## PREFACE

This report is issued on a monthly basis and aims at providing a general view of the external trade of Cyprus and its partner countries for June 2021. It is divided into three parts. Part A pertains to total trade statistics under the general trade system, part B to extra-EU trade statistics under the special trade system and part C to intra-EU trade statistics. All values shown in the tables of this report are in euros.

The statistics on the trade of goods with non-EU countries (extra-EU trade) are compiled mainly from the computerized systems of the customs authority for imports (“Theseas” system) and for exports. The statistics on the trade of goods with EU countries (intra-EU trade) are compiled mainly via the Intrastat system and the data collected via the VAT returns.

This report was prepared by Mrs. Ioanna Leontiou, Statistics Officer, under the guidance of Mr. Sofronis Vikis, Senior Statistics Officer and the general supervision of Mr. Pantelis Protopapas, Head of the Business, Energy, Environment, Agriculture, Science and Technology and Foreign Trade Statistics Division.

The valuable cooperation of the Department of Customs and Excise and the Tax Department is acknowledged.

## DEFINITIONS OF TERMS USED

### Arrivals

“Arrivals” are analogous to imports.

Arrivals include:

- a) Goods in free circulation which enter the statistical territory of Cyprus.
- b) Goods which have been placed under the customs procedure for inward processing or processing under customs control (for processing, transformation) in another Member State and which enter the statistical territory of Cyprus.
- c) Certain goods are included in statistics based on specific conditions e.g. aircrafts and ships whose economic ownership has been transferred from a natural person or legal entity established in another Member State to a natural person or legal entity established in Cyprus are included in the statistics of arrivals of Cyprus.

### Dispatches

“Dispatches” are analogous to exports.

Dispatches include:

- a) Goods in free circulation which leave the statistical territory of Cyprus bound for another Member State.
- b) Goods which have been placed under the customs procedure for inward processing or processing under customs control (for processing, transformation) in Cyprus and which are destined for another Member State.
- c) Certain goods are included in statistics based on specific conditions. In particular, aircraft and ships whose economic ownership has been transferred from a natural person or legal entity established in the Cyprus to a natural person or legal entity established in another Member State are included in the statistics of dispatches of Cyprus.

### Imports

**Imports under special trade system include:**

- a) Goods, which enter the statistical territory of Cyprus from a non-Member State country and are:
  - Placed under the customs procedure for release into free circulation (goods intended to be consumed in Cyprus or dispatched to another Member State), either immediately or after a period in a customs warehouse; or
  - Placed under the customs procedure for inward processing of processing under customs control (usually goods destined to be processed, transformed for subsequent re-export) either immediately or after a period in a customs warehouse,
- b) Certain goods are included in statistics based on specific conditions e.g. aircrafts and ships whose economic ownership has been transferred from a natural or legal person established in a non - Member State country to a natural person or legal entity established in Cyprus are included in import statistics of Cyprus.

### Exports

**Exports under special trade system include:**

- a) Goods that leave the statistical territory of Cyprus bound for a non-Member State country, having gone through:
  - The customs export procedure (final export, export following inward processing, etc.); or
  - The customs outward-processing procedure (usually goods destined to be processed, transformed for subsequent re-import).

- b) Certain goods are included in statistics based on specific conditions e.g. aircrafts and ships whose economic ownership has been transferred from a natural or legal person established in Cyprus to a natural person or legal entity established in a non - Member State country are included in export statistics of Cyprus.

### **Commodity classification**

The commodity classification is based on the Harmonised Commodity Description and Coding System (HS) or more simply the Harmonised System or HS (6 digits level) and includes more than 5.000 six-digit codes.

The Harmonised System is a legal instrument and was adopted by the Customs Co-operation Council (now the World Customs Organisation) in June 1983 and the International Convention on the Harmonised System (HS Convention) entered into force on the 1st January 1988. The HS is a nomenclature comprising of headings and sub-headings and their related numerical codes, sections, chapters, as well as notes and general rules for its interpretation.

Most detailed results are available by the sub-headings of the Combined Nomenclature (CN), which includes nearly 10.000 eight-digit codes.

**The structure of the HS and the CN classifications (for the reference year 2021) is illustrated in the following table:**

<b><u>Nomenclature</u></b>	<b><u>Levels of breakdown</u></b>	<b><u>Code</u></b>	<b><u>Number</u></b>
Harmonised System (HS)	Section	One digit	21
	Chapter	Two digits	98
	Heading	Four digits	1227
	Sub-heading	Six digits	5396
Combined Nomenclature (CN)	Sub-heading	Eight digits	9493

### **Country classification**

The classification of countries is based on the nomenclature of countries and territories, as set out in the Commission Regulation (EU) No 1106/2012. From January 1999, the United Nations ISO alpha-2 coding system is followed, in which each country is identified by a two-letter code.

### **Partner country**

For exports and dispatches, the trading partner is the non - EU country (or Member State) of final destination of the goods. The last country to which the goods are specifically directed on their outward movement from Cyprus is regarded as their final destination. This is not necessarily the country in which the good will be unshipped or that in which they will be finally consumed.

For imports (extra-EU trade), the trading partner is the country of origin. In general, goods obtained entirely from a given country originate in that country. A product in the production of which two or more countries were involved, is considered as originating in the country in which the last substantial transformation or processing took place. Packing, repacking and sorting are not regarded as manufacturing processes.

For arrivals (intra-EU trade), the trading partner is the Member State of consignment of the goods. This is the Member State from which the goods were dispatched without halt or legal formality in another country apart from any transport reasons. Conversely, if there was such an operation in another country, that country becomes the Member State of consignment.

The United Kingdom is considered as an extra-EU partner country for the EU. Imports from the United Kingdom are recorded by country of consignment until the end of the transitory period (31 December 2020). As of January 2021 onwards, data on trade with the United Kingdom is based on a mixed concept. In application of the Withdrawal Agreement Protocol on Ireland / Northern Ireland, for trade with Northern Ireland the statistical concepts applicable are the same as those for trade between Member States (imports are recorded by country of consignment) while for trade with the United Kingdom (excluding Northern Ireland) the same statistical concepts are applicable as for trade with any other extra-EU partner country (imports are recorded by country of origin). For these reasons data on trade with the United Kingdom are not fully comparable with data on trade with other extra-EU trade partners, and for reference periods before and after the end of 2020.

### **Trade systems**

There are broadly two approaches, closely linked with customs procedures, used for the measurement of international trade in goods: the general trade system and the special trade system.

#### ***General trade system***

The general trade system is the wider concept and under it the recorded aggregates include goods entering or leaving the economic territory of Cyprus with the exception of simple transit trade or transshipment of goods. Quasi transit trade is included in general imports and exports statistics. In particular, goods which are received into customs warehouses are recorded as imports at that stage whether or not they subsequently go into free circulation in Cyprus. Similarly, outgoing goods from customs warehouses are included in the general trade aggregates at the time they leave Cyprus.

#### ***Special trade system***

The special trade system is a narrower concept. Goods from a non - EU country which are received into customs warehouses are not recorded in the special trade aggregates unless they subsequently go into free circulation in Cyprus (or are placed under the customs procedures for inward processing).

Similarly, outgoing goods from customs warehouses are not recorded as exports.

### **Stores and provisions**

Stores and provisions denote ships and aircrafts stores and supplies.

Ships and aircrafts stores mean the various products for consumption by the crew and passengers of vessels or aircrafts;

Ships and aircrafts supplies means the products for the operation of the engines, machines and other equipment on vessels or aircrafts, such as fuel, oil and lubricants.

### **Domestic and foreign goods**

Domestic goods are goods originating in the economic territory of Cyprus; if they have been wholly obtained in it or were substantially transformed by processing in it, so that the processing confers domestic origin. Goods originally imported and having undergone only repair or minor

operations, which leave them essentially unchanged are not defined as domestic. Minor operations include packaging, bottling, cleaning, sorting etc.

Foreign goods are goods originating in the rest of the world, i.e. not included in the economic territory of Cyprus and compensating goods obtained under the outward processing procedure when such processing confers foreign origin.
