PRESS RELEASE

REGISTERED UNEMPLOYED: NOVEMBER 2025

The unemployed persons, registered at the District Labour Offices on the last day of November 2025, reached 10.924 persons. Based on the seasonally adjusted data which reflect the trend of unemployment, the number of registered unemployed for November 2025 increased to 10.078 persons, in comparison to 9.723 in the previous month. (Table 1)

In comparison with November 2024, a decrease of 163 persons or 1,5% was recorded. This decrease is mainly attributed to the sectors of construction, manufacturing, trade, financial and insurance activities, as well as to the decrease recorded for newcomers in the labour market. (Table 2)

Table 1

Month and Year	Registered Unemployed – Actual Data	Registered Unemployed – Seasonally Adjusted Data
<u>2025</u>		
November	10.924	10.078
October	7.099	9.723
September	7.624	9.877
August	11.556	10.191
July	11.088	10.095
June	9.153	9.952
May	7.378	9.862
April	8.118	9.837
March	11.073	10.161
February	12.761	10.209
January	13.147	10.312
<u>2024</u>		
December	12.382	10.361
November	11.087	10.291
October	7.781	10.423
September	8.142	10.441
August	12.079	10.800
July	11.877	10.926
June	10.112	10.919
May	8.159	10.708
April	9.343	11.123

METHODOLOGICAL INFORMATION

Registered Unemployed

The number of registered unemployed concerns the persons aged 15 years and over who apply at the District and Local Labour Offices of the Department of Labour to seek employment and are registered as unemployed. These persons have to be able and available for work and must be actively looking for a job. The monthly number of registered unemployed concerns the persons who during the last day of the month have an active application for seeking employment.

The number of registered unemployed does not include self-employed or persons who seek part-time employment, nor persons who seek employment in certain areas or for a specific employer.

Seasonally Adjusted Data

Seasonal adjustment is a statistical technique that removes the seasonal component of a time series, making more visible the underlying trend in the change of a characteristic. CYSTAT uses the JDemetra+ 2.2.2 software which was developed by Eurostat. Seasonally adjusted series are produced by the TRAMO&SEATS algorithm. It should be noted that due to seasonal adjustment the whole series with the monthly estimates is recalculated every time a new month is added in time series. As a result, estimations for the previous months are often revised. In March 2020 a readjustment of the applied model was implemented.

Methodological Changes

According to information provided by the Department of Labour, from Tuesday June 15, 2021, the automatic renewal of registrations was terminated and the online platform of the Public Employment Service was activated to allow the registration of a new job application, its renewal, as well as a job vacancy registration. This settlement may affect the comparison of the monthly unemployment data recorded through this procedure with the data recorded from the previous procedures.

Classification System

Registered unemployed by economic activity are published based on the Statistical Classification of Economic Activities in the European Community, Rev. 2 (NACE Rev.2).
