## **METHODOLOGICAL INFORMATION**

### **Definitions**

**Employment** – The average number of all persons employed during the year, in full time equivalent terms.

**Production value** - The value of goods produced, services rendered to others, net receipts from the sale of goods sold in the same condition as purchased, other income and changes in the value of work-in-progress at the end of the year.

**Value added** - Derived by deducting from the production value the aggregate costs of all materials used, other production expenses, administrative expenses and rents paid for buildings and machinery.

### **Coverage and collection of data**

The Industrial Production Survey covers a sample of around 1.470 enterprises with main activity falling under sections B, C, D and E of the classification system of economic activities NACE Rev. 2 of the European Union.

The collection of data from the Statistical Service is done by personal interview with the use of a special questionnaire.
