PRESS RELEASE

HARMONIZED INDEX OF CONSUMER PRICES (HICP): September 2025

Annual Rate of Change 0,0%

The Harmonized Index of Consumer Prices in September 2025 remained stable compared with September 2024 and recorded a decrease of 0,4% compared with August 2025 (Table 1).

Note: The HICP in Euro area for the last month is based on Eurostat's flash estimate.

Compared with September 2024, the largest positive changes were observed in the categories Recreation and Culture (5,6%) and Restaurants and Hotels (4,9%), while the largest decreases were recorded in the categories Clothing and Footwear (-7,2%) and Housing, Water Supply, Electricity and Gas (-3,8%) (Table 1).

Compared with August 2025, the most significant changes were noted in the categories Clothing and Footwear (6,3%), Transport (-5,1%), Education (2,1%) and Restaurants and Hotels (-1,5%) (Table 1).

For the period January–September 2025, in comparison with the corresponding period of the previous year, the most significant changes were registered in the categories Recreation and Culture (6,5%), Clothing and Footwear (-6,0%) and Restaurants and Hotels (5,3%) (Table 1).

The largest change among the economic categories compared to September 2024 was recorded in the category Energy (-6,0%) and compared to August 2025 in the category Services (-2,0%) (Table 2).

Table 1

Categories of Goods and Services	CPI (2015=100)		Change (%)		
	August 2025	September 2025	Sept 25/ Sept 24	Sept 25/ Aug 25	Jan–Sept 25/Jan–Sept 24
Food and Non-Alcoholic Beverages	126,67	128,06	-2,0	1,1	1,0
Alcoholic Beverages and Tobacco	101,96	102,34	-1,1	0,4	-0,1
Clothing and Footwear	87,33	92,86	-7,2	6,3	-6,0
Housing, Water, Electricity, Gas and Other Fuels	139,64	140,32	-3,8	0,5	-1,6
Furnishings, Household Equipment and Routine Maintenance of the House	102,96	102,81	-1,4	-0,2	-0,7
Health	108,07	108,10	1,2	0,0	1,5
Transport	115,77	109,90	-1,9	-5,1	-1,3
Communication	88,11	88,18	-1,9	0,1	-2,2
Recreation and Culture	129,94	129,82	5,6	-0,1	6,5
Education	114,78	117,16	3,3	2,1	3,7
Restaurants and Hotels	139,07	136,98	4,9	-1,5	5,3
Miscellaneous Goods and Services	111,76	112,32	0,4	0,5	0,5
General Consumer Price Index	119,88	119,39	0,0	-0,4	1,1

Table 2

Economic Origin	Weights	Change (%)	
		Sept 25/ Sept 24	Sept 25/ Aug 25
General HICP	1000	0,0	-0,4
Energy	96,25	-6,0	0,4
Food-Alcoholic Beverages-Tobacco	223,95	-1,8	0,9
Non-Energy Industrial Goods	229,71	-3,2	1,5
Services	450,09	3,7	-2,0

Note: The weights of the categories are calculated with infinite decimal figures and rounded up to two decimals when published. Figures do not add up to the total due to rounding.

METHODOLOGICAL NOTES

Definitions

The **Harmonized Index of Consumer Prices (HICP)** is an economic indicator constructed to measure the changes of prices over time of consumer goods and services acquired, used or paid by households and tourists within the economic territory of the country. The HICP is calculated according to a harmonized approach and methodology laid down by a series of regulations of EU.

The **Annual change** shows the change of the HICP when compared with the index of the corresponding month of the previous year.

Products/Services

From January 2018 onwards, the products included in the HICP have been revised. The revision was based on the results of the Household Budget Survey 2015/2016. More details are available on CYPSTAT website in the Methodology section, in the statistical sub-category Economy / Price Indices / Harmonized Consumer Price Index.

Price collection

The price collection is carried out only in urban districts of Nicosia, Larnaca, Limassol and Paphos. For each city, the fluctuations in the product prices for each month are weighted according to their population. Specifically, the weights for the four districts are: Nicosia 42%, Limassol 30%, Larnaca 18% and Paphos 10%.

The prices of 805 goods and services are recorded once every month, except for some seasonal products (e.g. vegetables and fruits), meat and fuels, for which prices are collected every week (every Thursday). The collected prices are those actually paid by consumers for the purchase of specific goods and services, and they include various taxes, such as the Value Added Tax and excise duties. For the calculation of the Index end-of-season sales prices are taken into account as well as special offer prices which are available for the general public and have no restrictions.

Weights

The weights of HICP goods and services are calculated based on consumption expenditure (of both households and tourists) incurred in the economic territory of the country. Up to 2011, the main source for the consumption expenditures was the Household Budget Survey, while from 2012 onwards, data from the National Accounts are utilized satisfying relevant EU Regulation.

Base Year

The index reference period was 2005=100 for the period between January 2006 and December 2015. From January 2016 and onwards, the base year is 2015=100.

Classification

Until December 2015, COICOP 4 classification up to four digits level of analysis was used for the calculation and the dissemination of the HICP. From January 2016 onwards, CYPSTAT is adopting the ECOICOP classification satisfying relevant EU Regulation. Consequently, the lowest level of detail for the classification used in HICP is ECOICOP 5-digits level of analysis.

Since February 2019, CYPSTAT publishes HICP special aggregates (economic origin), compiled from more detailed input data.
