## **METHODOLOGICAL NOTES**

### **Definitions**

The **Harmonized Price Index (HICP)** an economic indicator constructed to measure the changes of prices over time of consumer goods and services acquired, used or paid by households and tourists within the economic territory of the country. The HICP is calculated according to a harmonized approach and methodology laid down by a series of regulations of EU.

The **Annual change** shows the change of the HICP when compared with the index of the corresponding month of the previous year.

### **Products/Services**

From January 2018 and onwards, the products included in the HICP have been revised. The revision was based on the results of the Household Budget Survey 2015/2016. More details are available on CYPSTAT website in the Methodology section, in the statistical sub-category Economy / Price Indices / Harmonized Consumer Price Index.

### **Collection**

The price collection is carried out only in urban districts of Nicosia, Larnaca, Limassol and Paphos. For each city, the fluctuations in the product prices each month are weighted according to their population. Specifically, the weights for the four districts are: Nicosia 42%, Limassol 30%, Larnaca 18% and Paphos 10%.

The prices of 805 goods and services are recorded once every month, except for some seasonal products (e.g vegetables and fruits), meat and fuels, whose prices are collected every week (every Thursday). The collected prices are those actually paid by consumers for the purchase of specific goods and services, and they include various taxes, such as the Value Added Tax and excise duties. For the calculation of the Index end-of-season sales prices are taken into account as well as special offer prices which are available for the general public and have no restrictions.

### **Weights**

The weight of the HICP goods and services are calculated based on consumption expenditure (of both households and tourists) incurred in the economic territory of the country. Up to 2011, the main source for the consumption expenditures was the Household Budget Survey, while from 2012 and onwards, data from the National Accounts are utilized satisfying relevant Eurostat's Regulation (No 1148/2020).

### **Base Year**

The index reference period was 2005=100 for the period between January 2006 and January 2015. From January 2016 and onwards, the base year is 2015=100.

### **Classification**

Until January 2015, COICOP 4 classification was used for the calculation and the dissemination of the HICP. From January 2016 and onwards, CYPSTAT is adopting the ECOICOP classification satisfying relevant Eurostat's Regulation. In other words, the lowest level of detail for the classification used in CPI is COICOP 5-digits.

Since February 2019 CYPSTAT publishes HICP special aggregates (economic origin) compiled from more detailed input data.
