly earnings by economic activity section and sex, 2021
- 2.2.7 Distribution of monthly government employees by sex and salary scale, Jan 2023
- 2.2.8 Distribution of government employees by category and sex, Jan 2023

CONTENTS

3

Education

- 3.1a Percentage distribution of people aged 20+ by sex and highest educational attainment
- 3.1b Percentage distribution of people aged 20+ by sex and highest educational attainment, 2022
- 3.2a Percentage of people aged 30–34 years old with tertiary educational attainment by sex – Eurostat
- 3.2b Percentage of people aged 30–34 years old with tertiary educational attainment by sex, 2022
- 3.3 Number and percentage distribution of students in tertiary education, by sex and field of education
- 3.4 Percentage distribution of graduates of tertiary education in Cyprus, by sex.
- 3.5 Graduates in tertiary education – women per 100 men – Eurostat

4

Public Life

- 4.1 Representation of women in the Council of Ministers
- 4.2 Percentage of Senior level civil servants by sex (salary scales A14–A16)
- 4.3 Percentage distribution of judges by sex
- 4.4 Percentage distribution of representatives by sex

5

Health

- 5.1 Life expectancy at birth
- 5.2 Healthy life years in absolute value at age of 65, by sex – Eurostat
- 5.3 Self perceived health "very good or good" by sex and age – Eurostat

CONTENTS

6

Poverty

6.1

At risk of poverty or social exclusion indicators

6.2

Severe material and social deprivation (SMSD), At risk of poverty (AROP) and very low work intensity (LWI)

6.3

At risk of poverty or social exclusion (AROE) rate by sex

7

Criminality

7.1

Persons convicted by the district and assize courts by sex and offence group

7.2

Victims of serious offences reported to the police by offence (selected offences) or offence group and sex of the victim

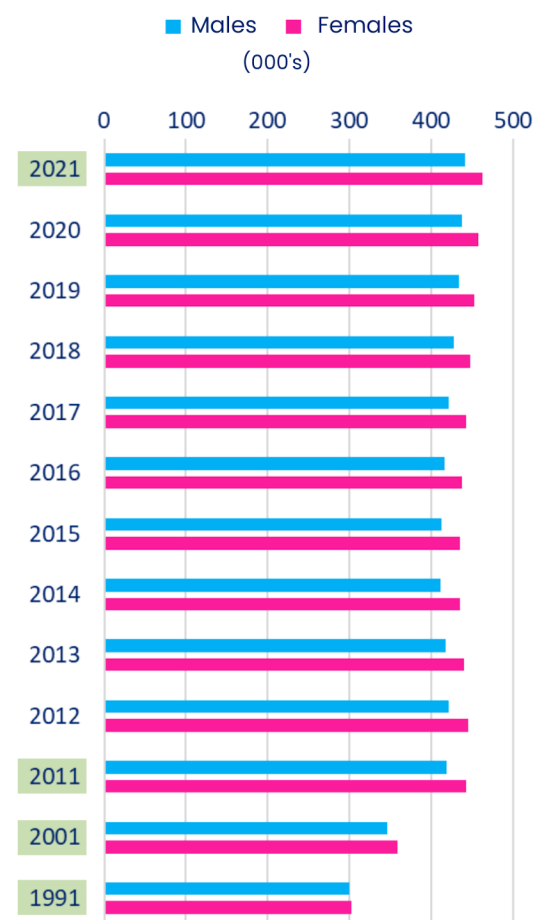

GENDER ROLES

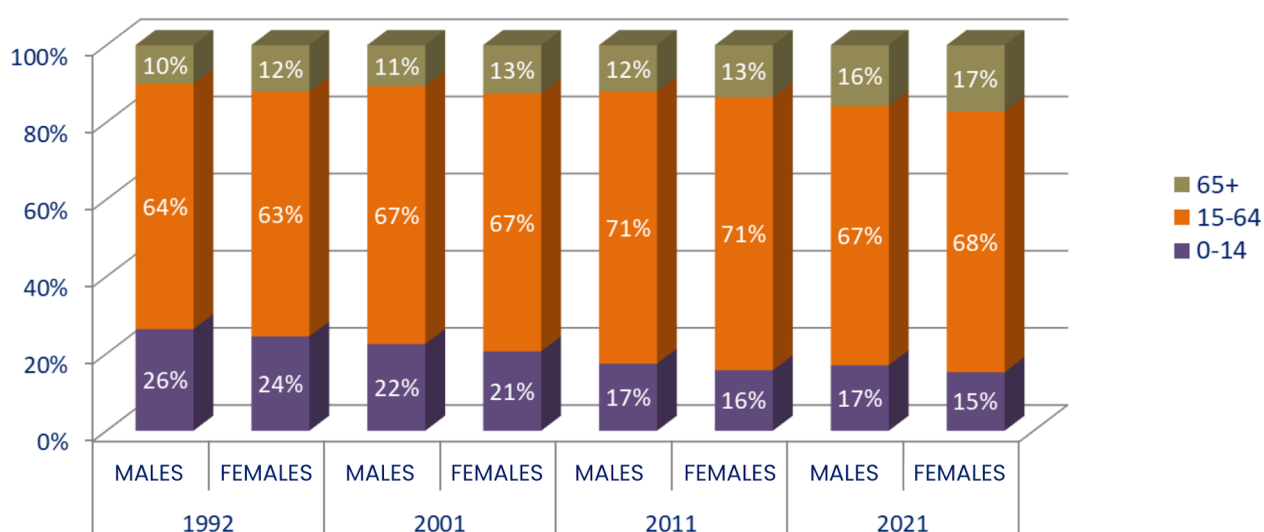

1 Demographic Characteristics

1.1 Population at the end of the year, by sex

YEAR	END OF THE YEAR (000's)				END OF THE YEAR (%)	
	Total	Males	Females	Annual Growth Rate %	Males	Females
2021	904,7	441,1	463,6	1,0	48,8%	51,2%
2020	896,0	437,6	458,4	0,9	48,8%	51,2%
2019	888,0	434,5	453,5	1,4	48,9%	51,1%
2018	875,9	427,8	448,1	1,4	48,8%	51,2%
2017	864,2	421,5	442,7	1,1	48,8%	51,2%
2016	854,8	416,7	438,1	0,8	48,7%	51,3%
2015	848,3	412,7	435,6	0,2	48,7%	51,3%
2014	847,0	411,8	435,2	-1,3	48,6%	51,4%
2013	858,0	417,5	440,5	-0,9	48,7%	51,3%
2012	865,9	421,0	444,9	0,5	48,6%	51,4%
2011	862,0	419,0	443,0	2,6	48,6%	51,4%
2001	705,5	346,2	359,3	1,1	49,1%	50,9%
1991	603,1	300,3	302,8	2,7	49,8%	50,2%

1.2 Percentage distribution of population by sex and age group (0-14, 15-64, 65+)

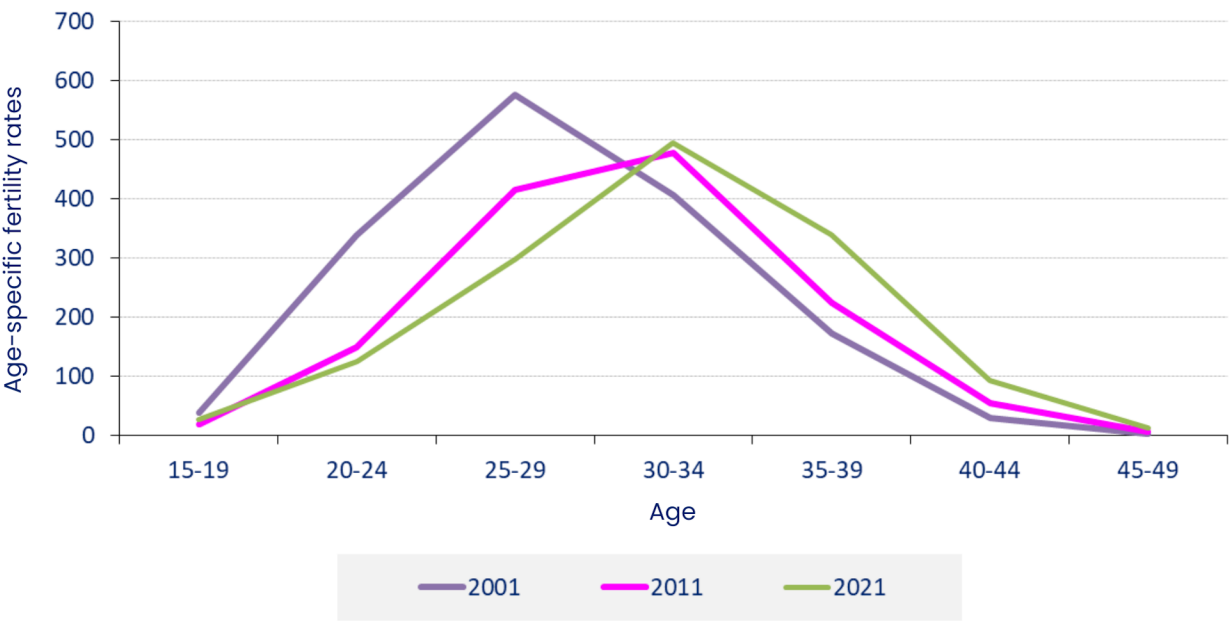

1.3 Fertility rates

YEAR	Age-specific fertility rates							Total Fertility Rate
	15-19	20-24	25-29	30-34	35-39	40-44	45-49	
2021	27	125	298	495	340	93	14	1,39
2020	30	129	300	470	324	90	17	1,36
2019	26	124	294	460	324	86	13	1,33
2018	32	116	298	471	317	77	10	1,32
2017	26	117	316	493	289	71	11	1,32
2016	23	114	336	517	299	67	10	1,37
2015	18	108	351	505	267	64	9	1,32
2014	17	123	374	492	238	59	10	1,31
2013	17	129	378	471	235	55	10	1,30
2012	24	146	419	485	247	62	9	1,39
2011	20	150	415	478	224	55	7	1,35
2001	40	339	576	406	173	30	3	1,57
1991	153	723	807	443	170	32	2	2,33

- Rates are based on the average de jure population estimates and on the female population aged 15-49 years.
- As of 1993 the total fertility rate and the age-specific rates are calculated as a summation of the age-specific fertility rate of each single age (and not of the 5-year age-groups).

1.4 Age-specific fertility rates

2 Labour Market

2.1 Labour Force Survey

2.1.1 Main Results by sex, 2020, 2021, 2022

SEX	2020						2021						2022					
	Total		Males		Females		Total		Males		Females		Total		Males		Females

Persons outside the labour force due to caring responsibilities: The population outside the labour force comprises individuals that are not working, not actively seeking work or not available to work. Therefore, they are neither employed nor unemployed. This definition, used in the EU Labour Force Survey (EU-LFS), is based on the resolutions of the International Conference of Labour Statisticians (ICLS). While several reasons may exist why somebody is not seeking employment, only the main one is considered. Being outside the labour force due to caring responsibilities refers to the reasons 'care responsibility', covering care responsibilities over own children or spouse's children living inside or outside the household and over adult ill/elderly/incapacitated/disabled relatives and 'other family reasons'. The indicator covers the population outside the labour force that would like to work.

definition differs (see metadata)

Gender employment gap: The gender employment gap is defined as the difference between the employment rates of men and women aged 20-64. The employment rate is calculated by dividing the number of persons aged 20 to 64 in employment by the total population of the same age group. The indicator is based on the EU Labour Force Survey.

2 Labour Market

2.1 Labour Force Survey

2.1.5 Labour market slack by sex and age, for persons 15–74 years – Eurostat

Data extracted on 15/05/2023 13:34:50 from [ESTAT]

Dataset: **Labour market slack by sex and age - annual data [LFSI_SLA_A__custom_6207375]**

Last updated: 26/04/2023 23:00

Time frequency: Annual
 Activity and employment status: Labour market slack
 Age class: From 15 to 74 years
 Unit of measure: Percentage of extended labour force

d definition differs (see metadata)

Labour market slack by sex: The total sum of all unmet need for employment, including unemployment according to the ILO definition as well as the three supplementary indicators. In order to allow comparisons between these four groups, which do not all belong to the labour force, the concept of the “extended labour force” is used. It includes unemployment, employment and the two categories of inactive persons, those available but not seeking, and those seeking but not available. The total labour market slack is expressed in percent of this extended labour force, and the relative sizes of each component of labour market slack can be compared by using this denominator.

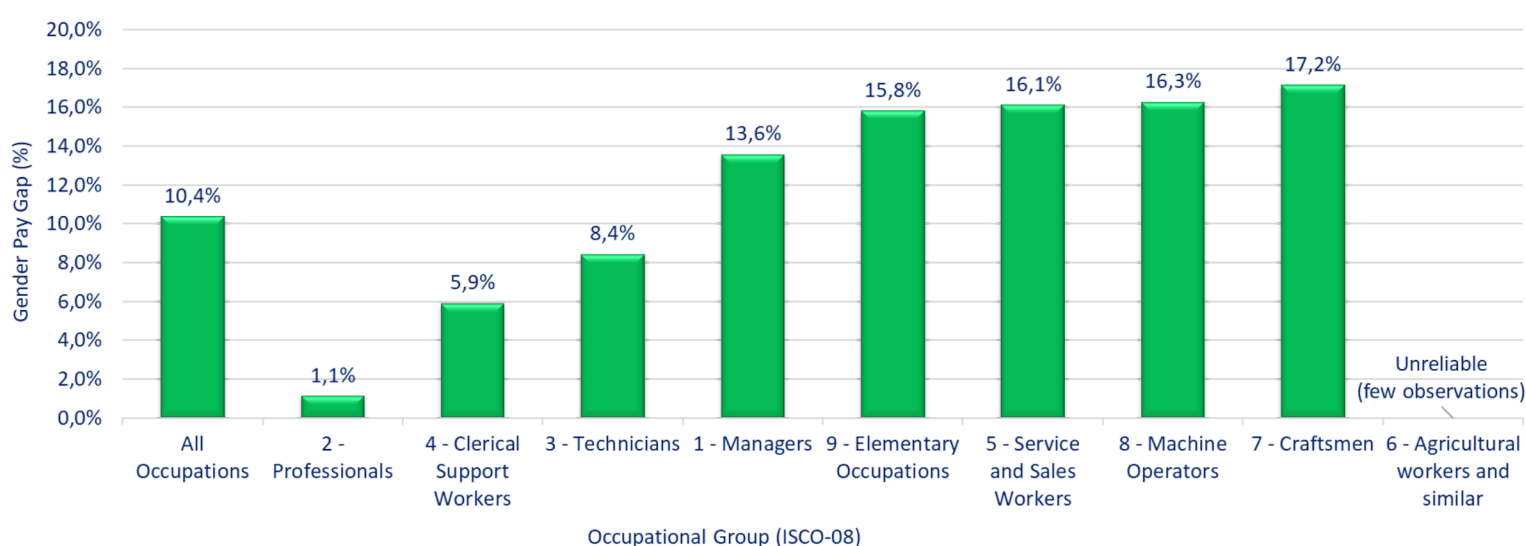

2.2 Earnings

2.2.1 Gender pay gap

YEAR	2015	2016	2017	2018	2019	2020	2021
%	13,2	12,3	11,2	10,4	10,1 ^P	9,9 ^P	9,7 ^P

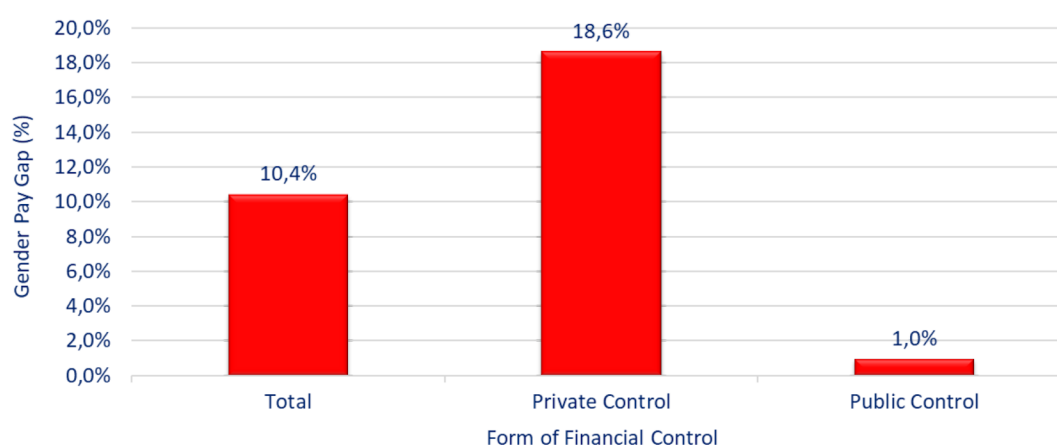

Coverage: Enterprises with 10+ employees and belonging to the Industrial, Construction and Services sectors (excluding Public Administration, Defence, Compulsory Social Security).

2.2.2 Gender pay gap by occupational group – full-time employees, 2018

Coverage: Enterprises with 1+ employees and belonging to the Industrial, Construction and Services sectors. Armed forces are not included in the data.

2.2.3 Gender pay gap by form of financial control (Public/Private) – full-time employees, 2018

Coverage: Enterprises with 1+ employees and belonging to the Industrial, Construction and Services sectors. Armed forces are not included in the data.

The indicator of healthy life years (HLY) measures the number of remaining years that a person of specific age is expected to live without any severe or moderate health problems. The notion of health problem for Eurostat's HLY is reflecting a disability dimension and is based on a self-perceived question which aims to measure the extent of any limitations, for at least six months, because of a health problem that may have affected respondents as regards activities they usually do (the so-called GALI - Global Activity Limitation Instrument foreseen in the annual EU-SILC survey).

5.3a Self perceived health "very good or good" by sex and age – Eurostat

Data extracted on 17/05/2023 14:16:37 from [ESTAT]

Available flags: e estimated

At older ages, 65+, a higher percentage of men consider their health condition to be very good or good, compared to women.

5.3b Self perceived health "very good or good" at age 65+ by sex

6 Poverty

6.1 At risk of poverty or social exclusion indicators

			2015	2016	2017	2018	2019	2020	2021
Risk-of-poverty threshold	Single-person households	EUR	8.276	8.412	8.698	9.202	9.729	10.022	10.011
		PPS	9.188	9.704	9.886	10.283	11.154	10.983	10.971
	Households with 2 adults and 2 dependent children	EUR	17.380	17.665	18.266	19.323	20.431	21.047	21.024
		PPS	19.295	20.378	20.760	21.594	23.423	23.065	23.040

Risk-of-poverty threshold: is set at 60 % of the national median equivalised disposable income, which is the total disposable income of a household (total net income of all household members after social transfers) divided by its respective equivalised size. The Equivalised household size is calculated using the modified OECD equivalence scale: First adult=1,0, second and each subsequent household member aged 14 years and over=0,5 and each household member aged under 14=0,3.

			2015	2016	2017	2018	2019	2020	2021

		M	21,6	21,4	20,1	18,0	17,2	16,6	15,8
		F	24,0	23,7	22,6	20,2	19,9	18,6	18,7

Risk-of-poverty or social exclusion rate (AROPE): At risk of poverty or social exclusion (AROPE) rate is the percentage of the population who are either at risk of poverty or severely materially and socially deprived or living in a household with a very low work intensity. Persons are only counted once even if they are present in several sub-indicators.

The indicator at-risk-of-poverty or social exclusion is the main indicator to monitor the EU 2030 target on poverty and social exclusion. The relevant target refers to the reduction of the number of people at risk of poverty or social exclusion by at least 15 million by 2030, and out of them, at least 5 million should be children.

			2015	2016	2017	2018	2019	2020	2021
At risk of poverty rate by sex	Total population	Total	16,2	16,1	15,7	15,4	14,7	14,3	13,8
		M	15,3	15,0	14,6	14,8	13,9	13,3	12,6
		F	17,2	17,2	16,8	15,9	15,5	15,3	15,0

At risk of poverty rate (AROP): The at-risk-of-poverty rate is the share of persons with an equivalised disposable income (after social transfers) below the at-risk-of-poverty threshold. It measures relative poverty and not absolute poverty.

6 Poverty

6.1 At risk of poverty or social exclusion indicators

			2015	2016	2017	2018	2019	2020	2021
Percentage of population living in households with very low work intensity by sex (EU 2030 target)	Total population 0-64	Total	10,4	10,1	8,7	8,1	6,6	5,3	5,8
		M	9,9	9,5	7,9	7,9	6,1	5,1	5,9
		F	10,9	10,6	9,5	8,4	7,1	5,6	5,8

Very low work intensity (LWI): The percentage of the population aged 0-64 that was living in households whose adults aged 18-64 worked less than 20% of their work potential during the past year. From the adults are excluded the students aged 18-24, people who are retired according to their self-defined current economic status or who receive any pension (except survivor's pension), people in the age bracket 60-64 who are inactive and living in a household where the main income is pensions (except survivor's pension).

			2015	2016	2017	2018	2019	2020	2021
Percentage of population which enforced lack of at least 7 out of the 13 material and social deprivation items (severe material and social deprivation) (EU 2030 target)	Total population	Total	7,9	6,6	6,1	3,8	3,2	3,2	2,6
		M	8,0	6,9	6,2	3,9	3,4	3,3	2,3
		F	7,8	6,3	6,1	3,7	3,0	3,2	2,8

Severe material and social deprivation (SMSD):

Severely materially and socially deprived is the population who cannot afford a certain good, service or social activity. It refers to the population experiencing enforced lack of at least 7 out of 13 deprivation items (6 related to the individual and 7 related to the household):

At household level:

Cannot afford:

- 1) to face unexpected expenses,
- 2) a week holiday away from home,
- 3) to pay rent or utility bills or loans (to be confronted with payment arrears),
- 4) a meal with meat, chicken, fish or vegetarian equivalent every second day,
- 5) to keep home adequately warm,
- 6) to have a car/van for personal use,
- 7) to replace worn-out furniture.

At individual level:

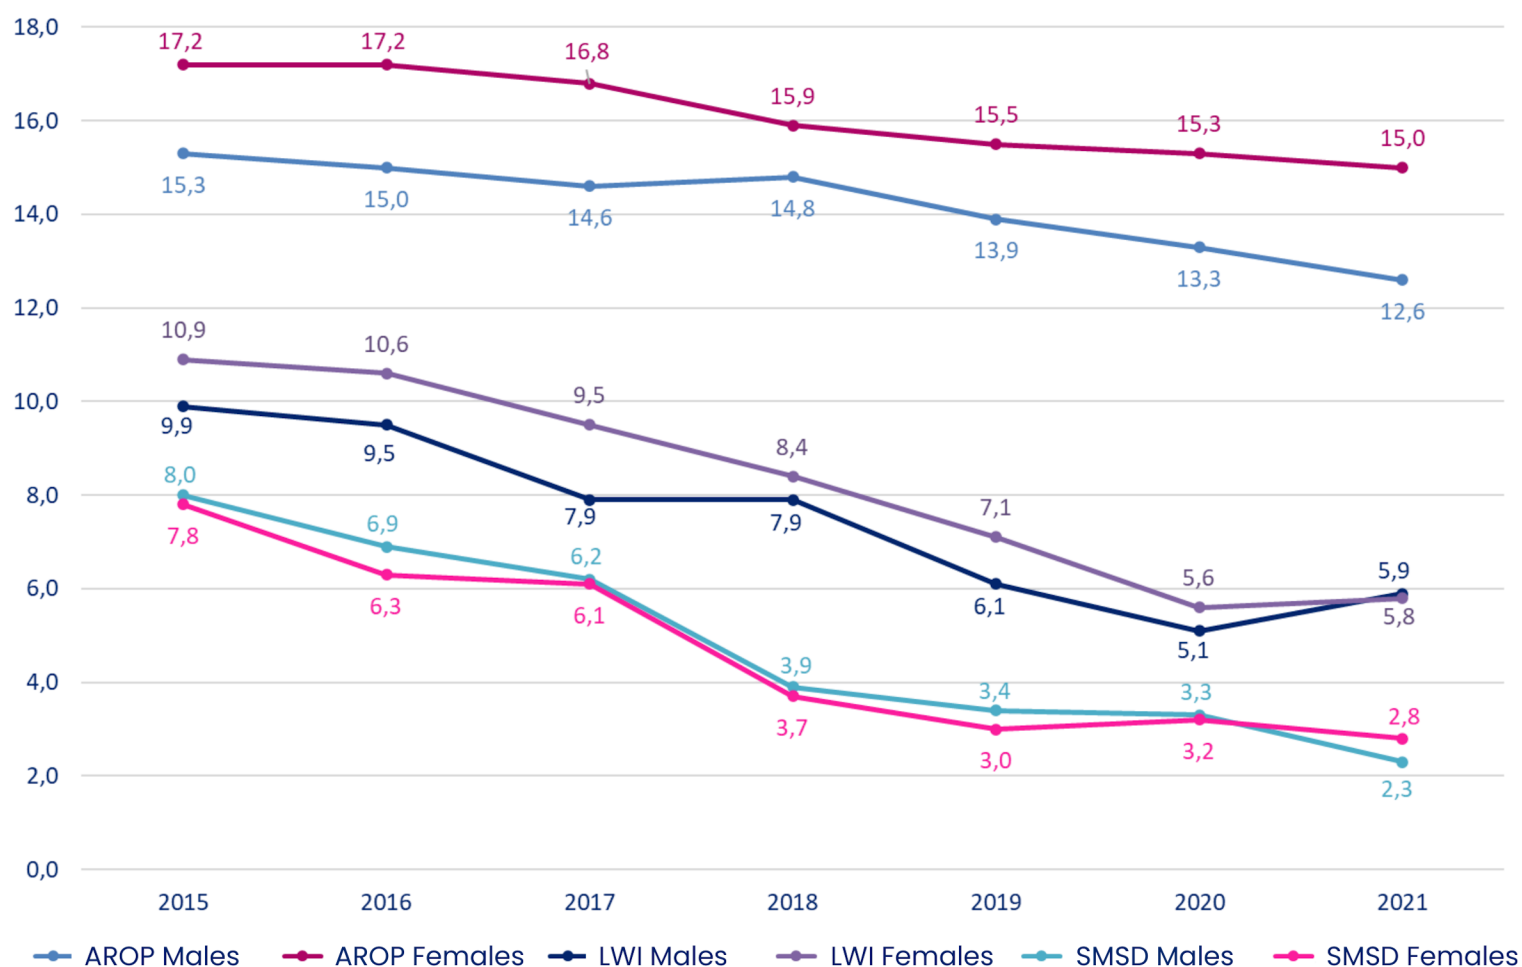

Cannot afford:

- 1) to have an internet connection,
- 2) to replace worn-out clothes by some new ones,
- 3) to have 2 pairs of properly fitting shoes (including a pair of all-weather shoes),
- 4) to spend a small amount of money each week on him/herself,
- 5) to have regular leisure activities,
- 6) to get together with friends/family for a drink/meal at least once a month.

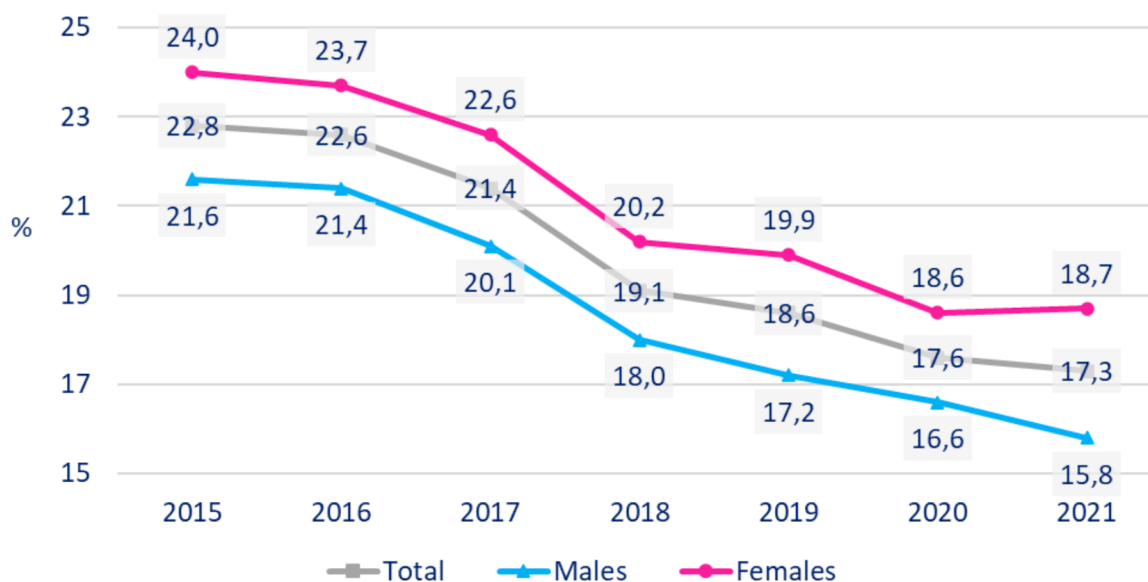

The 6 items at individual level are only collected for people aged 16 or over. For the children below 16 it is estimated by applying the rule: if at least half the number of adults in the household lack an item, then the children living in that household are considered deprived from that item as well.

6 Poverty

6.2 Severe material and social deprivation (SMSD), At risk of poverty (AROP) and very low work intensity (LWI)

6.3 At risk of poverty or social exclusion (AROPE) rate by sex

7 Criminology

7.1 Persons convicted by the district and assize courts by sex and offence group

YEAR		2019			2020			2021
