PREFACE

This publication provides a comprehensive account of the commodity flows between Cyprus and its trading partner countries for the period January-May 2009. It includes detailed quantity and value data on imports/arrivals and exports/dispatches of domestically produced goods and foreign goods classified by commodity (extended at the 6th digit level) and by EU and non-EU subtotals.

The statistics of trade with non-EU countries (extra-EU trade) are compiled mainly from “THESEAS” system, the computerised system of Customs Authorities for imports and the Single Administrative Document (SAD) for exports. The statistics of trade with EU countries (intra-EU trade) are compiled via the Intrastat system and the data collected via the VAT returns.

With regards to the commodity classification used in this publication, this is based on subheadings (6th digit commodity code) of the Harmonised Commodity Description and Coding System (H.S.), which is published and maintained by the Brussels based World Customs Organization.

This report was prepared by the staff of the Foreign Trade Section, under the general supervision of Mr. George Zeitountsian, Senior Statistics Officer, Head of the National Accounts and Foreign Trade Division.

The valuable cooperation of the Department of Customs and Excise and the VAT Service is acknowledged.

EXPLANATORY NOTES

1. Sources

Since the accession of Cyprus to EU in May 2004, major changes were brought into trade statistics data. Trade statistics with EU Member States and trade statistics with non-EU countries are compiled from two separate sources. This was the consequence of the abolition of custom formalities between EU Member States, which had served as the traditional source of trade statistics, and the introduction of a new data collection system called Intrastat. Customs declarations, the traditional source of almost all trade statistics, were no longer required for most movements of goods within the EU. A new EU wide system for collecting intra-EU trade statistics, Intrastat, was introduced in May 2004 for the compilation of statistics with Member States.

The introduction of Intrastat as from May 2004 involved a methodological break with the past. Intra-EU trade statistics are compiled using the information extracted from two sources: The first is the Intrastat system in which the providers of statistical information submit detailed monthly returns giving information on arrivals and/or dispatches with EU countries to national responsible Authority. The Legal background of Intra-EU trade statistics is the 2004 National Intrastat Law (L38(I)/2004) relating to the statistics of the trading of goods between Member States and the 2004 National Law (Amended) (L135(I)/2004), as well as the Community legislation and covers about 98% of Cyprus trade with EU. The second component of the Intra-EU trade statistics is the VAT return, on which all traders are required to record the total value of goods imported from and exported to other EU Member States. The information provided on the VAT returns is necessary for determining the total EU trade for those traders below the Intrastat thresholds, for maintaining the Intrastat trader's register and for identifying those traders exceeding the thresholds, who are eligible to make the detailed Intrastat return.

The statistics of trade with non-EU countries are compiled mainly from "Theseas" system, the computerised system of Customs Authorities for imports and the Single Administrative Document (SAD) for exports.

2. Responsibility for data collection, compilation and publication

In the case of the intra-EU trade, the basic data are collected and edited by the VIMA Section of the VAT Service via the Intrastat system.

The VIMA Section of the VAT Service is the responsible Authority for this work, which includes the maintenance of the traders' register, data punching, the processing of returns, data editing and data validation. The VIMA Section forwards the edited data to the External Trade Statistics Section of the Statistical Service.

The Statistical Service checks the data for validity and consistency and prepares estimates for all traders who have not been included (Intrastat non-responders and traders below the Intrastat threshold) and for certain special categories of trade. It combines these estimates with the actual data received and disseminates the results to the public and to European Statistical Service and other Institutions in the form of releases, publications, diskettes, commodity reports etc.

For extra-EU trade, the basic data for imports are collected by the Customs Authorities through "Theseas" system and the Single Administrative Document for exports. The Statistical Service checks the data for consistency, prepares the extra-EU trade statistics and disseminates the results to the public and to European Statistical Service and other Institutions.

3. Exclusions

The implementing Regulations covering the compilation of intra-EU and extra-EU trade statistics contain explicit exclusions lists, which are very similar to each other.

The lists of excluded categories in the regulations are not precisely identical but have most features in common. In particular, the exclusion list for extra-EU trade does not include temporary goods under customs procedure of temporary importation or exportation being explicating excluded from the coverage of commerce.

Exceptions to Intra EU Trade (Regulation 1982/2004, Annex I)

List of goods excluded from statistics relating to the trading of goods between Member States to be transmitted to the Commission (Eurostat):

- (k) satellite launchers:
- on export and import pending their launching into space

- (m) goods for and following temporary use, provided all the following conditions are met:
- no processing is planned or made
 - the expected duration of the temporary use is not longer than 24 months

4. Thresholds

- *Extra-EU trade threshold*

Through the application of the threshold system extra-EU trade statistics do not cover imports and exports whose value is lower than the customs threshold.

- *Intra-EU trade threshold*

Through the application of the threshold system, intra-EU trade statistics cover any natural or legal person registered for VAT, whose value of trade of the is considered to be above the threshold level of €55000, in arrivals or dispatches.

The value of trade of the party responsible for providing information is considered to be above the thresholds when the value of trade with other EU Member States during the previous year exceeds the applicable threshold, or when the cumulative value of trade with other EU Member States since the beginning of the year of application exceeds the applicable thresholds.

5. Intrastat estimation

The figures include value and volume estimates for traders above the Intrastat thresholds who did not make Intrastat returns and for traders below the thresholds who did not provide aggregate intra-EU trade figures on their VAT returns. Estimates are assigned to partner country and commodity.

6. Country Classification

The classification of countries is the country nomenclature (Geonomenclature) as set out annually in the Official Journal of the European Communities. From January 1999, the United Nations' ISO alpha-2 coding system is followed, in which each country is identified by a two-letter code.

7. Partner Country

In this publication, **exports** and **dispatches** are classified by the country (or Member State) of final destination of the goods. The last country to which the goods are specifically directed on their outward movement from the reporting country is regarded as their final destination. This is not necessarily the country in which the good will be unshipped or that in which they will be finally consumed.

For **imports** (extra-EU trade), the trading partner is the country of origin. In general, goods obtained entirely from a given country originate in that country. A product, in the production of which two or more countries were concerned, is considered as originating in the country in which the last transformation or substantial processing took place. Packing, repacking, sorting and blending are not regarded as manufacturing processes.

For **arrivals** (intra-EU trade), the trading partner is the Member State of consignment of the goods. This is the Member State from which the goods were dispatched without halt or legal formality in another country apart from any transport reasons. Conversely, if there was such an operation in another country, that country becomes the Member State of consignment.

8. Commodity Classification

With regards to the commodity classification used in this publication, this is based on the Harmonised Commodity Description and Coding System or more simply the Harmonised System or H.S. and includes more than 10 000 eight-digit codes.

The Harmonised System is a legal instrument and was adopted by the Customs Co-operation Council (now the World Customs Organisation) in June 1983 and the International Convention on the Harmonised System (H.S. Convention) entered into force on the 1st January 1988.

According to the H.S. Convention, the H.S. means the Nomenclature comprising the headings and the subheadings and their related numerical codes, the Section, Chapter and Subheadings notes and the General Rules for the interpretation of the Harmonised System".

The most detailed results in this publication are broken down by the sub-headings of the Combined Nomenclature (C.N.). Both H.S. and C.N. are therefore concerned heavily with the nature or material of the product.

The shape of the H.S. and the C.N. classifications is illustrated in the following table:

Nomenclature	Levels of breakdown	Code	Number
Harmonised System (H.S.)	Section	One digit	21
	Chapter	Two digits	99
	Heading	Four digits	1 244
	Sub-Heading	Six digits	5 224
Combined Nomenclature (C.N.)	Sub-Heading	Eight digits	10 096

9. Recording system

▪ *Extra- EU trade*

For the purpose of this publication, the general trade system is recorded for the trade with non-EU countries. Under it, the recorded aggregates include all goods entering or leaving the economic territory of Cyprus with the exception of simple transit trade. In particular, all goods which are received into customs warehouses are recorded as imports at that stage whether or not they subsequently go into free circulation in Cyprus. Similarly, outgoing goods from customs warehouses are included in the general trade aggregates at the time they leave Cyprus. Furthermore, all goods that go or leave directly into/from local market are included.

▪ *Intra- EU trade*

The Intrastat system is based on the concept of movement of goods between Member States. Accordingly, it is applied to the goods which move from one Member State to another. As such, intra-EU trade statistics record the arrivals and dispatches of all movable property recorded by each Member State. "Arrivals" are analogous to imports; "dispatches" are analogous to exports.

Arrivals include:

- a) goods in free circulation which enter the statistical territory of Cyprus.
- b) goods which have been placed under the Customs procedure for inward processing or processing under customs control (for processing, transformation or repair) in another Member State and which enter the statistical territory of Cyprus.
- c) Some goods movements are included in statistics based on specific conditions. In particular, aircraft and ships whose ownership has been transferred from a person established in another Member State to a person established in Cyprus are included in the statistics of arrivals.

Dispatches include:

- a) goods in free circulation which leave the statistical territory of Cyprus bound for another Member State.
- b) goods which have been placed under the Customs procedure for inward processing or processing under Customs control (for processing, transformation or repair) in Cyprus and which are destined for another Member State.
- c) Some goods movements are included in statistics based on specific conditions. In particular, aircraft and ships whose ownership has been transferred from a person established in Cyprus to a person established in another Member State are included in the statistics on dispatches.

Statistics do not cover goods in transit, that is goods that are merely passing across a Member State, by any means of transport, but are not stored there for any but transport reasons.

10. Domestic and foreign goods

Domestic goods are goods originating in the economic territory of Cyprus; if they have been wholly obtained in it or were substantially transformed by processing in it, so that the processing confers domestic origin. Goods originally imported and having undergone only repair or minor operations which leave them essentially unchanged are not defined as domestic. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and selling.

Foreign goods are goods originating in the rest of the world, i.e. not produced in the economic territory of Cyprus and compensating goods obtained under the outward processing procedure when such processing confers foreign origin.

11. Statistical Value

The statistical value is the value calculated at national frontiers. It is calculated on a f.o.b. basis (free on board), for exports/dispatches or c.i.f. basis (cost, insurance, freight), for imports/arrivals.

Therefore, it includes only incidental expenses (freight, insurance) incurred in the part of the journey located on the territory of Cyprus from which the goods are exported (in the case of exports/dispatches) and in the part of the journey located outside the territory of Cyprus (in the case of imports/arrivals).

The statistical value is generally based on the customs value in the case of extra-EU trade, or on taxable value in the case of intra-EU trade. Under the Intrastat system, the statistical value is not provided by all the information providers. For those traders not liable to submit statistical value, the statistical value is calculated by the Statistical Service of Cyprus from the invoiced amount given in the return.

In the case the goods imported or exported for processing, it is always the total value of the goods which is given, before and after processing, not just the value added by the processing procedure.

12. Quantity measurement

▪ *Net mass*

The most common unit of measurement of quantity used in the collection of trade data is the net mass, which means the actual mass of the goods excluding all packaging. It is recorded in kilograms. However, the specification of net mass for the subheadings of the Combined Nomenclature (C.N.) as established by Council Regulation (EEC) No. 2658/87 and set out in Appendix I of this publication is not requested from parties responsible for providing information within the framework of Community statistics relating to the trading of goods between Member States, according to the Commission Regulation (EC) No. 1982/2004, Article 9.

Therefore, information on net mass is not presented in the detailed tables of this publication for the C.N. codes listed in Appendix I for both intra and extra -EU trade in order the statistical data to be comparable.

▪ *Supplementary units*

Supplementary units are the possible units measuring quantity units other than the net mass (for example, litre, number of parts, square metres). They have to be indicated for certain goods. The appropriate supplementary unit is given in the published version of the Combined Nomenclature.

In this publication, the supplementary units applicable are indicated on page 29.

13. Reference period

▪ *Intra-EU trade*

The reference period is assigned to a given month on the basis of the date on which the Value Added Tax becomes chargeable on intra Community acquisitions, according to invoice date. To a large extent, the reference period is defined as the calendar month, of arrival or dispatch of the goods.

▪ *Extra-EU trade*

The reference period is the calendar month in which the Customs Authorities accepts and release the declaration.

14. Grouping of countries

In the detailed tables, countries are arranged in two groups:

- a) E.U Countries consisting of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, the United Kingdom and,
- b) Non-E.U Countries consisting of all other countries upon the above group, including countries and territories not specified.

15. Quality of detailed data

Every reasonable effort is made to identify and correct errors received in the data, particularly the more serious errors.

Many efforts have been made to improve the quality of the results and have a satisfactory level of statistical information.

16. Abbreviations

A list of the abbreviations used throughout the volume can be founded on pages 21-25.

17. Rounding on figures

Because of rounding, there may be slight discrepancies between the totals shown and the sum of the constituent items in summary tables.

18. Sources of additional information

External trade publications in PDF format are disseminated from the CYSTAT website (<http://www.mof.gov.cy/cystat>, theme "Publications") each month to the general public free of charge.

Furthermore, provisional trade statistics are issued each month on the CYSTAT website (<http://www.mof.gov.cy/cystat>, theme "External Trade").
